

BSc Zoology For students entering Part 1 in 2006	UCAS code: C300
---	------------------------

Awarding Institution: University of Reading
Teaching Institution: University of Reading
Relevant QAA subject benchmarking group(s): Biosciences
Programme length: 3 years

Faculty of Life Sciences

Date of specification: July 2006
Programme Director: Dr P E Hatcher
Programme Adviser: Professor B Okamura
Board of Studies: BioEnvironmental Sciences
Accreditation: None

Summary of programme aims

To enable the student to gain a broad understanding of the main areas of zoology and an in-depth understanding of selected areas. These aims are achieved by the study of a range of animals and of the interactions between them. Animals are considered from the structural, physiological, ecological, behavioural, taxonomic, developmental and evolutionary viewpoints, and are also studied as self-supporting systems.

Transferable skills

The University's Strategy for Teaching and Learning has identified a number of generic transferable skills which all students are expected to have developed by the end of their degree programme. In following this programme, students will have had the opportunity to enhance their skills relating to career management, communication (both written and oral), information handling, numeracy, problem-solving, team working in the laboratory and in the field, and use of information technology. Students will also gain experience in the methodology of research and scholarship.

Programme content

The profile which follows states which modules must be taken (the compulsory part), together with recommended modules (Part 1 only), and optional modules thought to be most appropriate for zoologists. Students must choose modules offered by SBS or other University of Reading Schools and Departments, subject to the agreement of the Programme Adviser, to a total of 120 credits in each Part.

Part 1 (three terms)

Compulsory modules

		<i>Credits</i>	<i>Level</i>
BI1C10	<i>Cell biology and biochemistry</i>	10	C
BI1C11	<i>Genetics and molecular biology</i>	10	C
BI1M10	<i>Biodiversity</i>	10	C

Strongly recommended modules

AM1Z10	<i>The whole mammal</i>	10	C
BI1Z10	<i>Ecology</i>	10	C

BI1Z11	<i>Community ecology</i>	10	C
<i>Students without AS or A2 level chemistry or equivalent must take:</i>			
CH1FC1	<i>Fundamental conceptual chemistry 1</i>	10	C

Optional modules

Students will choose further modules up to a total of 120 credits subject to the agreement of the Programme Adviser. Modules from other Departments or Schools (including the Institution Wide Language Programme) may be chosen subject to the agreement of the Programme Adviser. Details of available modules can be found on the University website at www.info.rdg.ac.uk/Module/.

Part 2 (three terms)

Compulsory modules

		<i>Credits</i>	<i>Level</i>
AM2C31	<i>Molecular biology and bioinformatics</i>	10	I
BI2Z31	<i>Micro-evolution</i>	10	I
AM2C40	<i>Recombinant DNA exercise</i>	10	I
BI2B31	<i>Macro-evolution</i>	10	I
AM2Z32	<i>Vertebrate zoology</i>	10	I
AM2Z34	<i>Invertebrate zoology</i>	10	I
AM2Z38	<i>Field course</i>	10	I
AS2A1	<i>Statistics for life sciences</i>	10	I

Optional modules

Students will choose further modules up to a total of 120 credits. Modules within SBS considered most suitable for zoologists are listed below. Modules from other Departments or Schools (including the Institution Wide Language Programme) may be chosen subject to the agreement of the Programme Adviser. Details of available modules can be found on the University website at www.info.rdg.ac.uk/Module/.

		<i>Credits</i>	<i>Level</i>
AM2C32	<i>Endocrinology</i>	10	I
AM2Z33	<i>Animal behaviour</i>	10	I
AM2Z41	<i>Applied ecology</i>	10	I
AM2Z37	<i>Aquatic biology</i>	10	I

Part 3 (three terms)

Compulsory modules

AM3S75	<i>Project</i>	40	H
AM3Z79	<i>Animal diversity</i>	10	H

Optional modules

Students will choose further modules up to a total of 120 credits. Modules within AMS considered most suitable for zoologists are listed below. Modules from other Departments or Schools may be chosen subject to the agreement of the Programme Adviser. Details of available modules can be found on the University website at www.info.rdg.ac.uk/Module/.

AM3Z72	<i>Insects and society</i>	10	H
AM3Z74	<i>Conservation biology</i>	10	H
AM3Z75	<i>Evolutionary genetics and phylogeny</i>	10	H
AM3Z76	<i>Behavioural ecology and life history theory</i>	10	H
AM3Z77	<i>Research topics in ecology</i>	10	H
AM3Z80	<i>Marine field course</i>	10	H

Progression requirements

Progression from Part 1 to Part 2

To gain a threshold performance at Part 1 a student shall normally be required to achieve an overall average of 40% over 120 credits taken in Part 1, and a mark of at least 30% in individual modules amounting to not less than 100 credits. In order to progress from Part 1 to Part 2, a student shall normally be required to achieve a threshold performance at Part 1.

Progression from Part 2 to Part 3

To gain a threshold performance at Part 2 a student shall normally be required to achieve an overall average of 40% over 120 credits taken in Part 2, and a mark of at least 30% in individual modules amounting to not less than 100 credits. In order to progress from Part 2 to Part 3, a student shall normally be required to achieve a threshold performance at Part 2.

Summary of teaching and assessment

Teaching is organised in modules that typically involve both lectures and practical classes and student-led seminars. The assessments are carried out within the University's degree classification scheme, details of which are in the programme handbooks. The pass mark in each module is 40%.

