

BSc Animal Science

UCAS code: D320

Degree Programme Specification

| | |
|--|---|
| Awarding Institution: | University of Reading |
| Teaching Institution: | University of Reading |
| Relevant QAA subject benchmarking group(s): | Biosciences; AFAFCS Faculty of Life Sciences |
| Relevance and applicability: | Part 1 Entry in October 2007 |
| Programme length: | 3 years |
| Date of specification: | January 2008 |
| Programme Director: | Dr J C Litten-Brown |
| Programme Adviser: | Prof. P G Knight |
| Board of Studies: | Agriculture, Policy and Development |

Summary of programme aims

To enable the student to:

1. Understand how animals, especially higher vertebrates, function as integrated systems at each organisational level (i.e. bimolecular, cellular, organ system, whole animal, population);
2. Gain specialised knowledge in certain areas including the nutrition, growth, lactation, reproduction, health and welfare of selected farm and companion animals;
3. Understand how the above processes may be optimised to improve animal production and the wellbeing of farm and companion animals;
4. Recognise the interdependency of fundamental and applied biology within the context of man's use of animals for production, leisure and companionship purposes.

Transferable skills

The University's Strategy for Teaching and Learning has identified a number of generic transferable skills that all students are expected to have developed by the end of their degree programme. In following this programme, students will have had the opportunity to enhance their skills relating to career management, communication (both written and oral), information handling, numeracy, problem solving, team working and use of information technology. Students will also gain experience in the methodology of research and scholarship.

Programme content

The profile that follows states which modules must be taken (the compulsory modules), together with lists of modules from which the student must make a selection (the optional modules). Students must choose such additional modules as they wish, in consultation with their programme adviser, to make 120 credits in each Part. The number of module credits for each module is shown after its title.

Part 1 (three terms) 2007/8

Compulsory modules (70 credits)

| | | Credits | Level | Term |
|---------|--|---------|-------|-------|
| AP1A18 | Digestion and Nutrition | 10 | C | 2 |
| BI1ED2 | Mammals: Diversity, Behaviour and Conservation | 10 | C | 2 |
| AP1A15 | Introduction to Animal Science | 10 | C | 1 & 2 |
| BI1BA1 | The Living Cell | 10 | C | 1 |
| BI1BC2 | Genes and Chromosomes | 10 | C | 2 |
| BI1EC1 | Exploiters and Exploited | 10 | C | 1 |
| PM1PB2A | Human Physiology | 10 | C | 1 |
| AP1SCMS | Career Management Skills | | I | 3 |

Students without AS or A2 level Chemistry or an equivalent qualification must take:

| | | | | |
|--------|-------------------------------------|----|---|---|
| CH1FC1 | Fundamental Concepts in Chemistry 1 | 10 | C | 1 |
|--------|-------------------------------------|----|---|---|

Optional modules (50 credits)

Students will choose further modules up to a total of 120 credits subject to the agreement of the Programme Advisers and to timetable constraints.

The following modules are likely to be available:

| | | | | |
|----------|---|----|---|-----------------------------|
| BI1BB2 | Biochemistry and Metabolism | 10 | C | 2 |
| AM1P11 | Introductory Microbiology | 10 | C | 1 |
| BI1BG3 | Practical Biochemistry | 10 | C | 3 (Wks 33 & 34 only) |
| *BI1BA12 | The Living Cell | 20 | C | 1&2 |
| BI1EF2 | Ecology: species and their interactions | 10 | C | 2 |
| BI1EF23 | Ecology: species and their interactions | 20 | C | 2 & 3 (Wks 33 & 34 only) |
| AP1A02 | Introduction to Agricultural and Food Systems | 10 | C | 2 |
| AP1A03 | Introduction to Livestock Production Systems | 10 | C | 1 |
| AP1EF1 | The UK Food Chain | 10 | C | 1 |
| AP1SB1 | Introduction to Management | 10 | C | 1 |
| IWLP | Language Programme | 20 | C | 1 & 2 |

*BI1BA12 The Living Cell (BI1BA1 10-credit version is compulsory, students may choose to undertake this two term 20-credit version which would account for 10-credits of optional choice)

Part 2 (three terms) 2008/9

Compulsory modules (90 credits)

| | | Credits | Level | Term |
|--------|--|---------|-------|--------------|
| BI2BK5 | Molecular Biology of Gene Expression | 10 | I | 5 |
| BI2BP6 | Practical Skills: Recombinant DNA Exercise | 10 | I | 6 |
| BI2EN5 | Animal Behaviour | 10 | I | 5 |
| AP2A24 | Applied Animal Nutrition | 10 | I | 4 |
| AP2A34 | Animal Breeding & Reproductive Technology | 10 | I | 4 |
| AP2A35 | Animal Health and Disease | 10 | I | 5 |
| AP2A43 | Small Animal Management | 10 | I | 3 |
| | | | | (Wk 41 only) |
| AS2A1 | Statistics for Life Sciences | 10 | I | 4 |
| AP2A47 | Animal Science in Practice 2 | 10 | I | 4, 5, 6 |

