

## Draft Annex I for recast 1881/2006

Product definitions		
Food	Defined in	Remarks
Animal products	Regulation (EC) No 853/2004 of the European Parliament and of the Council of 29 April 2004 laying down specific hygiene rules for food of animal origin (OJ L 226, 25.6.2004, p. 22).	
Aromatised wine and aromatised wine products	Regulation (EU) No 251/2014 of the European Parliament and of the Council of 26 February 2014 on the definition, description, presentation, labelling and the protection of geographical indications of aromatised wine products and repealing Council Regulation (EEC) No 1601/91(OJ L 84, 20.3.2014, p. 14).	
Cocoa and chocolate products	Directive 2000/36/EC of the European Parliament and of the Council of 23 June 2000 relating to cocoa and chocolate products intended for human consumption (OJ L 197, 3.8.2000, p. 19)	
Fish, fishery products and aquaculture products	Regulation (EU) No 1379/2013 of the European Parliament and of the Council of 11 December 2013 on the common organisation of the markets in fishery and aquaculture products, amending Council Regulation (EC) No 1184/2006 and (EC) No 1224/2009 and repealing Council Regulation (EC) No 104/2000 (OJ L 354, 28.12.2013, p. 1)	Where fish are intended to be eaten whole, the maximum level shall apply to the whole fish. In case of <i>Pecten maximus</i> , the maximum level applies to the adductor muscle and gonad only. For crustaceans, the maximum level shall apply to muscle meat from appendages and abdomen. This definition excludes the cephalothorax of crustaceans. In case of crabs and crab-like crustaceans ( <i>Brachyura</i> and <i>Anomura</i> ) the maximum level applies to the muscle meat from appendages.
Food intended for infants and young children (infant formula and follow-on formula, processed cereal-based foods, baby foods and foods for special medical purposes intended for infants and young children)	Regulation (EU) No 609/2013 of the European Parliament and of the Council of 12 June 2013 on food intended for infants and young children, food for special medical purposes, and total diet replacement for weight control and repealing Council Directive 92/52/EEC, Commission Directives 96/8/EC, 1999/21/EC, 2006/125/EC and 2006/141/EC, Directive 2009/39/EC of the European Parliament and of the Council and Commission Regulations (EC) No 41/2009 and (EC) No 953/2009 (OJ L181, 29.6.2013, p. 35)	

Food supplements	Directive 2002/46/EC of the European Parliament and of the Council of 10 June 2002 on the approximation of the laws of the Member States relating to food supplements (OJ L 183, 12.7.2002, p. 51)	
Fruit juices and similar products	Council Directive 2001/112/EC of 20 December 2001 relating to fruit juices and certain similar products intended for human consumption (OJ L 10, 12.1.2002, p. 58)	
Fruits, vegetables (including herbs and seaweed), spices, oilseeds (including groundnuts) and cereals	Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC (OJ L 70, 16.3.2005, p. 1) as last amended by Regulation (EC) No 178/2006 (OJ L 29, 2.2.2006, p. 3). Rice, husked rice, milled rice and parboiled rice as defined in Codex Standard 198-1995.	This means, inter alia, that buckwheat ( <i>Fagopyrum sp</i> ) is included in 'cereals' and buckwheat products are included in 'cereal products'. The ML applies to the same part as defined in to Regulation (EC) No 396/2005, except in those cases where inedible parts are included. For fruits and vegetables the maximum level applies after washing of the fruit or vegetables and separating the edible part. Tree nuts are not covered by the maximum level for fruit. For groundnuts (peanuts) and tree nuts the maximum levels apply to the edible part. If groundnuts (peanuts) and tree nuts 'in shell' are analysed, it is assumed when calculating the aflatoxin content all the contamination is on the edible part, except in the case of Brazil nuts.
Honey	Council Directive 2001/110/EC of 20 December 2001 relating to honey (OJ L 10, 12.1.2002, p. 47)	
Spirit drinks	Regulation (EC) No 110/2008 of the European Parliament and of the Council on the definition, description, presentation, labelling and the protection of geographical indications of spirit drinks and repealing Council Regulation (EEC) No 1576/89 (OJ L 39, 13.2.2008, p. 16)	
Wine and sparkling wines	Regulation (EU) No 1308/2013 of the European Parliament and of the Council of 17 December 2013 establishing a common organisation of the markets in agricultural products and repealing Council Regulations (EEC) No 922/72, (EEC) No 234/79, (EC) No 1037/2001 and (EC) No 1234/2007 (OJ L 347, 20.12.2013, p. 671)	

