

Speech Prosody in Atypical Populations

Monday 2nd April 2007

Programme

9:00-9:30	Registration
Session 1:	9:30 – 11:10
9:30-9:40	Welcome <i>Vesna Stojanovik & Jane Setter</i>
9:40-10:10	Workshop: Using Conversation Analysis to assess and treat prosody in autism <i>Deborah Kelly & Suzanne Beeke</i>
10:10-10:30	Paper: Prosodic labelling of adult dysarthric speech <i>Stefanie Shattuck-Hufnagel, Rupa Patel & Nanette Veilleux</i>
10:30-10:50	Paper: The effect of rate control on the intelligibility of dysarthric speech <i>G. van Nuffelen & M. De Bodt</i>
10:50-11:10	Paper: An autosegmental-metrical investigation of intonation in people with Parkinson's Disease <i>Niall Watt, Ineke Mennen & Nicholas Miller</i>
11:10-11:30	TEA/COFFEE BREAK
Session 2:	11:30 – 13:00
11:30-11:50	Paper: Rhythm in the speech of a person with right hemisphere damage: Applying the Pairwise Variability Index <i>Rachael-Anne Knight & Naomi Cocks</i>
11:50-12:10	Paper: Effects of short breath-groups on prosody in an adult speaker post-aneurysm <i>Barry Heselwood</i>
12:10-12:30	Paper: Prosody in Broca's aphasia: An interactional resource? <i>Suzanne Beeke</i>
12:30-13:00	Workshop: Measurement in prosody description and therapy <i>Evelyn Abberton & Adrian Fourcin</i>
13:00-14:00	LUNCH BREAK AND POSTER HANGING
Session 3:	14:00 – 16:20
14:00-14:40	KEYNOTE: Assessment of prosodic ability in atypical populations <i>Sue Peppé</i>
14:40-15:00	Paper: Supra-segmental aspects of pre-lexical and early multi-word speech in paediatric cochlear implanted children <i>Øydis Hide, Martine Coene, Paul Goevarts & Steven Gillis</i>

- 15:00-15:20 Paper: Production characteristics of experimental iambs in children with and without speech impairment
Fay Windsor
- 15:20-15:40 Paper: Prosody in clinical conversations – is there a systematic use of prosodic patterns within a particular clinical setting?
Christina Samuelsson
- 15:40-16:00 Paper: Beat processing in developmental dyslexia: comparing a stress-timed and syllable-timed language
J. M. Thomson, J. Hämäläinen & U. Goswami
- 16:00-16:20 Paper: Does the phonological deficit in developmental dyslexia extend beyond the segmental level?
Catherine Dickie, Ann Clark and Mits Ota
- 16:30-17:30 WINE RECEPTION AND POSTER SESSION**
- Posters**
- Understanding prosody in adolescents with Asperger syndrome
C. Chevallier
- Vocal Profile Analysis Scheme: a tool to describe voice quality variations
Marion Coadou
- The effects of L-Dopa on selected speech variables in Parkinson's disease
Fred Cummins, Sonja A. Kotz, Sonja Fleischhauer, Karl Strecker & Johannes Schwartz
- Aspects of rhythm and intonation in ataxic dysarthria
Cordula Klein, Anja Lowit & Ineke Mennen
- Quantifying speech rhythm deficits in dysarthria
Laurence White, Julie M. Liss, Stephanie M. Spitzer, Sven L. Mattys, Kaitlin L. Lansford, Yu-kyong Choe, Kathryn Kennerley & John N. Caviness
- Analysis of intonation in atypical populations: the case of Williams syndrome children
D. Marchione, A. Tavano, D. Annaz, M. Thomas, A. Devescovi, & A. Karmiloff-Smith
- Perception of phonological quantity by AS/HFA speakers in a quantity language
John Niemi
- Machine learning based duration repair of tracheoesophageal speech
Arantza del Pozo & Steve Young
- Effect of dopamine intake in Parkinsonian dysprosody
Karine Rigaldie, Jean Luc Nespoulous & Nadine Vigouroux
- Long Term Average Spectrum: a tool to measure the voice quality of deaf speakers
Abderrazak Rougab & Marion Coadou
- Intonation in Williams syndrome
Vesna Stojanovik, Jane Setter & Lizet Van Ewijk
- Intonation and Foreign Accent syndrome: a case study
Jo Verhoeven & Peter Mariën
