Summary of programme aims

The programme aims to provide a thorough degree level education in Ancient History. The syllabus aims to familiarise students with the core chronological and geographical range of Greek and Roman cultures, whilst providing them with the opportunity to study more thematic topics in depth. The programme also provides for the development of the specific historical interests of students through independent study and specifically the dissertation. Students are encouraged to include elements of ancient languages throughout their degree programme. Students will expand the range, depth and sophistication of their knowledge of Ancient History through the structured progression of Parts 1, 2, and 3 of the programme.

Transferable skills

The University's Strategy for Teaching and Learning has identified a number of generic transferable skills which all students are expected to have developed by the end of their degree programme. In following this programme, students will have had the opportunity to enhance their skills relating to career management, communication (both written and oral), information handling, problem-solving, team working and use of information technology.

Programme content

Part 1 introduces students to the study of Greek and Roman Civilisations, with a particular emphasis upon the development of the study of primary sources and source criticism, alongside the development of historical writing skills to explore specific historical topics. Students are encouraged to take an additional 20 credits as well in Greek Myths. Part 2 develops the student's knowledge of the chronological changes within the period of study via compulsory core modules which also develop their historical skills. In addition, students choose three option modules that are either more thematic or add greater depth than the core modules. In Part 3, there is an increasing specialisation and progression to approach topics in greater depth through the provision of optional modules and the opportunity to research a dissertation topic in depth. Students take 120 credits per year.

Not all options will necessarily be available every year. Admission to options will be at the discretion of the Programme Director.

In Parts 2 and 3, up to 20 credits can be taken from modules available elsewhere in the University.

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, the Careers Advisory Service, the University's Special Needs Advisor, Study Advisors, Hall Wardens and the Students' Union. The Department of Classics is the Curator of the Ure Museum of Greek Archaeology.

Career prospects

Graduates in Ancient History have found that their degree course has been a good basis for careers in management, administration, the civil service, commerce, law, publishing, librarianship and teaching. Graduates have also gone on to postgraduate courses within the field of the Classics at Reading and elsewhere.

Opportunities for study abroad or for placements

In Year 2, two students can study for the Fall Semester at the University of Calgary's Department of Greek and Roman Studies. Applications to take part in the exchange need to be made in the Spring term of Year 1. The Department also has an ERASMUS link with the University of Crete. Students are also encouraged to apply to the British School in Athens, where they can take a module for credit, and the British School in Rome.

Educational aims of the programme

The programme aims to provide a thorough degree level education in Ancient History. It aims to produce ancient historians who have experience of chronological, thematic and genre based approaches to the history of antiquity.