Other definitions																																																																																	
First stage processing	<p>‘First-stage processing’ means any physical or thermal treatment, other than drying, of or on the grain. Cleaning, including scouring, sorting and drying procedures are not considered to be “first-stage processing” insofar as the whole grain remains intact after cleaning and sorting. Scouring is cleaning cereals by brushing and/or scrubbing it vigorously. In case scouring is applied in the presence of ergot sclerotia, the cereals need to undergo a first cleaning step before scouring. The scouring, performed in combination with a dust aspirator, is followed by a colour sorting before milling. Integrated production and processing systems means systems whereby all incoming lots of cereals are cleaned, sorted and processed in the same establishment. In such integrated production and processing systems, the maximum level applies to the unprocessed cereals after cleaning and sorting but before first-stage processing. Food business operators shall ensure compliance through their HACCP procedure whereby an effective monitoring procedure is established and implemented at this critical control point.</p>																																																																																
WHO-TEQs	<p>Sums of dioxins (polychlorinated dibenzo-para-dioxins [PCDDs]) and polychlorinated dibenzofurans [PCDFs]), and dioxin-like PCBs are calculated using the WHO-toxic equivalency factors (WHO-TEFs) and expressed as WHO toxic equivalents (WHO-TEQs). WHO-TEFs for human risk assessment are based on the conclusions of the World Health Organization (WHO) - International Programme on Chemical Safety (IPCS) expert meeting which was held in Geneva in June 2005 (Van den Berg et al., The 2005 World Health Organization Re-evaluation of Human and Mammalian Toxic Equivalency Factors for Dioxins and Dioxin-like Compounds. Toxicological Sciences 93[2], 223-241 [2006]).</p> <table border="1" data-bbox="712 655 1684 1305"> <thead> <tr> <th data-bbox="712 655 1196 687">Congener</th> <th data-bbox="1039 655 1196 687">TEF value</th> <th data-bbox="1196 655 1684 687">Congener</th> <th data-bbox="1487 655 1684 687">TEF value</th> </tr> </thead> <tbody> <tr> <td colspan="2" data-bbox="712 687 1196 719"><b>Dibenzo-p-dioxins (“PCDDs”)</b></td> <td colspan="2" data-bbox="1196 687 1684 743"><b>“Dioxin-like” PCBs Non-ortho PCBs + Mono-ortho PCBs</b></td> </tr> <tr> <td data-bbox="712 743 1196 775">2,3,7,8-TCDD</td> <td data-bbox="1039 743 1196 775">1</td> <td colspan="2" data-bbox="1196 743 1684 799"><b>Non-ortho PCBs</b></td> </tr> <tr> <td data-bbox="712 775 1196 807">1,2,3,7,8-PeCDD</td> <td data-bbox="1039 775 1196 807">1</td> <td data-bbox="1196 799 1684 831">PCB 77</td> <td data-bbox="1487 799 1684 831">0.0001</td> </tr> <tr> <td data-bbox="712 807 1196 839">1,2,3,4,7,8-HxCDD</td> <td data-bbox="1039 807 1196 839">0.1</td> <td data-bbox="1196 831 1684 863">PCB 81</td> <td data-bbox="1487 831 1684 863">0.0003</td> </tr> <tr> <td data-bbox="712 839 1196 871">1,2,3,6,7,8-HxCDD</td> <td data-bbox="1039 839 1196 871">0.1</td> <td data-bbox="1196 863 1684 895">PCB 126</td> <td data-bbox="1487 863 1684 895">0.1</td> </tr> <tr> <td data-bbox="712 871 1196 903">1,2,3,7,8,9-HxCDD</td> <td data-bbox="1039 871 1196 903">0.1</td> <td data-bbox="1196 895 1684 927">PCB 169</td> <td data-bbox="1487 895 1684 927">0.03</td> </tr> <tr> <td data-bbox="712 903 1196 935">1,2,3,4,6,7,8-HpCDD</td> <td data-bbox="1039 903 1196 935">0.01</td> <td colspan="2" data-bbox="1196 927 1684 983"><b>Mono-ortho PCBs</b></td> </tr> <tr> <td data-bbox="712 935 1196 967">OCDD</td> <td data-bbox="1039 935 1196 967">0.0003</td> <td data-bbox="1196 983 1684 1015">PCB 105</td> <td data-bbox="1487 983 1684 1015">0.00003</td> </tr> <tr> <td colspan="2" data-bbox="712 967 1196 999"><b>Dibenzofurans (“PCDFs”)</b></td> <td data-bbox="1196 1015 1684 1046">PCB 114</td> <td data-bbox="1487 1015 1684 1046">0.00003</td> </tr> <tr> <td data-bbox="712 999 1196 1031">2,3,7,8-TCDF</td> <td data-bbox="1039 999 1196 1031">0.1</td> <td data-bbox="1196 1046 1684 1078">PCB 118</td> <td data-bbox="1487 1046 1684 1078">0.00003</td> </tr> <tr> <td data-bbox="712 1031 1196 1062">1,2,3,7,8-PeCDF</td> <td data-bbox="1039 1031 1196 1062">0.03</td> <td data-bbox="1196 1078 1684 1110">PCB 123</td> <td data-bbox="1487 1078 1684 1110">0.00003</td> </tr> <tr> <td data-bbox="712 1062 1196 1094">2,3,4,7,8-PeCDF</td> <td data-bbox="1039 1062 1196 1094">0.3</td> <td data-bbox="1196 1110 1684 1142">PCB 156</td> <td data-bbox="1487 1110 1684 1142">0.00003</td> </tr> <tr> <td data-bbox="712 1094 1196 1126">1,2,3,4,7,8-HxCDF</td> <td data-bbox="1039 1094 1196 1126">0.1</td> <td data-bbox="1196 1142 1684 1174">PCB 157</td> <td data-bbox="1487 1142 1684 1174">0.00003</td> </tr> <tr> <td data-bbox="712 1126 1196 1158">1,2,3,6,7,8-HxCDF</td> <td data-bbox="1039 1126 1196 1158">0.1</td> <td data-bbox="1196 1174 1684 1206">PCB 167</td> <td data-bbox="1487 1174 1684 1206">0.00003</td> </tr> <tr> <td data-bbox="712 1158 1196 1190">1,2,3,7,8,9-HxCDF</td> <td data-bbox="1039 1158 1196 1190">0.1</td> <td data-bbox="1196 1206 1684 1238">PCB 189</td> <td data-bbox="1487 1206 1684 1238">0.00003</td> </tr> <tr> <td data-bbox="712 1190 1196 1222">2,3,4,6,7,8-HxCDF</td> <td data-bbox="1039 1190 1196 1222">0.1</td> <td colspan="2" data-bbox="1196 1238 1684 1294"></td> </tr> <tr> <td data-bbox="712 1222 1196 1254">1,2,3,4,6,7,8-HpCDF</td> <td data-bbox="1039 1222 1196 1254">0.01</td> <td colspan="2" data-bbox="1196 1294 1684 1350"></td> </tr> <tr> <td data-bbox="712 1254 1196 1286">1,2,3,4,7,8,9-HpCDF</td> <td data-bbox="1039 1254 1196 1286">0.01</td> <td colspan="2" data-bbox="1196 1350 1684 1390"></td> </tr> <tr> <td data-bbox="712 1286 1196 1318">OCDF</td> <td data-bbox="1039 1286 1196 1318">0.0003</td> <td colspan="2" data-bbox="1196 1390 1684 1430"></td> </tr> </tbody> </table> <p data-bbox="501 1310 1877 1366">Abbreviations used: “T” = tetra; “Pe” = penta; “Hx” = hexa; “Hp” = hepta; “O” = octa; “CDD” = chlorodibenzodioxin; “CDF” = chlorodibenzofuran; “CB” = chlorobiphenyl.”</p>	Congener	TEF value	Congener	TEF value	<b>Dibenzo-p-dioxins (“PCDDs”)</b>		<b>“Dioxin-like” PCBs Non-ortho PCBs + Mono-ortho PCBs</b>		2,3,7,8-TCDD	1	<b>Non-ortho PCBs</b>		1,2,3,7,8-PeCDD	1	PCB 77	0.0001	1,2,3,4,7,8-HxCDD	0.1	PCB 81	0.0003	1,2,3,6,7,8-HxCDD	0.1	PCB 126	0.1	1,2,3,7,8,9-HxCDD	0.1	PCB 169	0.03	1,2,3,4,6,7,8-HpCDD	0.01	<b>Mono-ortho PCBs</b>		OCDD	0.0003	PCB 105	0.00003	<b>Dibenzofurans (“PCDFs”)</b>		PCB 114	0.00003	2,3,7,8-TCDF	0.1	PCB 118	0.00003	1,2,3,7,8-PeCDF	0.03	PCB 123	0.00003	2,3,4,7,8-PeCDF	0.3	PCB 156	0.00003	1,2,3,4,7,8-HxCDF	0.1	PCB 157	0.00003	1,2,3,6,7,8-HxCDF	0.1	PCB 167	0.00003	1,2,3,7,8,9-HxCDF	0.1	PCB 189	0.00003	2,3,4,6,7,8-HxCDF	0.1			1,2,3,4,6,7,8-HpCDF	0.01			1,2,3,4,7,8,9-HpCDF	0.01			OCDF	0.0003

