

Foundation Degree in Supporting Children's Development and Learning UCAS code: X313
For students entering Part 1 in 2008/9

Awarding Institution:	University of Reading
Teaching Institution:	Newbury College
Relevant QAA subject Benchmarking group(s):	
Faculty:	Faculty of Social Sciences
Programme length:	2 years
Date of specification:	03/Aug/2009
Programme Director:	Ms Kriss Turner
Programme Advisor:	
Board of Studies:	
Accreditation:	

Summary of programme aims

The Foundation Degree (FD) provides a model of vocational higher education based on close collaboration between employers and providers of higher education.

The aim of the FD is develop the knowledge, skills and attributes of students already working in childcare and education to support each individual child in reaching their potential. It will enable students to develop to become committed, effective, reflective practitioners who can respond flexibly to changing circumstances, maintain and enhance standards of care and education and continue to develop their knowledge, skills and understanding throughout their professional lives.

The course will furnish candidates with the knowledge, skills and understanding to progress in their chosen career within related child care or education. Most students will become Higher Level Teachers Assistants as a result of this programme. It provides an appropriate base for progression to honours and QTS, if required.

Transferable skills

During the course of their studies at Reading, all students will be expected to enhance their academic and personal transferable skills in line with the University's Strategy for Learning and Teaching. In following this programme, students will have had the opportunity to develop such skills, in particular relating to communication, interpersonal skills, learning skills, numeracy, self-management, use of IT and problem-solving , and will have been encouraged to further develop and enhance the full set of skills through a variety of opportunities available outside their curriculum.

Students will be able to:

communicate ideas, principles and theories, arguments and analysis effectively in speech and writing, using visual and ICT media as tools where appropriate, to specific and non specific audiences
demonstrate appropriate critical thinking skills, including the ability to:

- identify and summarise the main points in an argument
- present and develop an argument, drawing upon appropriate evidence, literature and theory
- analyse and synthesise research, theories and ideas from multiple sources
- examine issues from a range of professional and theoretical perspectives;
- produce critical and evaluative responses to the content of the learning outcomes
- use ICT to support their own and children's development and learning
- work within a team and individually to complete relevant and agreed projects or tasks
- solve theoretical and practical problems that occur in the work place
- improve their own performance through critical self reflection, the implementation of evidence-based practice and continual professional development activities.

Programme content

Part 1 (three terms)

Compulsory modules

<i>Mod Code</i>	<i>Module Title</i>	<i>Credits</i>	<i>Level</i>
ED1FLD	How Children Learn and Develop 1	20	C
ED1FLC	The Legal Context	20	C
ED1FSC	The Social Context	20	C
ED1FPE	Promoting a positive environment	20	C
ED1FST	How Teaching Assistants support learning and development	20	C
ED1FRR	Reflective Practice	20	C

Optional modules:

ED1FSF	Supporting Early Years Foundation Stage Practice	20	C
* ED1FST	How teaching assistants support learning and development	20	C

Part 2 (three terms)

Compulsory modules

<i>Mod Code</i>	<i>Module Title</i>	<i>Credits</i>	<i>Level</i>
ED2FLD	How children learn and develop (2)	20	I
ED2FIS	Issues of Inclusion and Special Needs	20	I
ED2FRM	Research Methods for Developing Professional Practice	20	I
ED2FSK	Extending subject knowledge and expertise in Information and Communication Technology	10	I
ED2FFL	Progress in Communication, Language, Literacy and Creativity	10	I
ED2FPM	Progress in Mathematics	10	I
ED2FPS	Progress in Science	10	I
ED2FRP	Reflective Practice in Learning and Development	20	I
ED2FFL	Communication, Language, Literacy and Creative Development in the Early Years Foundation Stage	10	I
ED2FMF	Problem solving, reasoning and mathematics in the Early Years Foundation Stage	10	I
ED2FFK	Knowledge and Understanding of the World in the Early Years Foundation Stage	10	I
* ED2FPL	Progress in Communication, Language, Literacy and Creativity	10	I
* ED2FPM	Progress in Mathematics	10	I
* ED2FPS	Progress in Science	10	I

Students studying at Newbury College are normally required to take this option . Please consult the Programme Director to see if other options are feasible.

Progression requirements

In order to pass the Foundation degree overall, students must Pass Part 1 and obtain an average of at least 40% in Part 2, and a mark of at least 30% in individual modules amounting to not less than 100 credits in both parts.

In order to have satisfactorily completed the Part 1 of the degree a student shall normally be required to achieve an overall average in 120 credits taken in Part 1 of the pass mark and a mark of at least 30% in individual modules amounting to not less than 100 credits.

