Summary of programme aims

The MA (Res) programme in Ethics and Political Theory aims to enable students

- to build upon undergraduate studies in philosophy, history, politics, or social science;
- to master current debates in ethics and political theory;
- to gain familiarity with the major intellectual traditions in the field;
- to develop their research skill and prepare them, where appropriate, for a research degree.

Transferable skills

The University's Strategy for Teaching and Learning has identified a number of generic transferable skills that all students are expected to have developed by the end of their degree programme. In following this programme, students will have had the opportunity to enhance their skills relating to research, communication of complex material (both written and oral), information handling, time management, problem-solving, self-directed learning and use of information technology. Like its sister-MA in Philosophy, the MA in Ethics and Political Theory will help students develop skills such as: synthesising information from a range of sources, providing a coherent overview of competing theories and positions on a topic; analysing and critically evaluating competing theories and positions, and arguing for the merits of one or another of these; and planning and producing a substantial piece of research under supervision, as a potential foundation for further study; utilising, at a reasonably sophisticated level, the conceptual tools and problem-solving skills acquired as an undergraduate. Its openness towards political problems, and issues in applied ethics, will offer students the opportunity to develop more empirical research skills of a social-scientific and historical character.

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme.

Student guidance and welfare support is provided by Personal Tutors, School Senior Tutors, the Students' Union, the Medical Practice and the Student Services Centre. The Student Services Centre is housed in the Carrington Building and includes the Careers Advisory Service, the Disability Advisory Service, Accommodation Advisory Team, Student Financial Support, Counselling and Study Advisors. Student Services has a Helpdesk available for enquiries made in person or online (www.risisweb.reading.ac.uk), or by calling the central enquiry number on (0118) 378 5555. Students can get key information and guidance from the team of Helpdesk Advisers, or make an appointment with a specialist adviser; Student Services also offer drop-in sessions on everything from accommodation to finance. The Carrington Building is open between 8:30 and 17:30 Monday to Thursday (17:00 Friday and during vacation periods). Further information can be found in the Student Diary (given to students at enrolment) or on the Student website (www.reading.ac.uk/student).

Career prospects

Over the years students who have followed the MA programmes in Philosophy and Political Theory and Public Ethics have gone into jobs in both the public and private

sectors. Some go on to further study at PhD level and obtain academic and academic-related jobs (e.g. lectureships, administrative posts on research boards, schoolteaching). Some enter thinktanks or the civil service. In the private sector, recent jobs include law, business, journalism, and IT. In general, there is evidence that IT firms appreciate the logical and analytic skills of philosophers. Furthermore, a survey by the Royal Institute of Philosophy found that graduates with British Philosophy degrees consider their degree course to have been very relevant to their jobs, and report a very high level of job satisfaction.

Educational aims of the programme

The MA programme in Ethics and Political Theory aims to enable students

- to build on their undergraduate studies, deepening their knowledge and understanding of chosen aspects of moral and political theory;
- to work in sustained contact, including individual supervision, with practising researchers in the field;
- to undertake close reading of complex texts;
- to apply the conceptual equipment required in novel intellectual situations
- to develop their research skills and prepare them, where appropriate, for research degrees.

Programme Outcomes

Knowledge and Understanding

A. Knowledge and understanding of:

- the principal intellectual traditions in ethics and political theory
- the shifting understandings of ethics and the political domain expressed in classic texts
- the principal contemporary debates within the field
- one particular topic in depth, through writing of a dissertation

Teaching/learning methods and strategies

- Individual supervision of essays and dissertation
- Discussion and mini-lectures in weekly seminar attended by all students
- Small group discussion in seminars and classes led by one or more members of staff
- Seminar presentations prepared with assistance from supervisor

Assessment

- essays
- presentation
- dissertation

Skills and other attributes

B. Intellectual skills – able to:

- comprehend and evaluate a range of complex texts of broadly philosophical character
- synthesise information from a range of sources, providing a coherent overview of competing theories and positions on a topic
- analyse and critically evaluate competing theories and positions, and to argue for the merits of one or another of these
- expound complex philosophical concepts at a reasonably sophisticated level
- apply such concepts to novel ethical and political problems
- plan and produce a substantial piece of research under supervision, as a potential foundation for further study

Teaching/learning methods and strategies

As above, with emphasis on self-directed learning facilitated through the use of research-based teaching materials and methods.

Students will additionally be asked

- to produce a critical literature review on some specialised topic
- to interrogate an external speaker about a pre-circulated text
- to take part in a formal debate on some ethical or political issue.

Assessment

Besides the summative assessment noted in A, students will receive informal feedback through individual meetings with supervisors, staff-led group discussion of presentations, and written comments upon drafts and the literature review.

C. Practical skills – able to:

- produce fluent and structured pieces of written work, including an extended piece, with bibliography and footnotes
- present a fluent and structured presentation, explaining material to staff and students who may or may not have extensive familiarity with the topic
- critically discuss particular theories and positions both orally and in writing, and to engage in discussion of each other's work as well as articulating their own
- undertake web-based and library research on both philosophical and social-scientific topics
- produce a convincing grant/studentship proposal on some topic in the field

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably expect to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in the programme handbook. The university reserves the right to modify this specification in unforeseen circumstances, or where the process of academic development and feedback from students, quality assurance processes, or external sources, such as professional bodies, requires a change to be made. In such circumstances, a revised specification will be issued.