## Maximum levels for certain contaminants in food

<b>1</b>	<b>Mycotoxins</b>				
<b>1.1</b>	<b>Aflatoxins</b>	<b>Maximum levels (µg/kg)</b>			<b>Remarks</b>
		<b>B1</b>	<b>Sum of B1, B2, G1 and G2</b>	<b>M1</b>	
					For the sum of aflatoxins lower bound concentrations are calculated on the assumption that all the values below the limit of quantification are zero.
1.1.1	Dried fruit to be subjected to sorting, or other physical treatment, before human consumption or use as an ingredient in foodstuffs	5,0	10	-	Except products listed in 1.1.3
1.1.2	Dried fruit and processed products thereof, intended for direct human consumption or use as an ingredient in foodstuffs	2,0	4,0	-	Except products listed in 1.1.3
1.1.3	Dried figs	6,0	10	-	
1.1.4	Groundnuts (peanuts) and other oilseeds, to be subjected to sorting, or other physical treatment, before human consumption or use as an ingredient in foodstuffs	8,0	15	-	Except groundnuts (peanuts) and other oilseeds for crushing for refined vegetable oil production
1.1.5	Groundnuts (peanuts) and other oilseeds and processed products thereof, intended for direct human consumption or use as an ingredient in foodstuffs	2,0	4,0	-	Except crude vegetable oils destined for refining. Except refined vegetable oils
1.1.6	Tree nuts to be subjected to sorting, or other physical treatment, before human consumption or use as an ingredient in foodstuffs	5,0	10	-	Except products listed in 1.1.8 and 1.1.10
1.1.7	Tree nuts and processed products thereof, intended for direct human consumption or use as an ingredient in foodstuffs	2,0	4,0	-	Except those listed in 1.1.9 and 1.1.11. In case derived/processed products thereof are derived/processed solely or almost solely from the tree nuts concerned, the maximum levels as established for the corresponding tree nuts apply also to the derived/processed products. In other cases, Article 2(1) and 2(2) apply for the derived/processed products.
1.1.8	Almonds, pistachios and apricot kernels to be subjected to sorting, or other physical treatment, before human consumption or use as an ingredient in foodstuffs	12	15	-	
1.1.9	Almonds, pistachios and apricot kernels, intended for direct human consumption or use as an ingredient in foodstuffs	8,0	10	-	In case derived/processed products thereof are derived/processed solely or almost solely from the tree nuts concerned, the maximum levels as established for the corresponding tree nuts apply also to the derived/processed products. In other cases, Article 2(1) and 2(2) apply for the derived/processed products.

1.1.10	Hazelnuts and Brazil nuts, to be subjected to sorting, or other physical treatment, before human consumption or use as an ingredient in foodstuffs	8,0	15	-	
1.1.11	Hazelnuts and Brazil nuts, intended for direct human consumption or use as an ingredient in foodstuffs	5,0	10	-	In case derived/processed products thereof are derived/processed solely or almost solely from the tree nuts concerned, the maximum levels as established for the corresponding tree nuts apply also to the derived/processed products. In other cases, Article 2(1) and 2(2) apply for the derived/processed products.
1.1.12	Cereals and all products derived from cereals	2,0	4,0	-	Including processed cereal products, except products listed in 1.1.13, 1.1.17 and 1.1.18
1.1.13	Maize and rice to be subjected to sorting or other physical treatment before human consumption or use as an ingredient in foodstuffs	5,0	10	-	
1.1.14	Following spices or mixtures thereof: Capsicum (dried fruits of <i>Capsicum</i> spp. whole or ground, including chillies, chilli powder, cayenne and paprika), pepper (fruits of <i>Piper</i> spp, including white and black pepper), nutmeg ( <i>Myristica fragrans</i> ), ginger ( <i>Zingiber officinale</i> ) and turmeric ( <i>Curcuma longa</i> ).	5,0	10	-	
1.1.15	Raw milk, heat-treated milk and milk for the manufacture of milk-based products	-	-	0,050	
1.1.16	Infant formula and follow-on formula	-	-	0,025	The maximum level applies to the products ready to consume (marketed as such or after reconstitution as instructed by the manufacturer).
1.1.17	Processed cereal-based foods and baby food for infants and young children	0,10	-	-	The maximum level applies to the dry matter. The dry matter is determined in accordance with Regulation (EC) No 401/2006.
1.1.18	Foods for special medical purposes intended specifically for infants and young children	0,10	-	0,025	The maximum level applies in the case of milk and milk products, to the products ready for use (marketed as such or reconstituted as instructed by the manufacturer) and in the case of products other than milk and milk products, to the dry matter. The dry matter is determined in accordance with Regulation (EC) No 401/2006.
<b>1.2</b>	<b>Ochratoxin A</b>	<b>Maximum levels (µg/kg)</b>			<b>Remarks</b>
1.2.1	Dried vine fruit (currants, raisins and sultanas)	10,0			
1.2.2	Unprocessed cereals	5,0			
1.2.3	All products derived from unprocessed cereals, including processed cereal products and cereals intended for direct human consumption	3,0			Except products listed in 1.2.4, 1.2.12 and 1.2.13
1.2.4	Wheat gluten not sold directly to the consumer	8,0			