Summary of teaching and assessment

For the foundation degree the focus on skills and their application in the workplace, underpinned by academic knowledge and understanding, is critical. Work-based learning is central to the degree and students undertaking the course will need to be working in education or a child care setting. Teaching is organised in modules that typically involve lectures, work-based learning and practical work. Teaching will be delivered by colleges, in conjunction with employers, using a mixture of face to face teaching, web-based and distance learning methods, self-directed studies, project work and problem-based learning. Students will take a combination of core and optional modules over 2 years. The optional modules enable students to specialise in an age range These optional modules are pre - selected for them and, normally, students will be expected to follow the route offered by their College. The assessment of the FD will be based on University approved assessments that will include a mixture of assignments. These will include formative assessments to feed into summative assessments, in-class exams, essays, evaluations of practice and other formats as demonstrated in the grid below. In line with the nature of Foundation Degrees, assignments require students to link theory to practice in the work place. It is expected that descriptions and evaluations of practice will include references to relevant literature. Work - based learning will provide an essential contribution to achievement of the outcomes. The employer will provide

appropriate mentoring in conjunction with the college. This will include supported work - based assessment (WBA) that will contribute to the formal assessment of some modules, particularly within the options. The Institute of Education has experience in using mentors in the work - place.

OVERVIEW OF ASSESSMENTS FOR FD

	AUTUMN	SPRING	SUMMER
YEAR ONE			
ED1FSS	PDP P/F	Audit 100	
ED1FRP	Review of lit 30	WBA 10	Essay/child study 60
ED1FLD	Annotated bibliography40	Evaluation of resource 60	
ED1FSC	Presentation 40	WBA10	Evaluation of event 50
ED1FLC	Essay/child protection 100	Resource file P/F	
ED1FPE	Poster P/F	WBA 10	Evaluation 90
Options: Select one			
	WBA 10	WBA 10	
ED1FSF	Pamphlet 40	Planning document 40	
ED1FST	Pamphlet 40	Planning document 40	

Total in Yr 1 3 assessments + 1 WBA 5 assessments + 2 WBA 6 assessments+ 2WBA

YEAR TWO

ED2FAE	WBA 10	Essay 90	
ED2FSK	Portfolio		
ED2FLD	Presentation P/F	WBA 10	Project 90
ED2FIS	Presentation 90	WBA 10	
ED2FRM	Evaluation of article P/F	Project plan 100	

Options:
Select 1 per term

	WBA 10	WBA 10	WBA 10

ED2FFK	Rationale 90		
ED2FPL	Analysis 90		
ED2FPM	Evaluation 90		
ED2FPS	Essay 90		

Total in Year 2 3 assessments + 2 WBA 4 assessments + 2 WBA 3assessments+2 WBA

Admission requirements

Entrants to this programme are normally required to have obtained:

Level 2 NQF in Maths and English (Grade C or better in GCSE preferred)

At least 2 years' experience of working in an institution within the sector, such as TA or LSA. Students will normally require 5 years in order to apply for HLTA assessment.

NQF level 3 qualifications in a work related area. Equivalent qualifications are acceptable. Those students who do not hold a level 3 qualification may discuss APEL (Accredited of Prior Experiential Learning) procedures with their intended institution of study.

Admissions Tutor: Liz Dymond (Newbury College)

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers, and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@il) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance

and welfare support is provided by Personal Tutors, School Senior Tutors, the Students' Union, the Medical Practice and the Student Services Centre. The Student Services Centre is housed in the Carrington Building and includes the Careers Advisory Service, the Disability Advisory Service, Accommodation Advisory Team, Student Financial Support, Counselling and Study Advisors. Student Services has a Helpdesk available for enquiries made in person or online, or by calling the central enquiry number on (0118) 378 5555. Students can get key information and guidance from the team of Helpdesk Advisers, or make an appointment with a specialist adviser; Student Services also offer drop-in sessions on everything from accommodation to finance. The Carrington Building is open between 8:30 and 17:30 Monday to Thursday (17:00 Friday and during vacation periods). Further information can be found in the Student Diary (given to students at enrolment) or on the Student website.

All students on this FD will be members of the University of Reading and able to use the facilities of the University.

All of the college members also have facilities that will be available to the FD students. This will include access to computers and a library.

Career prospects

The expectation is that the majority of candidates successfully completing the course will continue to work in their settings or schools. They will often become Higher Level Teachers Assistants.

The programme will also provide an invaluable grounding for those candidates who wish to work in other educational fields, such as education officers for museums and theatres.