Optional modules (30 credits)

Students will choose further modules up to a total of 120 credits subject to the agreement of the Programme Advisers and to timetable constraints.

| | | | | |
|--------|------------------------------|----|---|-----|
| AP2A36 | Animal Production | 10 | I | 5 |
| BI2BB4 | Endocrinology* | 10 | I | 4 |
| BI2BE4 | Pharmacology and Toxicology* | 10 | I | 4 |
| BI2BN5 | Vertebrate Zoology | 10 | I | 5 |
| BI2BI5 | Immunology* | 10 | I | 5 |
| AP2A25 | Grassland Management | 10 | I | 4 |
| AP2A38 | Organic Farming | 10 | I | 4 |
| AP2SB1 | Business Management | 10 | I | 4 |
| AP2SB2 | Financial Management | 10 | I | 5 |
| IWLP | Language Programme | 20 | I | 4&5 |

(*recommended modules)

Part 3 (three terms) 2009/10

Compulsory modules (40 credits)

| | | Credits | Level | Term |
|--------|--------------|---------|-------|------|
| AP3A81 | Dissertation | 40 | H | 7&8 |

Optional modules (80 credits)

Students will choose further modules up to a total of 120 credits subject to the agreement of the Programme Advisers and to timetable constraints.

| | | | | |
|--------|---|----|---|--------------|
| BI3BE8 | Cardiovascular Disease | 10 | H | 7 |
| BI3B48 | Mammalian Reproduction | 10 | H | 8 |
| BI3BD8 | Cancer | 10 | H | 8 |
| BI3EJ8 | Conservation Biology | 10 | H | 8 |
| BI3EK3 | Behavioural Ecology & Life History Theory | 10 | H | 7 |
| AP3A67 | Animal Welfare | 10 | H | 7 |
| AP3A68 | Wildlife in the Farming Environment | 10 | H | 8 |
| AP3A75 | Equine Management | 10 | H | 6 |
| AP3A79 | Animal Food Products: Meat and Milk | 10 | H | 8 |
| AP3A83 | Practical Animal Nutrition | 10 | H | 7 |
| AP3A84 | Dogs and Cats | 10 | H | 7 |
| AP3A85 | Horses | 10 | H | 8 |
| AP3A91 | Captive Animal Management | 10 | H | 6 |
| | | | | (Wk 43 only) |
| IWLP | Language Programme | 20 | H | 7&8 |

Progression requirements

Progression from Part 1 to Part 2

To gain a threshold performance at Part 1 a student shall normally be required to achieve an overall average of 40% over 120 credits taken in Part 1, and a mark of at least 30% in individual modules amounting to not less than 100 credits. In order to progress from Part 1 to Part 2, a student shall normally be required to achieve a threshold performance at Part 1.

Progression from Part 2 to Part 3

To gain a threshold performance at Part 2 a student shall normally be required to achieve an overall average of 40% over 120 credits taken in Part 2, and a mark of at least 30% in individual modules amounting to not less than 100 credits. In order to progress from Part 2 to Part 3, a student shall normally be required to achieve a threshold performance at Part 2.

Summary of teaching and assessment

Teaching in Part 1 consists of lectures and practical classes with small group work being largely restricted to the Concepts and skills module; modules are assessed in general by a combination of coursework (20%) and formal examination (80%) which, in Part 1, is often in multiple-choice question format. Part 1 does not contribute to the final degree assessment.

In Parts 2 and 3, lectures and practical classes continue to be major modes of teaching but they are increasingly supplemented by seminars and other group work. Modules can be 100% in-course assessed but are more usually assessed by a combination of coursework and formal examination (typically 30:70% split).

For the final degree classification Part 2 contributes one third of the overall assessment and Part 3 the remaining two thirds. In order to be eligible for Honours, students must gain an overall weighted average of 40% and must gain at least 40% in the Biology Project module.

Admission requirements

Standard offer: UCAS Tariff: Points/grade 280 from no more than 4 subjects at A level. Subjects & level of qualification: Biology and one other science (Chemistry preferred); both at grade C at A level. The university supports Key Skills and will take account of points awarded for Key Skills although they are not part of the entry requirements. GCSE: Grade B required in Mathematics, English and Sciences. Irish Highers: BBCC (including Biology and Chemistry) IB: 30 points (including Biology and preferably Chemistry). Mature students and those with other qualifications are encouraged to apply.