1.2.5	Roasted coffee beans and ground roasted coffee	5,0			Except products listed in 1.2.6
1.2.6	Soluble coffee (instant coffee)	10			
1.2.7	Spices, including dried spices				
1.2.7.1	Pepper (fruits of <i>Piper</i> spp, including white and black pepper), nutmeg ( <i>Myristica fragrans</i> ), Ginger ( <i>Zingiber officinale</i> ) and turmeric ( <i>Curcuma longa</i> )	15			
1.2.7.2	Capsicum (dried fruits of <i>Capsicum</i> spp. whole or ground, including chillies, chilli powder, cayenne and paprika),	20			
1.2.7.3	Mixtures of spices containing one of the abovementioned spices	15			
1.2.8	Liquorice ( <i>Glycyrrhiza glabra</i> , <i>Glycyrrhiza inflata</i> and other species)				
1.2.8.1	Liquorice root, ingredient for herbal infusion	20			
1.2.8.2	Liquorice extract, for use in food in particular beverages and confectionary	80			The maximum level applies to the pure and undiluted extract, obtained whereby 1 kg of extract is obtained from 3 to 4 kg liquorice root.
1.2.9	Wine (including sparkling wine, excluding liqueur wine), cider, perry and fruit wine	2,0			The maximum level applies to products produced from the 2005 harvest onwards
1.2.10	Aromatized wine, aromatized wine-based drinks and aromatized wine-product cocktails	2,0			The maximum level applies to products produced from the 2005 harvest onwards. The maximum level applicable to these beverages is function of the proportion of wine and/or grape must present in the finished product.
1.2.11	Grape juice, concentrated grape juice as reconstituted, grape nectar, grape must and concentrated grape must as reconstituted, intended for direct human consumption	2,0			The maximum level applies to products produced from the 2005 harvest onwards
1.2.12	Processed cereal-based foods and baby foods for infants and young children	0,50			The maximum level applies to the dry matter. The dry matter is determined in accordance with Regulation (EC) No 401/2006.
1.2.13	Foods for special medical purposes intended specifically for infants and young children	0,50			The maximum level applies in the case of milk and milk products, to the products ready for use (marketed as such or reconstituted as instructed by the manufacturer) and in the case of products other than milk and milk products, to the dry matter. The dry matter is determined in accordance with Regulation (EC) No 401/2006.
<b>1.3</b>	<b>Patulin</b>	<b>Maximum levels (µg/kg)</b>			<b>Remarks</b>
1.3.1	Fruit juices, concentrated fruit juices as reconstituted and fruit nectars	50			
1.3.2	Spirit drinks, cider and other fermented drinks derived from apples or containing apple juice	50			

1.3.3	Solid apple products intended for direct consumption	25			Including apple compote and apple puree. Except products listed in 1.3.4 and 1.3.5
1.3.4	Apple juice and solid apple products for infants and young children and labelled and sold as such	10			Including apple compote and apple puree. The maximum level applies to the products ready to consume (marketed as such or after reconstitution as instructed by the manufacturer).
1.3.5	Baby foods other than processed cereal-based foods for infants and young children	10			The maximum level applies to the products ready to use (marketed as such or after reconstitution as instructed by the manufacturer).
<b>1.4</b>	<b>Deoxynivalenol</b>	<b>Maximum levels (µg/kg)</b>			<b>Remarks</b>
1.4.1	Unprocessed cereals	1 250			Except rice and products listed in 1.4.2 and 1.4.3. The maximum level applies to unprocessed cereals placed on the market for first-stage processing.
1.4.2	Unprocessed durum wheat and oats	1 750			The maximum level applies to unprocessed cereals placed on the market for first-stage processing.
1.4.3	Unprocessed maize	1 750			Except unprocessed maize intended to be processed by wet milling. The maximum level applies to unprocessed cereals placed on the market for first-stage processing. The exemption applies only for maize for which it is evident e.g. through labelling, destination, that it is intended for use in a wet milling process only (starch production).
1.4.4	Cereals intended for direct human consumption, cereal flour, bran and germ as end product marketed for direct human consumption	750			Except rice, rice products and products listed in 1.4.7, 1.4.8 and 1.4.9
1.4.5	Pasta (dry)	750			Pasta (dry) means pasta with a water content of approximately 12 %
1.4.6	Bread, pastries, biscuits, cereal snacks and breakfast cereals	500			Including small bakery wares, except rice products
1.4.7	Milling products of maize with particle size > 500 micron not intended for direct human consumption	750			The percentage, measured by weight, passing through a woven metal wire cloth sieve with the aperture of 500 µm is less than 90%
1.4.8	Milling products of maize with particle size < 500 micron not intended for direct human consumption	1 250			The percentage, measured by weight, passing through a woven metal wire cloth sieve with the aperture of 500 µm is not less than 90%
1.4.9	Processed cereal-based foods and baby foods for infants and young children	200			Except rice products. The maximum level applies to the dry matter. The dry matter is determined in accordance with Regulation (EC) No 401/2006.
<b>1.5</b>	<b>Zearalenone</b>	<b>Maximum levels (µg/kg)</b>			<b>Remarks</b>

1.5.1	Unprocessed cereals	100			Except rice and products listed in 1.5.2. The maximum level applies to unprocessed cereals placed on the market for first-stage processing.
1.5.2	Unprocessed maize	350			Except unprocessed maize intended to be processed by wet milling. The maximum level applies to unprocessed cereals placed on the market for first-stage processing. The exemption applies only for maize for which it is evident e.g. through labelling, destination, that it is intended for use in a wet milling process only (starch production).
1.5.3	Cereals intended for direct human consumption, cereal flour, bran and germ as end product marketed for direct human consumption	75			Except rice, rice products and products listed in 1.5.4, 1.5.7, 1.5.8 and 1.5.9
1.5.4	Maize intended for direct human consumption,	100			
1.5.5	Bread, pastries, biscuits, cereal snacks and breakfast cereals	50			Including small bakery wares, except rice products and products listed in 1.5.6
1.5.6	Maize- based snacks and maize-based breakfast cereals	100			
1.5.7	Milling products of maize with particle size > 500 micron not intended for direct human consumption	200			The percentage, measured by weight, passing through a woven metal wire cloth sieve with the aperture of 500 µm is less than 90%
1.5.8	Milling products of maize with particle size < 500 micron not intended for direct human consumption	300			The percentage, measured by weight, passing through a woven metal wire cloth sieve with the aperture of 500 µm is not less than 90%
1.5.9	Processed cereal-based foods and baby foods for infants and young children	20			Except rice products. The maximum level applies to the dry matter. The dry matter is determined in accordance with Regulation (EC) No 401/2006.
1.5.10	Refined maize oil	400			
<b>1.6</b>	<b>Fumonisin</b>	<b>Maximum levels (µg/kg)</b>			<b>Remarks</b>
		<b>Sum of B1 and B2</b>			Lower bound concentrations are calculated on the assumption that all the values below the limit of quantification are zero.
1.6.1	Unprocessed maize	4 000			Except unprocessed maize intended to be processed by wet milling. The maximum level applies to unprocessed cereals placed on the market for first-stage processing. The exception applies only for maize for which it is evident e.g. through labelling, destination, that it is intended for use in a wet milling process only (starch production).
1.6.2	Maize intended for direct human consumption, maize-based foods for direct human consumption	1 000			Except products listed in 1.6.3 and 1.6.6
1.6.3	Maize-based breakfast cereals and maize-based snacks	800			