Progression to honours is possible through following a BA (Hons), such as BA(CDL) at University of Reading. The FD provides a suitable basis for progression to QTS through an appropriate ITT programme. This includes the Registered Teacher Programme (RTP) for those students who are able to secure a suitable teaching post or a PGCE or GTP programme once further credits are achieved.

Opportunities for study abroad or for placements

This programme offers substantial work-based experience in schools or care settings and there will be opportunities to visit other placements. The programme assumes that students are working at least .5 in an educational or care setting. Most modules rely upon students applying theory to their practice and undertaking tasks related to inputs.

Programme Outcomes

Knowledge and Understanding

A. Knowledge and understanding of:

the age-related expectations of children the aims, content and pedagogy of work based learning play, care and education value and belief systems, including those relating to anti-discriminatory practice and equality of opportunity the statutory frameworks and legal definitions relevant to their role. significant current and emerging theories and principles related to factors that can affect the way children learn and develop the cyclical process of planning, development, implementation and evaluation of provision difference and diversity, recognising individual needs whilst developing tolerance and understanding of others the potential effect of personal attitudes, values and behaviour on work with children, parents and colleagues and other inter-professional relationships how ICT can be used to advance their own and children's development and learning a range of appropriate strategies to establish a purposeful environment and to promote good behaviour. how to acquire further knowledge, to contribute effectively and with confidence to the work in which they are involved

Teaching/learning methods and strategies

Acquisition of knowledge is promoted across the programme through lectures, tutorials, seminars, workshops, case studies, role-play exercises, IT-based exercises, guest lectures, work-based assignments and through individual consultation with academic staff, mentors and personal tutors.

The core modules from Part 1 focus on developing students' understanding of the general principles of supporting children. E.g. ED1FLD covers children's development 0-11 and the impact on learning. The optional module for Part 1 extends this and applies it to the selected route, such as ED1FST for teaching assistants.

Part 2 provides students with a significant range of choice, enabling them to deepen their understanding of a particular age range, context or subject area, according to their interests and career plans. For example, by selecting ED2FPL, ED2FPM and ED2FPS, a student will gain significant knowledge and understanding of the needs of children across a wide range of curriculum areas. These packages provide opportunities for self-directed learning

through problem solving and the examination of work - based problems.

Assessment

Feedback is initially given through formative assessed work. Most knowledge is tested through a combination of coursework and assessment of practice in work- based settings. There are a number of timed assessments in class.

A range of assessment methods is used, including essays, group projects, presentations, use of reflective diaries, portfolios of evidence of practice, tutorial and seminar papers and reports.

Skills and other attributes

B. Intellectual skills - able to:

access and review literature to underpin evidence-based practice
use literature within extended written projects, case studies, reports and self-reflective studies
assimilate, evaluate and analyse information
critically reflect upon observations and first hand experience of the environment and practice in relation to work with children, parents and colleagues from within the organization and from other organizations
identify key issues
deal with complex issues both systematically and creatively
make informed judgements
understand the complex matrix of factors that affect the process of teaching and learning
have high expectations of all children, respecting their social, cultural, linguistic, religious and ethnic backgrounds and committed to raising their achievement.

Teaching/learning methods and strategies

The programme is designed to progressively develop students' intellectual skills and to enable them to progress to an honours route, if they wish.

In Part1 the aim is to develop a range of fundamental skills to help students make the transition from work to university study. ED1FRR provides a range of outcomes that are reinforced through other modules. These skills are developed through lectures, tutorials, seminars, workshops, case studies, role-play exercises, IT-based exercises, visits to settings, guest lectures, work-based assignments, and through individual consultation with academic staff, colleagues at work, mentors and personal tutors.

Students are involved in reflective evaluations of work - based activities with colleagues, tutors and mentors. They assimilate, evaluate and analyse observations and practice. Students contribute to presentations, written reports and assignments and lead seminars.

In Part 2, each student undertakes a supervised, work-based piece of research, building upon Part 1 achievements.

Assessment

Feedback is initially given through formative assessed work. Intellectual skills are tested through a combination of coursework and assessment of practice in work- based settings. There are a number of timed assessments in class.

A range of assessment methods is used in Part 1 and again in Part 2, including essays, group projects, presentations, use of reflective diaries, portfolios of evidence of practice, tutorial and seminar papers and reports.

