Summary of programme aims

The programme as a whole seeks to develop students' intellectual potential, enabling them to embark on a wide range of careers or progress to postgraduate study, while also promoting a lifelong interest in learning. Its multi-disciplinary approach aims to produce graduates who are competent communicators in German, who are well-informed about German culture, history and current affairs, and who have acquired skills that will be of use to them outside the confines of the discipline. aims to provide a framework for examining changing categories of art, architecture and visual artefacts in different places and times. It will develop advanced skills in analysing visual culture and embed the examination of its production and reception within diverse cultural and social contexts. It will foster a critical understanding of the relationship between contemporary conceptions of art, architecture, visual artefacts and culture, and those held elsewhere in other periods, promoting a conception of history of art as a dynamic discipline encompassing divergent, sometimes conflicting, approaches and views. All this will be achieved through structured progression from Parts 1 to 3.

Transferable skills

The University's Strategy for Teaching and Learning has identified a number of generic transferable skills which students are expected to have developed by the end of their degree programme. In following this programme, students will have had the opportunity to enhance their skills relating to communication (both written and oral), information handling, problem-solving, team working, information technology (word-processing and use of web-based material), career management.

Students of German will develop their abilities to deal with intellectual problems effectively by locating information, assessing it critically, communicating independent points of view logically and clearly (both orally and in writing), and substantiating opinions with evidence; the year abroad provides particularly good opportunities for developing increased (inter-) cultural awareness and self-reliance.

Students of History of Art will learn to think historically, comparatively and cross-culturally, and will be skilled at visual analysis, learning how to describe evidence from visual sources in oral and written forms. Students utilise the powerful tools of research, analysis, and presentation associated with information technology in several ways, such as in the location and retrieval of bibliographic and source material, the production and presentation of student work and, where appropriate, the use of more sophisticated databases and exploitation of the

internet. Through practical and field work they will also have the opportunity to develop proficiency in decision-making, and a sense of personal and group responsibility.

Programme content

The profile which follows lists modules which must be taken ('compulsory') and those modules from which students must make a selection ('optional modules'). Each part, and also the Year Abroad, comprises 120 credits. In Part 1 the remaining credits can be made up from any optional modules in this programme and/or from modules elsewhere in the University.

Part 1 in German includes the study of both language (with an intensive language course for students with no German) and an introduction to aspects of modern German culture. In History of Art and Architecture, Part 1 provides different introductions to aspects of the study of history of art and architecture. A compulsory core module introduces students to art historical skills, categories and methods. Other optional modules allow students to orientate themselves in different ways in relationship to the subject - through the study and critique of a canon of western art, or in terms of art as part of the history of visual artefacts and their makers. In Part 2 students continue with the study of the German language, and take two optional modules, each involving a choice of short "mini-options" on historical, cultural and literary topics from 1750 to the present. In Part 2, in History of Art through a compulsory core module, students engage with material on the historiography of history of art and its objects of study, directly extending the work of Part 1. A compulsory module held at a study centre abroad allows works of art and architecture to be studied at first hand and as part of a specific cultural and social formation. An optional module in a selected period, approach or distinctive media provides a focus on broad aspects of visual culture. Of the 120 credits in Part 2, 5 are taken up by Career Management Skills. During the Year Abroad, the experience of living in Germany or Austria enables students to make great strides in their linguistic skills and further broaden their knowledge of German culture, and they engage in independent study for their dissertation. In Part 3 students must take one module of further German language study and are free to pursue their interests within German Studies by selecting from a range of specialised cultural options. In Part 3, history of art students select three optional modules. These modules involve more intensive and specialised study, and introduce areas of innovation and scholarship both within the discipline and in its interdisciplinary aspects.

To proceed from Part 2 to the Year Abroad students must obtain a mark of 40% or above in their compulsory German language module and in the compulsory module in History of Art. In addition they must achieve an average of 40% in all other German modules, an overall average of 40% in 120 credits at Part 2 and have no module mark under 30%, except that marks of less than 30% in a total of 20 credits may be condoned.

To proceed from the Year Abroad to Part 3, students must satisfy the examiners that they have completed an approved programme of study or employment in a German-speaking country and handed in the work and assignments required by the programme.

Summary of teaching and assessment

German language modules are taught in small groups; other German modules typically involve a mixture of lectures and small-group seminars. Most modules are assessed by a mixture of coursework and formal examination; the Year Abroad module *Scheine* will be assessed on the basis of certificates gained at the German or Austrian university, and the Oral/Aural module will be examined at the beginning of Part 3.

In History of Art teaching at Part 1 is by lectures and seminars; assessment is by a mixture of coursework and timed examination. At Parts 2 and 3, teaching is principally by seminar; assessment is by a mixture of coursework and timed examination. The dissertation is supervised in a series of tutorials with an individual supervisor and is assessed only as coursework.

The conventions for assessment and classification are included in the Programme Handbooks, but it should be noted that Part 2 modules and Year Abroad I-level modules will count for 33% of final assessment, and Year abroad H-level modules and Part 3 modules will count for 67% of final assessment.

Admissions requirements

Either 300 pts from 3 subjects (including at least two full A-levels), plus GCSE German,
Or 320 pts from 4 subjects (including at least two full A-levels), plus GCSE German,
Except that students admitted with no knowledge of German must normally have an A-level or equivalent in a European foreign language.