1.6.4	Milling products of maize with particle size > 500 micron not intended for direct human consumption	1 400			The percentage, measured by weight, passing through a woven metal wire cloth sieve with the aperture of 500 µm is less than 90%
1.6.5	Milling products of maize with particle size < 500 micron not intended for direct human consumption	2 000			The percentage, measured by weight, passing through a woven metal wire cloth sieve with the aperture of 500 µm is not less than 90%
1.6.6	Processed maize-based foods and baby foods for infants and young children	200			The maximum level applies to the dry matter. The dry matter is determined in accordance with Regulation (EC) No 401/2006.
<b>1.7</b>	<b>Citrinin</b>	<b>Maximum levels (µg/kg)</b>			<b>Remarks</b>
1.7.1	Food supplements based on rice fermented with red yeast <i>Monascus purpureus</i>	2 000			The maximum level is to be reviewed by <i>to be confirmed: 31 December 2017</i> in the light of information on exposure to citrinin from other foodstuffs and updated information on the toxicity of citrinin in particular as regards carcinogenicity and genotoxicity. The maximum level applies to the food supplements as sold.
<b>1.8</b>	<b>Ergot sclerotia and ergot alkaloids</b>	-			
<b>1.8.1</b>	<b>Ergot sclerotia</b>	<b>Maximum levels (g/kg)</b>			<b>Remarks</b>
1.8.1.1	Unprocessed cereals	0.50			Except maize and rice. The maximum level applies to unprocessed cereals placed on the market for first-stage processing. The sampling shall be performed in accordance with point B of Annex I to Commission Regulation (EC) 401/2006 (OJ L 70, 9.3.2006, p. 12). The analysis shall be performed by microscopic examination.
<b>1.8.2</b>	<b>Ergot alkaloids</b>	<b>Maximum levels</b>			<b>Remarks</b>
					Sum of 12 ergot alkaloids: ergocristine/ergocristinine; ergotamine/ergotaminine; ergocryptine/ergocryptinine; ergometrine/ergometrinine; ergosine/ergosinine; ergocornine/ergocorninine.
1.8.2.1	Unprocessed cereals	-			Except maize and rice. The maximum level applies to unprocessed cereals placed on the market for first-stage processing. Appropriate and achievable maximum levels, providing a high level of human health protection, shall be considered for these relevant food categories before 1 July 2017.

1.8.2.2	Cereal milling products	-			Except milling products from maize and rice. Appropriate and achievable maximum levels, providing a high level of human health protection, shall be considered for these relevant food categories before 1 July 2017.
1.8.2.3	Bread (including small bakery wares), pastries, biscuits, cereal snacks, breakfast cereals and pasta	-			Appropriate and achievable maximum levels, providing a high level of human health protection, shall be considered for these relevant food categories before 1 July 2017.
1.8.2.4	Processed cereal-based foods and baby foods for infants and young children	-			Appropriate and achievable maximum levels, providing a high level of human health protection, shall be considered for these relevant food categories before 1 July 2017.

<b>2</b>	<b>Inherent plant toxins and other plant related compounds</b>				
<b>2.1</b>	<b>Erucic acid</b>	<b>Maximum levels (g/kg)</b>			<b>Remarks</b>
					The maximum level applies to the level of erucic acid, calculated on the total level of fatty acids in the fat component in food
2.1.1	Vegetable oils and fats	50			
2.1.2	Foods containing added vegetable oils and fats	50			Except products listed in 2.1.3
2.1.3	Infant formula and follow-on formula	10			
<b>2.2</b>	<b>Tropane alkaloids</b>	<b>Maximum level (µg/kg)</b>			<b>Remarks</b>
		<b>Atropine</b>	<b>Scopolamine</b>		Atropine is the racemic mixture of (-)-hyoscyamine and (+)-hyoscyamine of which only the (-)-hyoscyamine enantiomer exhibits anticholinergic activity. As for analytical reasons it is not always possible to distinguish between the enantiomers of hyoscyamine, the maximum level is established for atropine and not for (-)-hyoscyamine.
2.2.1	Processed cereal-based foods and baby foods for infants and young children, containing millet, sorghum, buckwheat or their derived products	1,0	1,0		The maximum level applies to the product as sold.
<b>2.3</b>	<b>Nitrate</b>	<b>Maximum levels (mg NO<sub>3</sub>/kg)</b>			

2.3.1	Fresh spinach ( <i>Spinacia oleracea</i> )	3 500		The maximum level does not apply for fresh spinach to be subjected to processing and which is directly transported in bulk from field to processing plant.
2.3.2	Preserved, deep-frozen or frozen spinach	2 000		
2.3.3	Fresh Lettuce ( <i>Lactuca sativa</i> L.)			Except products listed in 2.3.4
2.3.3.1	Lettuce grown under cover, harvested 1 October to 31 March	5 000		
2.3.3.2	Lettuce grown in the open air, harvested 1 October to 31 March	4 000		
2.3.3.3	Lettuce grown under cover, harvested 1 April to 30 September	4 000		
2.3.3.4	Lettuce grown in the open air, harvested 1 April to 30 September	3 000		
2.3.4	'Iceberg' type lettuce			
2.3.4.1	Lettuce grown under cover	2 500		
2.3.4.2	Lettuce grown in the open air	2 000		
2.3.5	Rucola ( <i>Eruca sativa</i> , <i>Diplotaxis</i> sp., <i>Brassica tenuifolia</i> , <i>Sisymbrium tenuifolium</i> )			
2.3.5.1	Harvested 1 October to 31 March	7 000		
2.3.5.2	Harvested 1 April to 30 September	6 000		
2.3.6	Processed cereal-based foods and baby foods for infants and young children	200		The maximum level applies to the products ready to consume (marketed as such or after reconstitution as instructed by the manufacturer).