Part 2 contributes one third of the overall assessment and Part 3 the remaining two thirds. In order to be eligible for Honours, students must gain an overall weighted average of 40% and must gain at least 40% in the Project module.

Admission requirements

Entrants to this programme are normally required to have obtained:

UCAS Tariff : *Points/grades 300/BBB from no more than 4 subjects at A-level. Subjects and levels of qualification : Biology Grade B and one other A-level Science (preferably Chemistry) at grade C. The University supports Key Skills and will take account of points awarded for Key Skills although they are not part of the entry requirements. Entrants will also require Grade B at GCSE in Maths, Science and English.*

Irish Highers : *BBBBB (including Biology and preferably Chemistry)*

International Baccalaureat : *32 points (including Biology and preferably Chemistry)*

Mature students and those with other qualifications are encouraged to apply

Admissions Tutor: Dr Mark Fellowes

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, the Careers Advisory Service, the University's Special Needs Advisor, Study Advisors, Hall Wardens and the Students' Union.

The Programme Adviser is available to offer advice on the choice of modules within the degree course.

Career prospects

After graduation, students will be qualified to undertake a zoological career in a range of areas, or to use skills and problem-solving abilities in careers not directly related to zoology. Honours graduates will be eligible for membership of the Institute of Biology and Chartered Biologist status.

Opportunities for study abroad

Students of Zoology can take part in the Erasmus exchange programme in which they can spend the first term of Part 3 studying in a variety of other European Universities. Recent exchanges involving SBS students have taken place with the following: University of Tours, France; Odense University, Denmark; Uppsala University, Sweden; University College Cork, Ireland; University of Zaragoza, Spain; ENSA, Montpellier, France; University of Cagliari, Sardinia; Rostock University, Germany; Siena University, Italy.

Educational aims of the programme

After Part 1, students will have developed an understanding of the basic concepts of modern biology. After Part 2, students will have deepened their understanding of biological concepts and developed a range of expertise over the main areas of the subject. After Part 3, selected subjects will have been studied in depth and students will be equipped to tackle detailed problem-solving and analytical tasks.

During these studies students will be exposed to a variety of information sources and techniques and be trained in various skills including those used in reasoning, argument and communication. Several transferable skills will be acquired including the ability to design and execute experiments in the laboratory and in the field (including working in a team), access information, interpret data using statistics and computing, write essays and reports and give oral presentations.

Programme Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills, qualities and other attributes in the following areas:

Knowledge and Understanding

<p>A. Knowledge and understanding of:</p> <ol style="list-style-type: none">1. the fundamental concepts of biology and their application to zoological systems.2. the main taxa of animals.3. the study of different aspects of zoology as applied to a variety of taxa (systems approach).4. statistics as applied to biological data.5. a selection of more specialised optional topics.	<p>A. Teaching/learning methods and strategies</p> <p>Formal lectures and practicals supported by tutorials (Part 1), group work and miniprojects.</p> <p>Both laboratory and field work/ecology exercises (including residential field courses), the latter dealing with ecosystems found both in SE England, elsewhere in the UK/Europe, and possibly further afield.</p> <p><i>Assessment</i></p> <p>Most knowledge is tested through a combination of coursework and unseen formal examinations. Dissertations, oral and poster presentations also contribute.</p>
---	---

Skills and other attributes

<p>B. Intellectual skills – able to:</p> <ol style="list-style-type: none">1. think logically.2. analyse and solve qualitative and quantitative problems.3. organise tasks in structured form.4. transfer appropriate knowledge and methods from one topic to another (both previously experienced and novel) within the overall subject area.5. plan and conduct an independent project and then to write a report.	<p>B. Teaching/learning methods and strategies</p> <p>Rational thought and logical analysis are embedded throughout the program, where solutions to key problems in biology have come about through the application of zoological experiments. Research project in Part 3.</p> <p><i>Assessment</i></p> <p>Embedded throughout the assessment protocols.</p>
---	---

C. Practical skills – able to:

1. carry out practical work with minimal risk, both to self and to others).
2. undertake laboratory tasks and techniques.
3. undertake fieldwork tasks and techniques.
4. plan experiments and carry them out.
5. analyse data using appropriate statistical methods, including by computer (e.g. MINITAB)

C. Teaching/learning methods and strategies

Formal practical classes, both in the laboratory and the field. Miniprojects during field courses. The design, conduct and completion of a research project. Statistical analysis of data is incorporated into appropriate practical classes and is also required for projects.

Assessment

By practical laboratory and fieldwork reports and by project reports.

D. Transferable skills – able to:

1. use IT.
2. communicate scientific ideas by a variety of methods and to a variety of target audiences.
3. give oral and poster presentations.
4. work as part of a team.
5. use library resources both paper and electronic.
6. manage time.
7. plan a career.

D. Teaching/learning methods and strategies

The use of IT and other skills is a major element of some modules. The use of all skills is embedded throughout the course. The research project is likely to require application of all skills. The Concepts & Skills module in part 2 is specifically related to career development.

Assessment

The skills will enhance to performance of students both in coursework and unseen examinations, including in integrating papers.

Please note - This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in the module description and in the programme handbook. The University reserves the right to modify this specification in unforeseen circumstances, or where the process of academic development and feedback from students, quality assurance processes or external sources, such as professional bodies, requires a change to be made. In such circumstances, a revised specification will be issued.
