

**MSc Environment and Development
For students entering in 2007**

Awarding Institution:	The University of Reading
Teaching Institution:	The University of Reading Faculty of Life Sciences
Programme length:	6 month Postgraduate Certificate, 9 month PG Diploma, 12 month MSc
Date of specification:	May 2007
Programme Director (Acting):	Dr Gavin Hilson
Board of Studies:	Graduate Institute of International Development and Applied Economics
Accreditation:	
Web site:	www.reading.ac.uk/giidae

Summary of programme aims

The aim of the programme in Environment and Development is to equip graduates with the understanding, skills and confidence to become competent professionals, capable of working across a wide range of contexts concerning the development of environmental interventions.

Specifically the programme aims to:

- Develop an analytically rigorous but broadly based understanding of the inter-relationships between environments and development at the global, national and local levels.
- Develop a critical awareness of the nature of interactions between people and environments and how economic issues can create both environmental problems and provide solutions.
- Provide an introduction to the essentials of environmental management and policy

This programme is designed for participants from either industrialised or developing countries who wish to make a career in, or who are already involved in, environmental policy formulation and its planning and implementation, whether in government, NGOs, international organisations, scientific organisations, academia or the press. It aims to graft appropriate social-science skills on to the common core of applied science knowledge commonly represented in programmes of this type, and thus to offer a more complete and a more practical training than is typically offered by other environmental masters degrees. The compulsory modules are inter-disciplinary and provide integration between the different disciplinary viewpoints. Each of the main disciplines relevant to the resolution of environmental problems is covered by one or more options.

Transferable skills

The programme requires a substantial amount of independent reading, research and study and students are expected to take personal responsibility and show initiative in developing their knowledge and understanding of the field of study. In following this programme students will also have the opportunity to enhance and develop their skills relating to communication (oral and written), presentations, information handling, problem solving, teamwork, and the use of

information technology. Students will learn to work independently, under time pressures, set priorities and manage their time in order to meet strict deadlines. Career planning, via choice of modules, will be an integral part of the programme.

Programme content

Postgraduate Certificate (60 credits):

Students take 60 credits from Core and Specialist modules (IDM011, IDM002, APMA50, IDM001, APME58)

Postgraduate Diploma (120 credits):

Students take 60 credits from Core and Specialist Modules (IDM011, IDM002, APMA50, IDM001, APME58) and 60 credits from taught Optional Modules

MSc in Environment and Development (180 credits):

Students take 60 credits from Core and Specialist modules (IDM011, IDM002, APMA50, IDM001, APME58), 60 credits from Optional Modules and 60 credits from the dissertation (IDM030)

Module code	Module Title	Credits	Level
Core Modules			
IDM002	Environment and Development Tutorials	10	M
IDM001	Perspectives on Development	20	M
IDM030	Dissertation	60	M
Specialist Modules			
IDM011	Environmental Problems and Policies	10	M
APMA50	Approaches to Sustainable Development	10	M
APME58	Resource and Environmental Economics	10	M
Optional Modules (students select 60 credits)*			
REMP09	Rural Policy and Planning	10	M
APME61	Appraisal of Agricultural and Rural Development Projects	10	M
APMA89	Water, Agriculture and Irrigation	10	M
MTMA40	Vegetation, Agriculture and the Atmosphere	10	M
IDM067	Research Methods for Development and Communication	10	M

PSMA1A	Tropical Environments	10	M
IDM068	Extractive Industries, The Environment and Developing Societies	10	M
APMA41	Agriculture in the Tropics	10	M
IDM021	Poverty, Inequality and Livelihoods	10	M
IDM046	Governance, Accountability and Development	10	M
APMA51	Rethinking Agricultural Development	10	M
APMA90	Climate Change and Food Systems	10	M

*** the modules listed above are a sample of the modules available – students may select widely from the modules in the module guide.**

Part-time and Modular arrangements

All students have the modular flexibility described in the ‘Programme content’ section above. Part-time students may build up their modular credits towards a Certificate, Diploma or MSc over an extended period.

Summary of Teaching and Assessment

Teaching is organised in modules that typically involve a combination of lectures and seminars. Some lecture based modules are supported by workshops or computer lab sessions. Modules are assessed by a combination of course work and/or formal examination. Examinations will normally take place at the beginning of the Summer Term.