<b>3</b>	<b>Environmental contaminants</b>				
3.1	<b>Lead</b>	<b>Maximum levels (mg/kg wet weight)</b>			<b>Remarks</b>
3.1.1	Vegetables	0,10			Except products listed in 3.1.2 and 3.1.3. For potatoes the maximum level applies to peeled potatoes.
3.1.2	Leafy brassica, salsify, leaf vegetables and cultivated mushrooms	0,30			
3.1.3	Fruiting vegetables				

3.1.3.1	Sweetcorn	0,10			
3.1.3.2	Other than sweetcorn	0,050			
3.1.4	Fruit				
3.1.4.1	Cranberries, currants, elderberries and strawberry tree	0,20			
3.1.4.2	Fruits other than cranberries, currants, elderberries and strawberry tree	0,10			
3.1.5	Cereals and pulses	0,20			
3.1.6	Meat of bovine animals, sheep, pig and poultry	0,10			Except products listed in 3.1.7
3.1.7	Offal of bovine animals, sheep, pig and poultry	0,50			
3.1.8	Muscle meat of fish	0,30			
3.1.9	Cephalopods	1,0			The maximum level applies to the animal as sold without viscera.
3.1.10	Crustaceans	0,50			
3.1.11	Bivalve molluscs	1,50			
3.1.12	Raw milk, heat-treated milk and milk for the manufacture of milk-based products	0,020			
3.1.13	Honey	0,10			
3.1.14	Fats and oils, including milk fat	0,10			
3.1.15	Fruit juices, reconstituted fruit juices from concentrate, and fruit nectars				
3.1.15.1	exclusively from berries and other small fruits	0,050			
3.1.15.2	from fruits other than berries and other small fruits	0,030			
3.1.16	Wine (including sparkling wine, excluding liqueur wine), cider, perry and fruit wine				
3.1.16.1	products produced from the 2001 fruit harvest to 2015 fruit harvest	0,20			
3.1.16.2	products produced from the 2016 fruit harvest onwards	0,15			
3.1.17	Aromatized wine, aromatized wine-based drinks and aromatized wine-product cocktails				The maximum level applicable to these beverages is function of the proportion of wine and/or grape must present in the finished product.
3.1.17.1	products produced from the 2001 fruit harvest to 2015 fruit harvest	0,20			
3.1.17.2	products produced from the 2016 fruit harvest onwards	0,15			
3.1.18	Drinks for infants and young children labelled and sold as such				Except products listed in 3.1.19, 3.1.20 and 3.1.21
3.1.18.1	Marketed as liquids or to be reconstituted following instructions of the manufacturer	0,030			Including fruit juices. The maximum level applies to the products ready to use (marketed as such or after reconstitution as instructed by the manufacturer).
3.1.18.2	To be prepared by steeping, brewing, infusion or decoction	1,50			The maximum level applies to the product as sold.

3.1.19	Infant formula and follow-on formula				
3.1.19.1	Marketed as powder	0,050			The maximum level applies to the product as sold.
3.1.19.2	Marketed as liquid	0,010			The maximum level applies to the product as sold.
3.1.20	Processed cereal-based foods and baby foods for infants and young children	0,050			The maximum level applies to the product as sold.
3.1.21	Foods for special medical purposes intended specifically for infants and young children				
3.1.21.1	Marketed as powder	0,050			The maximum level applies to the product as sold.
3.1.21.2	Marketed as liquid	0,010			The maximum level applies to the product as sold.
3.1.22	Food supplements	3,0			The maximum level applies to the food supplements as sold.
<b>3.2</b>	<b>Cadmium</b>	<b>Maximum levels (mg/kg wet weight)</b>			<b>Remarks</b>
3.2.1	Vegetables and fruit	0,050			Except products listed in 3.2.2 and 3.2.3, 3.2.4
3.2.2	Root, tuber and stem vegetables				For potatoes the maximum level applies to peeled potatoes
3.2.2.1	Celeriac, parsnips, salsify, horseradish and celery	0,20			
3.2.2.2	Other than celeriac, parsnips, salsify, horseradish and celery	0,10			
3.2.3	Leaf vegetables, fresh herbs, leafy brassica	0,20			
3.2.4	Fungi				
3.2.4.1	Common mushroom ( <i>Agaricus bisporus</i> ), oyster mushroom ( <i>Pleurotus ostreatus</i> ) and shiitake mushroom ( <i>Lentinula edodes</i> )	0,20			
3.2.4.2	Other than common mushroom ( <i>Agaricus bisporus</i> ), oyster mushroom ( <i>Pleurotus ostreatus</i> ) and shiitake mushroom ( <i>Lentinula edodes</i> )	1,0			
3.2.5	Cereal grains	0,10			Except products listed in 3.2.6
3.2.6	Wheat and rice grains, wheat bran and wheat germ for direct consumption, and soy beans	0,20			
3.2.7	Meat of bovine animals, sheep, pig and poultry	0,050			Except offal
3.2.8	Horsemeat	0,20			Except offal
3.2.9	Liver of bovine animals, sheep, pig, poultry and horse	0,50			
3.2.10	Kidney of bovine animals, sheep, pig, poultry and horse	1,0			
3.2.11	Muscle meat of fish	0,050			Except species listed in 3.2.12, 3.2.13 and 3.2.14
3.2.12	Muscle meat of mackerel ( <i>Scomber</i> species), tuna ( <i>Thunnus</i> species, <i>Katsuwonus pelamis</i> , <i>Euthynnus</i> species) and bichique ( <i>Sicyopterus lagocephalus</i> )	0,10			
3.2.13	Muscle meat of bullet tuna ( <i>Auxis species</i> )	0,15			

3.2.14	Muscle meat of anchovy ( <i>Engraulis species</i> ), swordfish ( <i>Xiphias gladius</i> ) and sardine ( <i>Sardina pilchardus</i> )	0,25			
3.2.15	Crustaceans	0,50			
3.2.16	Bivalve molluscs	1,0			
3.2.17	Cephalopods	1,0			The maximum level applies to the animal as sold without viscera.
3.2.18	Specific cocoa and chocolate products as listed below				
3.2.18.1	Milk chocolate with < 30 % total dry cocoa solids,	0,10			As from 1 January 2019
3.2.18.2	Chocolate with < 50 % total dry cocoa solids; milk chocolate with > 30 % total dry cocoa solids,	0,30			As from 1 January 2019
3.2.18.3	Chocolate with > 50 % total dry cocoa solids,	0,80			As from 1 January 2019
3.2.18.4	Cocoa powder sold to the final consumer or as an ingredient in sweetened cocoa powder sold to the final consumer (drinking chocolate)	0,60			As from 1 January 2019
3.2.19	Infant formula and follow-on formula				The maximum level applies to the product as sold.
3.2.19.1	Powdered formulae manufactured from cows' milk proteins or protein hydrolysates,	0,010			
3.2.19.2	Liquid formulae manufactured from cows' milk proteins or protein hydrolysates,	0,005			
3.2.19.3	Powdered formulae manufactured from soya protein isolates, alone or in a mixture with cows' milk proteins,	0,020			
3.2.19.4	Liquid formulae manufactured from soya protein isolates, alone or in a mixture with cows' milk proteins	0,010			
3.2.20	Processed cereal-based foods and baby foods for infants and young children	0,040			The maximum level applies to the product as sold.
3.2.21	Food supplements	1,0			Except products listed in 3.2.22. The maximum level applies to the food supplements as sold.
3.2.22	Food supplements consisting exclusively or mainly of dried seaweed, products derived from seaweed, or of dried bivalve molluscs	3,0			The maximum level applies to the food supplements as sold.
<b>3.3</b>	<b>Mercury</b>	<b>Maximum levels (mg/kg wet weight)</b>			<b>Remarks</b>
3.3.1	Fishery products and muscle meat of fish	0,50			Except species listed in 3.3.2.