Applications from mature students and international students are welcomed; all such applicants are judged on their individual merits. Advice on the acceptability of your qualifications may be sought, where necessary, from the departmental Admissions Tutors, who may be contacted via german@reading.ac.uk

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme.

Student guidance and welfare support is provided by Personal Tutors, School Senior Tutors, the Students' Union, the Medical Practice and the Student Services Centre. The Student Services Centre is housed in the Carrington Building and includes the Careers Advisory Service, the Disability Advisory Service, Accommodation Advisory Team, Student Financial Support, Counselling and Study Advisors. Student Services has a Helpdesk available for enquiries made in person or online (www.risisweb.reading.ac.uk), or by calling the central enquiry number on (0118) 378 5555. Students can get key information and guidance from the team of Helpdesk Advisers, or make an appointment with a specialist adviser; Student Services also offer drop-in sessions on everything from accommodation to finance. The

Carrington Building is open between 8:30 and 17:30 Monday to Thursday (17:00 Friday and during vacation periods). Further information can be found in the Student Diary (given to students at enrolment) or on the Student website (www.reading.ac.uk/student).

In addition the Department of German Studies has a programme adviser for each part of the programme, and the departmental Course Handbooks issued to Part 1 and to degree course students provide extensive information on the programme, and on resources and study skills. The German Seminar Library contains a range of reference works which can be used by students and offers a congenial study space. During Part 2 a series of discussions, talks and academic courses is provided to prepare students for the Year Abroad.

The History of Art and Architecture Departmental programme Handbooks issued to Part 1 and to degree course students provide extensive information on resources and study skills. Each student is assigned a Course Adviser, normally their academic tutor, to advise on their choice of modules within the programme. additional support is provided through a subject-specific reading room containing essential course texts, reference works, some current periodicals and photocopying facilities. There is also a slide library containing slides from all periods of art and architecture history which students will consult as part of their studies. It includes resources in video tapes and computers and in digital imaging and elearning such as BlackBoard. First hand study of works of art is provided through particular classes taught in museums, art galleries or on architectural visits and by a period of study at a centre abroad as well as through the department's own collections, mainly of drawings. Each student is assigned a Course Adviser, normally their personal tutor, to advise on their choice of modules within the programme. Support for students in their studies is provided through the University's Personal Academic Record (PAR) Scheme, in which students meet their personal tutors regularly to review their progress.

Career prospects

Students graduating in German work in many different fields. A degree involving a language, like degrees in other arts subjects, can lead to careers in such areas as administration, management or marketing, computing, or be a prelude to study in law or accountancy; and increasing numbers of students find positions in the business world, including the travel industry, where their knowledge of German can be an important asset. Some graduates also use their linguistic skills in teaching, including teaching English as a Foreign Language abroad; others proceed to post-graduate courses in various areas, including translating.

A number of specialised careers are open to History of Art graduates, such as jobs in Museums, auction houses, and increasingly the heritage and leisure industries. Their visual skills also make them attractive to the advertising industry. In addition the skills which History of Art graduates acquire, such as analytical abilities, problem solving, research skills, independence and adaptability, mean they are sought after for jobs in a wide range of fields, including publishing, teaching, social work, accountancy, personnel, banking and commerce, retailing, marketing, IT, civil service and local government. A number of students go on to post-graduate study in History of Art, both at MA and PhD level, both at Reading and elsewhere.

Opportunities for study abroad

Subject to arrangements made in exceptional cases only, all students on this programme spend a year abroad either at a German or Austrian university with which the University of Reading has an

agreement under the Lifelong Learning Programme (LLP) and Erasmus University Charter, or as an assistant teacher, or on a work placement. Full details of potential destinations can be found on the Erasmus & Study Abroad website.

Students in the Department of History of Art have the opportunity to spend a period of study abroad, during Part 2, as part of the Socrates scheme.

Educational aims of the programme

The programme aims to equip students with:

- a competence which comes as near as possible to that of an educated German person in the reception and production of standard (non-technical) spoken and written German;
- a sound body of knowledge within the field of German Studies that is suited to their interests;
- subject-specific knowledge in History of Art and a critical understanding of the visual art, artistic and architectural practices, and aesthetic traditions of Western society, including a critical understanding of the relationship between contemporary conceptions of art and architecture and those of the past
- ability to relate the production and reception of works of art and other material culture to specific aspects of the culture and society in which they were produced
- familiarity with the theories and methods of the various disciplines covered in both subject areas, and the ability to develop their own expertise and develop and present their arguments in these areas, using the visual and analytical skills that are fundamental to both disciplines.

Programme Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills, qualities and other attributes in the following areas:

Feedback is initially through tutorials, seminars and through formative assessed work. Specialist knowledge and deeper understanding is fostered in the guided selection of options at Part 2, where the teaching is increasingly seminar- and discussion-based. In later parts of the programme, and beginning at Part 2, students will take increasing responsibility for their own learning, fostered through the guided selection of increasingly specialised options and independent study, including a dissertation.</p> <p><i>Assessment</i></p> <p>Most knowledge is tested through a combination of coursework and unseen formal examinations.