C. Practical skills - able to:

design, implement, monitor and assess effective activities which support the individual development and learning of children and which meet the statutory and regulatory requirements, in

Teaching/learning methods and strategies

Practical skills are developed through linking theory to work placements. This is supported by a mixture of lectures, tutorials, seminars, workshops, case studies, role-play exercises, IT-based exercises,

consultation with other professionals where necessary
 promote and support the inclusion of all, recognising and responding effectively to equal opportunities issues as they arise, including challenging stereotyped views, bullying or harassment, following relevant policies and procedures
 manage, organise and evaluate their own time, resources, records and information to support decision making
 build and maintain successful relationships
 improve their own practice, including through observation, evaluation and discussion with colleagues
 interest and motivate children to progress
 select and prepare resources and activities that meet the diversity of children's needs and interests and support inclusion.
 contribute to the planning of opportunities for children to develop and learn in a range of contexts
 monitor children's responses to activities and modify approach accordingly
 monitor children's participation and progress, giving constructive support
 maintain and analyse records of progress.
 communicate effectively and sensitively with children to support them
 use effective behaviour management strategies
 organise and manage safely the activities, the physical space and resources
 use common ICT tools

D. Transferable skills - able to:

communicate ideas, principles and theories, arguments and analysis effectively in speech and writing, using visual and ICT media as tools where appropriate, to specific and non specific audiences;
 demonstrate appropriate critical thinking skills, including the ability to:
 Identify and summarise the main points in an argument;
 Present and develop an argument, drawing upon appropriate evidence, literature and theory;
 Analyse and synthesise research, theories and ideas from multiple sources
 Examine issues from a range of professional and theoretical perspectives;
 Produce critical and evaluative responses to planned outcomes
 use ICT to support their own development, and the learning and development of children;
 work within a team and individually to complete a

guest lectures, work-based assignments and through individual consultation with academic staff, mentors and personal tutors

The aim of Part 1 is to develop, in stages, a range of fundamental skills to help students to improve their work - based practice and to move to reflective practice. For example, ED1FPE encourages students to consider the range of practical skills that promote a positive environment.

The options in Part 2 apply and extend the skills developed in the option in Part 1 and in other modules into more specialised contexts. For example, ED2FPM and ED2FMS looks at support for children in mathematics and science, whereas ED2FPL develops the practical skills of supporting children's communication. In Part 2, the research based project focus on those skills related to the student's choice of specialist package and so develops the appropriate practical skills.

Many modules require students to prepare resources to support their practice and guide students to write in plain English.

All students attend sessions on career development and effective applications.

Trainees are encouraged to visit other settings for observation and evaluation.

Assessment

Students are assessed through a combination of coursework and assessment of practice in work-based settings. Students are assessed in relation to their chosen route and receive formal assessment of their practice through a system of mentoring. Assessment methods, including essays, group projects, presentations, reports, use of reflective diaries, timed assessments, portfolios of evidence of practice, tutorial and seminar papers, all relate theory to practice.

Teaching/learning methods and strategies

The teaching and acquisition of these transferable skills is firmly embedded in the programme. As a work-based degree, there is particular emphasis on the acquisition and personal development of a wide range of transferable skills.

For example, communication skills are taught in ED1FRR, but are also considered in ED1FPE, ED1FLD and ED1FSC and these are also deployed in the group presentations, individual reports and work - based experiences.

A care and education culture permeates the programme fed by module content and the intended learning outcomes, staff (and student) links with practice, lectures by visiting practitioners, visits to other settings and the analysis of video material.

The use of ICT is embedded throughout the programme, although there is particular emphasis in the inputs of ED1FRR and ED2FSK.

Oral presentations, team work and career planning

relevant and agreed project or task
solve theoretical and practical problems that occur
improve their own performance through critical self
reflection, the implementation of evidence-based
practice and continued professional development
activities.
demonstrate and promote the positive
values, attitudes and behaviour they expect

are included in modules and in meetings with a
personal tutor.
Time management and use of library resources are
essential for effective completion of a degree whilst
working; advice is given in pre-programme
documentation, induction week and EDIFRR.
The programme's strategy on career management
incorporates the use Careers Advisory Services
incorporating a taught session and / or on-line
learning material There is a timetable to prepare
students for progression to honours, QTS and / or
career development.

Assessment

As a result of this 'pervasive' approach to
transferable skills, students' performance is assessed
across the full range of skills throughout the
programme on a module-by-module basis through
coursework when feedback is provided.
Written feedback from mentors and tutors and some
written assignments and reports reflect these skills.

Please note - This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in the module description and in the programme handbook. The University reserves the right to modify this specification in unforeseen circumstances, or where the process of academic development and feedback from students, quality assurance process or external sources, such as professional bodies, requires a change to be made. In such circumstances, a revised specification will be issued.
