BSc Land Management (leading to Dip/MSc Urban Planning and Development) For students entering Part 1 in 2007

Awarding Institution: Teaching Institution: Relevant QAA subject benchmarking group(s):

Faculty of Economic and Social Sciences Date of specification: 1st August 2007 Programme Director: Alan Rowley Board of Studies: Real Estate and Planning Accreditation: Royal Institution of Chartered Surveyors Royal Town Planning Institute (four year programme)

Summary of programme aims

The BSc Land Management with a Diploma or MSc in Urban Planning and Development is a four year, full-time programme leading to the award of a BSc in Land Management after three years of study, and a Diploma or MSc in Urban Planning and Development after an additional nine or twelve months of study respectively. This '3+1' programme is best seen as a prescribed pathway through the BSc in Land Management (including the Development & Planning package in Part 3) followed by the Diploma or MSc programme. Only students completing this designated pathway through the BSc programme and awarded the BSc with Honours are eligible to register for the Diploma/MSc programme. This specification relates to the BSc part of the '3+1' programme.

The BSc programme is a blend of academic rigour and applied practical analysis. For students on the '3+1' programme, the BSc in Land Management programme is part of a concentrated and integrated education programme which seeks to combine the environmental, social and political awareness of planners with the market sense and commercial awareness of land managers.

The BSc programme aims to provide students with the knowledge and skills necessary for successful careers as chartered surveyors or related professionals and to engage confidently with market and development processes; to emphasise the value of inter-disciplinary working; to provide students with a structured but flexible learning framework; and to ensure that the skill areas covered by the programme are applicable to a range of occupational and professional needs.

Transferable skills

The University's Strategy for Teaching and Learning has identified a number of generic transferable skills which all students are expected to have developed by the end of their degree programme. In following this programme, students will have had the opportunity to enhance their skills relating to career management, communication (both written and oral), information handling, numeracy, problem-solving, team working and use of information technology.

The Land Management programme is designed to ensure that students progressively develop these transferable skills throughout their studies, in parallel, and integrated, with acquiring more specialist knowledge, understanding and skills.

Programme content

The BSc degree programme is divided into three parts. Part 1 covers the fundamental principles of the relevant core subjects including economics, law, planning, investment appraisal, management and finance, and building. Part 2 builds on these modules with greater emphasis on their application to the property industry. By the end of the Part 2 students not registered for the '3+1' programme have covered the required core material which can then be developed and expanded depending on the student's area of

PROGRAMME SPECIFICATION: BSc Land Management (leading to Dip/MSc Urban Planning and Development) 1st August 2007

interest: these students have considerable flexibility and choice in Part 3. However, students on the '3+1' programme are required to complete additional core modules in Part 3 of the BSc programme leaving more limited flexibility and choice.

The Degree is divided into three parts. Part 1 of the programme covers the fundamental principles of the relevant core subjects including economics, law, planning, investment appraisal, management and finance, and building. Part 2 builds on these modules with greater emphasis on their application to the property industry. By the end of Part 2 all students have covered the required core material which is developed and expanded through a package of compulsory modules at Part 3 focussing on development and planning and totalling 100 credits. In Part 3 of the programme, students have some flexibility and choice. Students must choose additional modules to make 120 credits at Part 3.

The programme is taught in parallel with the BSc in Land Management and students on the four year '3+1' programme may choose to transfer to the more flexible three year BSc Land Management programme at various stages during their studies.

The following profile lists the modules which must be taken at Parts 1 and 2 of the programme (the compulsory parts), together with the modules normally available in Part 3 of the programme from which a student must make a selection. The number of credits for each module is shown after its title.

Part 1 (th Compulsor	Credits	Level	
RE1D		20	1
EC10	8 8	20	1
LW1/	5 8	10	1
LW10		10	1

RE3RPL	Rural Policy & Land Use	20	3

Progression requirements

To proceed from Part 1 to Part 2 of the BSc Land Management degree a student must:

• achieve an overall weighted average of at least 40% across all Part 1 modules totalling 120 credits;

- obtain a mark of at least 40% in modules totalling at least 100 credits; and
- achieve a mark of not less than 35% in modules totalling not more than 20 credits.

Marks below 35% in Part 1 modules will not be condoned.

To proceed from Part 2 to Part 3 of the BSc Land Management degree a student must:

- achieve an overall weighted average of at least 40% across all Part 2 modules totalling 120 credits;
- obtain a mark of at least 40% in modules totalling at least 100 credits; and
- achieve a mark of not less than 35% in modules totalling not more than 20 credits.

Marks below 35% in Part 2 modules will not be condoned.