The University’s taught postgraduate marks classification is as follows:

<u>Mark</u>	<u>Interpretation</u>
70 – 100%	Distinction
60 – 69%	Merit
50 – 59%	Good standard (Pass)

Failing categories:

40 – 49%	Work below threshold standard
0 – 39%	Unsatisfactory Work

For Masters Degrees

To pass the MSc students must normally gain an average mark of 50 or more overall including a mark of 50 or more for the dissertation *and have no mark below 40 in Specialist and Core modules*. In addition the total credit value of all modules marked below 40 must not exceed 30 credits and for all modules marked below 50 must be less than 60 credits.

Students who gain an average mark of 70 or more overall including a mark of at least 60 in the dissertation and have no mark below 40 will be eligible for a Distinction. Those gaining an average mark of 60 or more overall including a mark of at least 50 in the dissertation and have no mark below 40 will be eligible for a Merit.

For PG Diplomas

To pass the Postgraduate Diploma students must normally gain an average mark of 50 or more *and have no mark below 40 in Specialist and Core modules*. In addition the total credit value of all modules marked below 40 must not exceed 30 credits and for all modules marked below 50 must be less than 60 credits.

Students who gain an average mark of 70 or more and have no mark below 40 will be eligible for the award of a Distinction. Those gaining an average mark of 60 or more and have no mark below 40 will be eligible for a Merit.

For PG Certificate

To pass the Postgraduate Certificate students must normally gain an average mark of 50 or more. In addition the total credit value of all modules marked below 40 must not exceed 10 credits.

Summary of teaching and assessment

Teaching is organised in modules. The delivery of materials takes a variety of forms including lectures, classes, seminars and group exercises.

Assessment is modular and involves coursework and for some modules unseen examinations.

The nature of the assessment is determined by the aims of the module.

Prior to selection of dissertation topics students take part in organised, small group presentations and informal discussions led by relevant members of staff. A dissertation supervisor is appointed for each student.

Admission requirements

Entrants to this programme should have a good first degree, or equivalent, in a relevant subject.

In exceptional circumstances, where an applicant does not hold a degree or its equivalent, consideration will be given to the applicant's professional experience and evidence of a high level of academic performance at the Further Education level.

Some prior training in economics would be an advantage for the module in environmental economics but is not a prerequisite. Where necessary students will be given appropriate preparatory/ background reading and guidance in this subject area.

Admissions Tutor: The Programme Director is responsible for admissions.

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Programme Directors, the Careers Advisory Service, the University's Special Needs Advisor, Study Advisors, Hall Wardens and the Students' Union.

A Study Skills module is available to support learning throughout the taught component of the programme and to develop independent learning skills required for successful completion of the Dissertation

Career prospects

Students who have followed this programme have found successful employment in the UK, Europe and in the developing world in a wide variety of environmental and development settings; these have included bi- and multi-lateral aid agencies, Non-Governmental Organisations (NGOs) and in governmental organisations – especially at local and regional levels. Within these organisations graduates of the MSc in Environment and Development are engaged in a wide range of tasks which include:

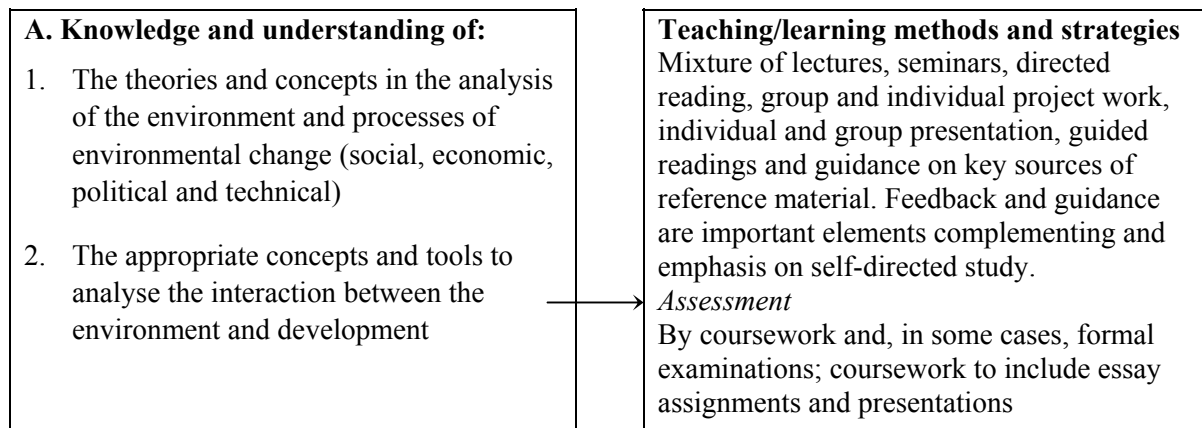

- Forest conservation management projects
- Waste management policy formulation
- Environmental protection and refugee management
- Rare bird and wetland conservation
- Water catchment management

Opportunities for study abroad or for placements

With the agreement of the supervisor, students may be allowed to study abroad or take up placements during the Summer Term as part of their dissertation work.

Programme Outcomes

Knowledge and Understanding

Skills and other attributes

<p>B. Intellectual skills – able to:</p> <ol style="list-style-type: none"> 1. Structure, analyse and evaluate theoretical and conceptual issues and the bases for their relevance in the environment 2. Think logically and analytically and to understand the difference between positive and normative statements relating to environmental issues 3. Identify key environmental approaches and evaluate them with reference to practice and outcome. 4. Comprehend the rapidly evolving discourse of the environment and development and the factors influencing both the change and the pace of change. 	<p>Teaching/learning methods and strategies</p> <p>Students are frequently challenged in all teaching situations to complete logical arguments, analyse problems, seek and evaluate alternative explanations, and justify held beliefs. Long essay, debate, group work and presentations provide the principal vehicles by which intellectual skills are developed.</p> <p><i>Assessment</i> By formative tests and presentations. Other assignments, including coursework and, in some cases, formal examinations; dissertation</p>
<p>C. Practical skills – able to:</p> <ol style="list-style-type: none"> 1. Evaluate the bases of alternative environmental policy approaches 2. Evaluate the bases of the multiple meanings of key concepts in the discourse of the environment and development 3. Evaluate the appropriateness and effectiveness of alternative environmental strategies. 4. Effectively apply a range of frameworks useful in the planning, implementation, monitoring and evaluation of environmental interventions and processes. 5. Identify, access, evaluate, synthesise, analyse, collate and represent data relevant to the critical evaluation of environmental issues in a developing or developed economy context. 	<p>Teaching/learning methods and strategies</p> <p>Students are required to undertake and understand a wide range of reading, from traditional published sources, web-based material and other grey literature relating to environmental policy and practice. This includes both directed reading and through researching their own sources of information. Discussion in lectures and seminars emphasises the use of empirical evidence, and the strengths and weaknesses of alternative theories, methodologies and practices.</p> <p>1-5 are achieved through lectures, seminars, presentations, case studies, group work, and dissertation</p> <p><i>Assessment</i> Long essays, presentations and unseen examinations</p>

<p>D. Transferable skills – able to:</p> <ol style="list-style-type: none">1. Communicate knowledge and opinions effectively to a wide range of people through choosing and using among a variety of means2. Reflect and evaluate his/her own academic progress and its implications for emerging/changing professional practice3. Identify, access, evaluate, synthesise, analyse, collate and represent data relevant to the issue at hand.4. Manage time and prioritise workloads in the context of changing demands	<p>Teaching/learning methods and strategies</p> <p>The presentation of well-researched written work is a fundamental element of the programme and requires the application of all the skills listed in 1-5. This is complemented and reinforced by enhanced oral skills, developed through lecture and seminar discussions, tutorials and group activities.</p> <p><i>Assessment</i></p> <p>By formative tests and presentations. Other assignments, including coursework and, in some cases, formal examinations; dissertation</p>
---	--

Please note - This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in the module description and in the programme handbook. The University reserves the right to modify this specification in unforeseen circumstances, or where the process of academic development and feedback from students, quality assurance processes or external sources, such as professional bodies, requires a change to be made. In such circumstances, a revised specification will be issued.
