### **Summary of programme aims**

The purpose of the course is to enable teachers and educationists to deepen their understanding of the issues which are related to the teaching and learning of music in schools and communities. This is achieved by encouraging students to explore the practical applications of the research literature, also drawing upon their own experience of teaching and learning music. Graduates of the course will be able to offer to their institutions an in-depth understanding of the underlying principles of music education and their application. This will enable them to develop their own teaching effectiveness and help assist their colleagues. As a result, it is envisaged that graduates of the course will raise the standards of teaching and learning music in the institutions where they will teach. Students will be encouraged to become active researchers, often in their own professional base. They will also have the opportunity to engage with the research interests of University staff in developing their own topics for investigation. Students will be involved in the work and community of the International Centre for Research in Music Education and they will have access to its extensive resources and programme of conferences and seminars.

### **Transferable skills**

Students will develop the following transferable skills:

- Ability to use library and other academic resources
- Writing skills: writing of papers/essays, notes on readings and seminars, reviewing work of peers
- Ability to make oral presentations
- Ability to engage in practical music making
- Ability to critique existing music education policy and practice
- Ability to carry out research in an appropriate topic within music education.

### **Programme content**

The programme provides opportunities for students to select from a wide range of modules. The programme places strong emphasis on the development of independent research skills by all students. Students must complete their dissertation on an appropriate topic in the area of music education. Part-time students may register for the dissertation at the beginning of the Autumn, Spring or Summer Terms.

All students are registered for Route A and may transfer to Route B, with the approval of the programme leader.

On Route A, students take 120 credits consisting of four core modules (EDM091, EDM092, EDM093 and EDM094) and two optional taught modules followed by a 60 credit, 15,000 word dissertation (EDM030). Optional modules are chosen from the full range of modular provision within the Institute of Education; these may vary from year to year and students will receive information about these at the start of the programme. For part-time students the taught modules must be completed within 48 months and the dissertation must be submitted within 36 months of completing the taught modules. The dissertation registration period is 12 months (part-time). Full-time students complete the programme in 12 months.

On Route B, students take 80 credits consisting of four core modules (EDM091, EDM092, EDM093 and EDM094) followed by the longer 100 credit, 25,000-30,000 more research based dissertation (EDM031). For part-time students the taught modules must be completed within 36 months and the dissertation must be submitted within 48 months of completing the taught modules. The dissertation registration period is 24 months (part-time). Full-time students complete the programme in 12 months.

**Support for students and their learning**

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme.

Student guidance and welfare support is provided by Personal Tutors, School Senior Tutors, the Students' Union, the Medical Practice and the Student Services Centre. The Student Services Centre is housed in the Carrington Building and includes the Careers Advisory Service, the Disability Advisory Service, Accommodation Advisory Team, Student Financial Support, Counselling and Study Advisors. Student Services has a Helpdesk available for enquiries made in person or online ([www.risisweb.reading.ac.uk](http://www.risisweb.reading.ac.uk)), or by calling the central enquiry number on (0118) 378 5555. Students can get key information and guidance from the team of Helpdesk Advisers, or make an appointment with a specialist adviser; Student Services also offer drop-in sessions on everything from accommodation to finance. The Carrington Building is open between 8:30 and 17:30 Monday to Thursday (17:00 Friday and during vacation periods). Further information can be found in the Student Diary (given to students at enrolment) or on the Student website ([www.reading.ac.uk/student](http://www.reading.ac.uk/student)).

The Bulmershe campus contains its own library with an excellent stock of music education books and journals, and its own IT facilities. A comprehensive handbook is available for the course. The extensive resources of the International Centre for Research in Music Education are freely available. Through its Partnerships the Institute has active relationships with a network of over 300 schools and 10 local education authorities.

### **Career prospects**

It is envisaged that the course will greatly enhance the career prospects of any participants engaged in music teaching at whatever level, whether in the classroom, or within leadership or management roles in local education authorities and schools and colleges.

### **Opportunities for study abroad or for placements**

Partnership schools and other providers of music education give access to pupils working in a practical context.

### **Educational aims of the programme**

Students are required to demonstrate more advanced understandings than at first degree level with specific emphasis on the educational issues related to the teaching and learning of music. In order that music teachers become researchers, the programme provides opportunities for students to engage in small-scale research projects before embarking on the dissertation.