Summary of teaching and assessment

Teaching is organised in modules that, at both Parts 1 and 2, typically involved lectures and tutorials of up to fifteen students. These tutorial classes encourage students to examine the material covered in the lectures and discuss and debate relevant issues. Parts 1 and 2 comprise foundation studies, preparing students for specialist studies at Part 3, and modules are assessed by a mixture of coursework and formal examination. As the programme becomes more specialised, the nature of the teaching also changes. In Part 3, site visits, case studies, guest lectures and project work all play an important part in the learning process.

A wide variety of assessment methods is used throughout the programme, including unseen written examinations, essays and projects, and videos of group presentations.

Part 2 contributes 33% of the overall assessment of the degree and Part 3 comprises 67%.

To be eligible for the award of an Honours degree, a student must:

• achieve an overall weighted average of 40% across all modules in Part 3; and

• obtain a mark of at least 40% in Part 3 modules totalling at least 100 credits.

To be eligible for the award of a Pass degree, a student must:

- achieve an overall weighted average of 40% across all modules in Part 3; and
- obtain a mark of at least 40% in Part 3 modules totalling at least 80 credits.

Progression from BSc Land Management to Diploma or MSc Urban Planning and Development

Students on the '3+1' programme must pass all the compulsory Part 3 modules and be awarded the BSc Land Management with Honours to be eligible to register for the Diploma or MSc in Urban Planning and Development programme.

Admission requirements

Entrants to this programme are normally required to have obtained:

Grade C or better in English in GCSE; Grade B or better in Maths in GCSE; and achieved

UCAS Tariff: 320 points from 3 A-Levels *or* 350 points from 3 A-Levels plus one AS level. Subjects and levels: There are no required subjects although Economics, Geography, Business Studies or Mathematics are all relevant.

International Baccalaureate: 34 points Irish Leaving Certificate: AABBB

The above requirements are subject to continual review and are intended as a guide only. Please see our website or contact the Admissions Tutor for up-to date details.

Admissions Tutor: Roger Gibbard

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, the Careers Advisory Service, the University's Disability Office, Study Advisors, Hall Wardens and the Students' Union.

The Department's Resource Centre contains a variety of information sources relevant to Land Management-related programmes. It has a wide-ranging reference collection of textbooks, journals, property company reports and planning documents, which complements the material held in the Main University Library. The Resource Centre also holds the *Barbour Index* microfiche files for *Planning* and *Property Management*, and a link to the on-line *FOCUS* databases provided by Property Intelligence plc. The Department has significant computer facilities for the sole use of its staff and students.

Career prospects

Our students have been regularly employed by the largest and most prestigious firms of surveyors including: Jones Lang LaSalle, DTZ Debenham Thorpe, Weatheralls, Chestertons, Cushman & Wakefield Healey & Baker, Drivers Jonas, King Sturge, Knight Frank, Savills, Insignia Richard Ellis and CB Hillier Parker.

Additionally graduates have found employment with development companies (Slough Estates, Taylor Woodrow, Keir Property, Trafalgar House), management consultants (PricewaterhouseCoopers), insurance companies (Legal & General Investment Management), voluntary sector organisations (Gloucester Rural Community Council) and the private sector (Wolverhampton & Dudley Breweries plc). Traditionally our

PROGRAMME SPECIFICATION: BSc Land Management (leading to Dip/MSc Urban Planning and Development) 1st August 2007

students have had little difficulty in securing employment and, even during the recession, the vast majority of our graduates had either secured jobs or been accepted for further study within three months of the end of their programme.

Opportunities for study abroad

Due to the need to meet the requirements of professional accreditation, students cannot study abroad, as part of their degree. Students may be permitted to undertake a Socrates or other study visit as part of an approved 'gap' year between Part 2 and Part 3 of the programme.

Educational aims of the programme

The BSc programme is a blend of academic rigour and applied practical analysis. The programme aims to provide students with the knowledge and skills necessary for successful careers as Chartered Surveyors or related professionals and to engage confidently with market and development processes; to emphasise the value of inter-disciplinary working; to provide students with a structured but flexible learning framework; and to ensure that the skill areas covered by the programme are applicable to a range of occupational and professional needs.