3.3.2	Muscle meat of anglerfish ( <i>Lophius</i> species), Atlantic catfish ( <i>Anarhichas lupus</i> ), bonito ( <i>Sarda sarda</i> ), eel ( <i>Anguilla</i> species), emperor, orange roughy or rosy soldierfish ( <i>Hoplostethus</i> species), grenadier ( <i>Coryphaenoides rupestris</i> ), halibut ( <i>Hippoglossus hippoglossus</i> ), kingklip ( <i>Genypterus capensis</i> ), marlin ( <i>Makaira</i> species), megrim ( <i>Lepidorhombus</i> species), mullet ( <i>Mullus</i> species), pink cusk eel ( <i>Genypterus blacodes</i> ), pike ( <i>Esox lucius</i> ), plain bonito ( <i>Orcynopsis unicolor</i> ), poor cod ( <i>Tricopterus minutes</i> ), Portuguese dogfish ( <i>Centroscymnus coelolepis</i> ), rays ( <i>Raja</i> species), redfish ( <i>Sebastes marinus</i> , <i>S. mentella</i> , <i>S. viviparus</i> ), sail fish ( <i>Istiophorus platypterus</i> ), scabbard fish ( <i>Lepidopus caudatus</i> , <i>Aphanopus carbo</i> ), seabream or pandora ( <i>Pagellus</i> species), shark (all species), snake mackerel or butterfish ( <i>Lepidocybium flavobrunneum</i> , <i>Ruvettus pretiosus</i> , <i>Gempylus serpens</i> ), sturgeon ( <i>Acipenser</i> species), swordfish ( <i>Xiphias gladius</i> ), tuna ( <i>Thunnus</i> species, <i>Euthynnus</i> species, <i>Katsuwonus pelamis</i> )	1,0			
3.3.3	Food supplements	0,10			The maximum level applies to the food supplements as sold.
<b>3.4</b>	<b>Arsenic (inorganic)</b>	<b>Maximum levels (mg/kg wet weight)</b>			<b>Remarks</b>
					Sum of As(III) and As(V)
3.4.1	Non-parboiled milled rice	0,20			Polished or white rice
3.4.2	Parboiled rice and husked rice	0,25			
3.4.3	Rice waffles, rice wafers, rice crackers and rice cakes	0,30			
3.4.4	Rice destined for the production of food for infants and young children	0,10			
<b>3.5</b>	<b>Dioxins and PCBs</b>	<b>Maximum levels</b>			<b>Remarks</b>

		<b>Sum of dioxins (pg WHO-TEQ/g)</b>	<b>Sum of dioxins and dioxin-like PCBS (pg WHO-TEQ/g)</b>	<b>Sum of non dioxin-like PCBs (ng/g)</b>	See definition of WHO-TEQ. Sum of non dioxin-like PCBs is of PCB28, PCB52, PCB 101, PCB138, PCB153 and PCB 180 (ICES - 6). Upperbound concentrations are calculated on the assumption that all the values of the different congeners below the limit of quantification are equal to the limit of quantification. Maximum levels expressed on fat are not applicable for foods containing < 2 % fat. For foods containing less than 2 % fat, the maximum level applicable is the level on product basis corresponding to the level on product basis for the food containing 2 % fat, calculated from the maximum level established on fat basis, making use of following formula: Maximum level expressed on product basis for foods containing less than 2 % fat = maximum level expressed on fat for that food x 0,02.
3.5.1	Meat and meat products of the following animals:				
3.5.2	Bovine animals and sheep	2,50 pg/g fat	4,0 pg/g fat	40 ng/g fat	Except products listed in 3.5.5
3.5.3	Poultry	1,75 pg/g fat	3,0 pg/g fat	40 ng/g fat	Except products listed in 3.5.5
3.5.4	Pigs	1,0 pg/g fat	1,25 pg/g fat	40 ng/g fat	Except products listed in 3.5.5
3.5.5	Liver of terrestrial animals and derived products thereof				
3.5.5.1	Of sheep	1,25 pg/g wet weight	2,0 pg/g wet weight	3,0 ng/g wet weight	
3.5.5.2	Of bovine animals, poultry and pigs	0,30 pg/g wet weight	0,50 pg/g wet weight	3,0 ng/g wet weight	
3.5.6	Fat of the following animals:				
3.5.6.1	Bovine animals and sheep	2,50 pg/g fat	4,0 pg/g fat	40 ng/g fat	
3.5.6.2	Poultry	1,75 pg/g fat	3,0 pg/g fat	40 ng/g fat	
3.5.6.3	Pigs	1,0 pg/g fat	1,25 pg/g fat	40 ng/g fat	
3.5.7	Mixed animal fats	1,50 pg/g fat	2,50 pg/g fat	40 ng/g fat	
3.5.8	Muscle meat of fish and fishery products and products thereof	3,50 pg/g wet weight	6,50 pg/g wet weight	75 ng/g wet weight	Except products listed in 3.5.9, 3.5.10, 3.5.11, 3.5.12 and 3.5.13.