Admissions Tutor: Dr J C Litten

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, the Careers Advisory Service, the University's Special Needs Advisor, Study Advisors, Hall Wardens and the Students' Union.

Within the two providing Schools (Biological Sciences and Agriculture, Policy and Development) a Programme Adviser is available to offer advice on the choice of modules within the degree programme.

Career prospects

Reading graduates in Animal Science find employment in the scientific research and managerial services of commercial organisations concerned with animal nutrition, breeding and health. About 20 per cent of graduates go on to higher degree courses and in recent years some 6 per cent have gained places to study veterinary science. Graduates have also gone into accountancy, management training, financial services and information technology.

Opportunities for study abroad or for placements

Students have the opportunity to take part in the Socrates exchange programme in which they can spend the first term of Part 3 studying in another European University. Recent exchanges involving AMS students have taken place with the following: University of Tours, France; Odense University, Denmark; Uppsala University, Sweden; University College Cork, Ireland; Zaragoza University, Spain; ENSA, Montpellier, France; University of Cagliari, Sardinia. Students also have the opportunity to go to Rostock University, Germany and Siena University, Italy.

Educational aims of the programme

The programme aims to provide a thorough degree-level education in Animal Science, leading to a sound knowledge base in biology as a whole, underpinning more specialised knowledge of applied aspects relating to mans use of animals for production, companionship and leisure purposes. The programme content is intended to be relevant to the needs of employers and should facilitate the professional development of the student to lay the foundations for a successful career to the benefit of the economy and society.

Programme Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills, qualities and other attributes in the following areas:

Knowledge and Understanding

| | |
|--|---|
| <p>A. Knowledge and understanding of:</p> <ol style="list-style-type: none">1. The fundamental principles and concepts of animal biology with special reference to higher vertebrates.2. The integrated biochemical and physiological processes that enable animals to function3. The principles of animal agriculture4. Applied aspects of animal biology concerned with mans use of animals for production, companionship and leisure purposes | <p>Teaching/learning methods and strategies Acquisition of knowledge is achieved mainly through lectures but supported by laboratory practicals, computer-simulated practicals and directed student-centred learning. Student-centred learning is used where appropriate resource material is available and its role in student learning generally increases as the course progresses. As well as compulsory core modules the study programme includes a wide range of optional modules to allow students to tailor the course to their own particular interests. This flexibility is greatest in Part 3.</p> <p><i>Assessment</i> Most modules, apart from practical modules, essays and project work are assessed by a combination formal examination and coursework. The nature of the coursework varies from module to module and is specified in each module outline.</p> |
|--|---|

Skills and other attributes

| | |
|---|---|
| <p>B. Intellectual skills – able to:</p> <ol style="list-style-type: none">1. think logically2. Integrate theory and practice.3. Synthesise information/data from a variety of sources4. analyse and solve problems5. organise tasks into a structured form6. plan, conduct and write a report on an independent project. | <p>Teaching/learning methods and strategies Acquisition of intellectual skills is encouraged throughout the programme through formal lectures, practical project work, tutorial seminar work, coursework assignments, computer-assisted learning resources and both directed and non-directed reading.</p> <p><i>Assessment</i> Intellectual skills are partly assessed through formal examinations but assessment of coursework and practical project work is an important component for assessment of the higher order skills. A variety of assessment methods are used including formal reports and project dissertations, essays, oral and poster presentations and project formative and summative assessments.</p> |
|---|---|

C. Practical skills – able to:

1. Carry out laboratory and/or field practical/project work effectively and safely.
2. Interpret experimental observations made in laboratory and/or field
3. Apply and critically evaluate the applications/ limitations of selected research methods and bioanalytical techniques

Teaching/learning methods and strategies

In parts 1 and 2 attention is focused on the acquisition of basic skills and safe working practices through prescribed exercises. in part 3 more advanced techniques and non-prescribed exercises are frequently undertaken during project work.

Assessment

A variety of assessment methods are used to assess practical skills. These include laboratory day-book inspections, oral/poster presentations, formal reports, formative and summative project assessments, project dissertations

D. Transferable skills – able to:

1. use IT effectively (word-processing, spreadsheet, statistical analysis and presentation software, e-mail, www)
2. communicate scientific ideas orally and in writing
3. demonstrate adequate numerical and problem solving skills appropriate to a degree-level biologist
4. work as part of a team
5. work independently
6. use library resources (including on-line)
7. manage time effectively
8. plan their career

Teaching/learning methods and strategies

The use of IT is embedded throughout the programme including specific introductory material in part 1.

Assessment

In general these skills are not formally assessed as individual elements but they will enhance the performance of students in both coursework (reports, dissertations, poster presentations, essays) and unseen examinations.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably expect to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in module and programme handbooks.