PROGRAMME SPECIFICATION:

BSc Land Management (leading to Dip/MSc Urban Planning and Development) 1st August 2007

Programme Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge, understanding, skills, qualities and other attributes in the following areas:

A. Knowledge and understanding of:	Teaching/learning methods and strategies					
1. The attributes and dimensions of	Acquisition of knowledge of fields $1 - 3$ is					
property – physical, financial,	promoted across the programme through					
functional and legal —	lectures, tutorials, seminars, practicals,					
2. The nature, role and structure of the	workshops, case studies, role-play exercises,					
property industry and the key players –	IT-based exercises, site visits, guest lectures,					
planning, development, law, property	other project-based assignments, and through					
markets, occupiers, investors and	individual consultation with academic staff					
services	and personal tutors. Part 1 of the programme					
3. The environment and the economy –	focuses on developing students'					
public policy, environmental policy,	understanding of the general principles the					
economic trends and policy,	subject areas in field 4 and Part 2					
technological change and social change	concentrates on the application of these					
4. The concepts and principles of	subject areas to property and land. Part 3,					
construction, economics, finance,	enables students to deepen their					
valuation, investment, management, law	understanding of planning and land					
and planning and their application to	management with greater opportunities for					
property and related assets	self-directed learning through problem-					
5. The specialist study of development	solving and the examination of real world					
and planning	property problems.					
with provide a						
	Assessment					
	Assessment in Part 1 is based on elements of					
	coursework, class tests and unseen formal					
	examinations. Modules at Part 2 are assessed					
	in a similar way. At Part 3 a wide range of					
	assessment methods are used including					
	essays, unseen examination papers, open					
	book examinations, group and design-based					
	projects, specialist exercises (IT-based,					
	finance and/or marketing-oriented),					
	presentations, tutorial & seminar papers, and					
	reports.					

Knowledge and Understanding

B. Intellectual skills – able to:	Teaching/learning methods and strategies
 Integrate theory and practice Collect and synthesise information / data from a variety of sources Analyse and interpret Think logically and critically Define, solve and/or advise on problems Select and apply appropriate techniques of analysis, appraisal and valuation Plan, execute and write a report in response to a specific 'client' brief Adapt and apply knowledge and skills in a changing professional environment and to other fields 	 These skills are developed through lectures, tutorials, seminars, practicals, workshops, case studies, role-play exercises, IT-based exercises, site visits, guest lectures, other project-based assignments, and through individual consultation with academic staff and personal tutors. The programme is designed to progressively develop students' intellectual skills. Assessment Intellectual skills are assessed through a wide variety of approaches including essays, unseen examination papers, open book examinations, group projects, specialist exercises (IT-based, designbased, marketing-oriented), presentations, tutorial & seminar papers, and reports
 <i>C. Practical skills</i> – able to: 1. Locate information sources and select, assemble and present information in a variety of contexts 2. Collect, record, analyse and present statistical material 3. Value a range of property and property-related assets using a variety of appraisal approaches and techniques, including the application of financial mathematics 4. Use forecasting techniques 5. Read and interpret standard company accounts 6. Write a 'plain-English' report 7. Write an effective CV 	Teaching/learning methods and strategies In Part 1, the aim of the <i>Doing Land Management</i> module is to develop, in stages, a range of fundamental skills to help students make the transition from school, to university and on to work: these include skills 1, 2, and preparatory work on 7. This module is supported by a mixture of short lecture series and tutorials, workshops and/or practicals. Similarly, modules including <i>Investment</i> <i>Appraisal</i> (Part 1), <i>Applied Valuation</i> (Part 2), and other package-specific modules in Part 3, address skill 3. In Part 2, <i>Information Management &</i> <i>Analysis</i> and <i>Studies in Property & Planning</i> apply and extends into more specialised context the skills developed in <i>Doing Land Management</i> at Part 1 and in other modules. <i>Business Accounting & Taxation</i> and <i>Forecasting & Marketing for Property</i> (Part 2) address skills 4 and 5 through lectures, tutorials and seminars. Many modules, for example, <i>Doing Land</i> <i>Management</i> (Part 1) and both <i>Planning</i> <i>Implementation</i> and <i>Forecasting & Marketing for</i> <i>Property</i> (Part 2) guide students to write in plain- English – skill 6. In Part 3, projects and other coursework emphasise skills 1-6 subject to the student's choice of specialist package. All students complete a short CAS/CMS course on <i>Effective (job)</i> <i>Applications</i>
	<i>Assessment</i> Skills 1 – 7 are primarily assessed through coursework, in the form of essays and/or practical projects. Skills 3 and 5 are also assessed through unseen written examinations

PROGRAMME SPECIFICATION: BSc Land Management (leading to Dip/MSc Urban Planning and Development) 1st August 2007

Teaching/learning methods and strategies **D.** Transferable skills 1. Communicate effectively by oral and The teaching and acquisition of these transferable written means (also graphically subject to skills is firmly embedded in the programme. For choice of option modules) example, both written and oral communication is 2.