3.5.9	Muscle meat of wild caught fresh water fish and products thereof	3,50 pg/g wet weight	6,50 pg/g wet weight	125 ng/g wet weight	Except diadromous fish species caught in fresh water
3.5.10	Muscle meat of wild caught spiny dogfish ( <i>Squalus acanthias</i> ) and products thereof	3,50 pg/g wet weight	6,50 pg/g wet weight	200 ng/g wet weight	
3.5.11	Muscle meat of wild caught eel ( <i>Anguilla anguilla</i> ) and products thereof	3,50 pg/g wet weight	10 pg/g wet weight	300 ng/g wet weight	
3.5.12	Fish liver and derived products thereof	-	20 pg/g wet weight	200 ng/g wet weight	Except products listed in 3.5.13. In the case of canned fish liver, the maximum level applies to the whole edible content of the can.
3.5.13	Marine oils (fish body oil, fish liver oil and oils of other marine organisms intended for human consumption)	1,75 pg/g fat	6,0 pg/g fat	200 ng/g fat	
3.5.14	Raw milk and dairy products	2,50 pg/g fat	5,50 pg/g fat	40 ng/g fat	Including butter fat
3.5.15	Hen eggs and egg products	2,50 pg/g fat	5,0 pg/g fat	40 ng/g fat	
3.5.16	Vegetable oils and fats	0,75 pg/g fat	1,25 pg/g fat	40 ng/g fat	
3.5.17	Foods for infants and young children	0,10 pg/g wet weight	0,20 pg/g wet weight	1,0 ng/g wet weight	The maximum level applies to the products ready to consume (marketed as such or after reconstitution as instructed by the manufacturer).

<b>4</b>	<b>Processing contaminants</b>				
<b>4.1</b>	<b>Polycyclic aromatic hydrocarbons</b>	<b>Maximum levels (µg/kg)</b>			<b>Remarks</b>
		<b>Benzo(a) pyrene</b>	<b>Sum of benzo(a)pyrene, benz(a)anthracene, benzo(b)fluoranthene and chrysene</b>		Lower bound concentrations are calculated on the assumption that all the values of the four substances below the limit of quantification are zero.
4.1.1	Cocoa beans and derived products				Including cocoa butter
4.1.1.1	Cocoa fibre and products derived from cocoa fibre, intended for use as an ingredient in food	3,0	15		

4.1.1.2	Other than cocoa fibre and products derived from cocoa fibre	5,0 µg/kg fat	30 µg/kg fat	
4.1.2	Dried herbs	10	50	
4.1.3	Dried spices	10	50	Except cardamom and smoked <i>Capsicum</i> spp.
4.1.4	Smoked meat and smoked meat products	2,0	12	
4.1.5	Muscle meat of smoked fish and smoked fishery products	2,0	12	Except products listed in 4.1.6 and 4.1.7.
4.1.6	Smoked sprats and canned smoked sprats <i>sprattus sprattus</i> ; Smoked Baltic herring ≤ 14 cm length and canned smoked Baltic herring ≤ 14 cm length ( <i>Clupea harengus membras</i> ); Katsuobushi (smoke-dried skipjack tuna, <i>Katsuwonus pelamis</i> ); bivalve molluscs (fresh, chilled or frozen) ; heat treated meat and heat treated meat products sold to the final consumer	5,0	30	Meat and meat products that have undergone a heat treatment potentially resulting in formation of PAH, i.e. only grilling and barbecuing. For the canned product the analysis shall be carried out on the whole content of the can.
4.1.7	Smoked bivalve molluscs	6,0	35	
4.1.8	Banana chips	2,0	20	
4.1.9	Oils and fats intended for direct human consumption or use as an ingredient in food	2,0	10	Except products listed in 4.1.1 and 4.1.10
4.1.10	Coconut oil intended for direct human consumption or use as an ingredient in food	2,0	20	
4.1.11	Infant formula and follow-on formula	1,0	1,0	The maximum level applies to the product as sold.
4.1.12	Processed cereal-based foods and baby foods for infants and young children	1,0	1,0	The maximum level applies to the product as sold.
4.1.13	Foods for special medical purposes intended specifically for infants	1,0	1,0	The maximum level applies to the product as sold.
4.1.14	Food supplements containing botanicals and their preparations. Food supplements containing propolis, royal jelly, spirulina or their preparations.	10	50	The maximum level applies to the food supplements as sold. Botanical preparations are preparations obtained from botanicals (e.g. whole, plant parts, fragmented or cut plants) by various processes (e.g. pressing, squeezing, extraction, fractionation, distillation, concentration, drying up and fermentation). This definition includes comminuted or powdered plants, plant parts, algae, fungi, lichen, tinctures, extracts, essential oils (other than the vegetable oils referred to in point 4.1.9), expressed juices and processed exudates. The maximum level does not apply to food supplements containing vegetable oils. Vegetable oils used as an ingredient in food supplements should comply with the maximum level established in point 4.1.9.
<b>4.2</b>	<b>3-monochloropropane-1,2-diol (3-MCPD)</b>	<b>Maximum levels (µg/kg)</b>		<b>Remarks</b>

4.2.1	Hydrolysed vegetable protein	20		The maximum level is given for the liquid product containing 40 % dry matter, corresponding to a maximum level of 50 µg/kg in the dry matter. The level needs to be adjusted proportionally according to the dry matter content of the products.
4.2.2	Soy sauce	20		The maximum level is given for the liquid product containing 40 % dry matter, corresponding to a maximum level of 50 µg/kg in the dry matter. The level needs to be adjusted proportionally according to the dry matter content of the products.

<b>5</b>	<b>Other</b>			
<b>5.1</b>	<b>Melamine</b>	<b>Maximum levels (mg/kg)</b>	<b>Remarks</b>	
5.1.1	Food	2,50		Except products listed in 5.1.2. The maximum level does not apply to food for which it can be proven that the level of melamine higher than 2,5 mg/kg is the consequence of authorized use of cyromazine as insecticide. The melamine level shall not exceed the level of cyromazine.
5.1.2	Infant formula and follow-on formula			
5.1.2.1	Marketed as powder	1,0		
5.1.2.2	Marketed as liquid	0,15		
<b>5.2</b>	<b>Tin (inorganic)</b>	<b>Maximum levels (mg/kg)</b>	<b>Remarks</b>	
5.2.1	Canned foods	200		Except products listed in 5.2.2, 5.2.3, 5.2.4 and 5.2.5. The maximum level applies to the product as consumed.
5.2.2	Canned beverages	100		Including fruit juices and vegetable juices
5.2.3	Canned infant formula and follow-on formula	50		Except dried and powdered products. The maximum level applies to the product as sold.
5.2.4	Canned processed cereal-based foods and baby foods for infants and young children	50		Except dried and powdered products. The maximum level applies to the product as sold.
5.2.5	Canned foods for special medical purposes intended specifically for infants and young children	50		Except dried and powdered products. The maximum level applies to the product as sold.
