

MSc/Postgraduate Diploma/Postgraduate Certificate in Investment Banking and Islamic Finance **For students entering in 2010**

Awarding Institution:	The University of Reading
Teaching Institution:	The University of Reading
Faculty:	Henley Business School
Programme length:	12 months
Date of specification:	30/7/08
Programme Director:	Professor John Board
Board of Studies:	ICMA Centre
Accreditation:	N/A

Summary of programme aims

The aim of the programme is to prepare graduates for a career in the international investment banking industry in positions in which they might wish to demonstrate knowledge of Islamic approaches to finance. The programme will provide participants with the opportunity to develop and demonstrate their understanding of both the theory and practical applications of modern finance both in conventional (“Western”) and Islamic jurisdictions. Thus, the programme aims to respond to the growing interest in Islamic Finance which is evidenced by a continuous increase in Islamic Banking services, Islamic Investment and other financial services based on Islamic principles.

This programme aims to offer the same academic and analytical approach to Islamic finance that we already offer in respect of conventional finance (and related fields of Economics and Law). The new degree will not require any previous knowledge of Islamic Law or concepts and will address the specific issues of Islamic finance within a secular, western-oriented context. This means that the degree will not offer, or claim to offer, any education in Islamic thought, philosophy or religion beyond that necessary to understand the particular topics being examined.

In the first instance the MSc programme will be offered on a full-time residential basis only. Students will spend the three ordinary terms at Reading and then attend a fourth term from June to August at INCEIF (the Global University in Islamic Finance) in Kuala Lumpur (KL).

The core MSc modules will cover the materials to enable them to take the examination to qualify for Part 1 of the Chartered Islamic Finance Professional (CIFP) professional qualification.

The format can be summarised as follows:

- Term 1 (Autumn): Students attend University of Reading and sit Part 1 modules taught by Reading faculty.
- Term 2/3 (Spring / Summer): Students attend University of Reading and sit modules taught by Reading faculty from a choice of MSc modules at Part 2. Students will also study specific modules on Islamic finance (taught equally by UK based experts and visiting Professors from INCEIF).
- Term 4 (June to August): Students attend INCEIF in KL and study three additional modules taught by INCEIF faculty. Students may choose to complete an optional Research Project rather than 20 credits of taught modules. However, all students will have to complete these taught modules, whether completing for credit or as preparation towards the CIFP professional qualification.

Transferable skills

Like all our MSc programmes, students will have the opportunity to enhance their skills relating to numeracy, problem-solving, communication, information handling and the use of information technology, time management, team working and career planning.

Again, consistent with our other MSc programmes, the quantitative skills developed, including the use of statistical and econometrics software, are much in demand in the financial sector, but are readily transferable to other business and organizational contexts. All other skills are transferable and therefore not specific to

particular firms or industries. Students will have the opportunity to improve their communication skills both in the preparation of written assignments and during the interaction with their classmates in the online discussions that support their learning. The Securities, Futures and Options and Fixed Income and Equity Investment modules will require them to organize and interpret data. The significant role of spreadsheet modelling, in particular, will enhance the use of information technology in the programme.

The programme will help the students understand techniques in Islamic finance. It will enable applied knowledge of a very different way of financing and banking, based on a legal culture which is unlike the established European financing which is taken for granted in much of the financing world.

Programme content

Compulsory Modules

Module Code	Module Title	Credits	Level
ICM106	<i>Financial Markets</i>	20	7
ICM107	<i>Securities, Futures and Options</i>	20	7
ICM108	<i>Fixed Income and Equity Investments</i>	20	7
ICM232	<i>Financial Analysis</i>	20	7
ICM251	<i>Corporate Finance</i>	20	7
ICM255	<i>Design, Implementation and Risk Aspects of Islamic Financial Products</i>	20	7
ICM257	<i>The Principles of Islamic Commercial Jurisprudence and the Nominate Contracts</i>	10	7
ICM258	<i>Islamic Financial Institutions and Markets</i>	10	7

In addition students must choose one if the following modules:

ICM228	<i>Topics in the History of Finance</i>	10	7
ICM214	<i>Financial Regulation and Regulatory Policy</i>	10	7
ICM241	<i>International Securities Markets</i>	10	7
ICM264	<i>Managing Securities Operations</i>	10	7
ICM266	<i>Essentials of Financial Engineering</i>	10	7

In addition, students must choose 30 credits at INCEIF in Kuala Lumpur chosen from the following modules:

ICM269	<i>Islamic Economics</i>	10	7
ICM259	<i>Wealth Planning and Management</i>	10	7
ICM268	<i>Islamic Capital Markets</i>	10	7
ICM218	<i>Research Project</i>	20	7

Part-time/Modular arrangements

In the first instance the programme will be by full time attendance only. It is planned to explore the suitability of this programme for Distance Learning in due course.

Progression requirements

N/A

Summary of teaching and assessment

Teaching is organised in modules. The method of delivery varies among modules, especially in terms of the proportions of time allocated to lectures, seminars and dealing-room sessions. All modules are part-assessed via a multiple-choice test or coursework that can take a variety of forms. Final assessment normally involves a written examination, and also incorporates coursework marks.

The full-time programme is taught over two 11-week terms at Reading and time at KL. Part 1 begins at the beginning of Welcome Week in September of each year. Examinations for Part 1 modules are held in Week 1 of the following spring term. Part 2 at Reading occupies 9 weeks of the spring term and 2 weeks

at the beginning of the summer term. Examinations for Part 2 at Reading are normally held in late May / early June. Students then spend a period of eight weeks studying for Part 2 at KL, INCEIF. They will be examined on these materials at the end of August.

The University's taught postgraduate marks classification is as follows:

<u>Mark</u>	<u>Interpretation</u>
70 – 100%	Distinction
60 – 69%	Merit
50 – 59%	Good standard (Pass)
<u>Failing categories</u>	
40 – 49%	Work below threshold standard
0 – 39%	Unsatisfactory Work

For Masters Degrees (180 credits)

To pass the MSc students must gain an average mark of 50 or more overall. In addition the total credit value of all modules marked below 40 must not exceed 30 credits and for all modules marked below 50 must not exceed 55 credits.

Students who gain an average mark of 70 or more overall and have no mark below 40 will be eligible for a Distinction. Those gaining an average mark of 60 or more overall and have no mark below 40 will be eligible for a Merit.

For PG Diplomas (120 credits)

To pass the Postgraduate Diploma students must gain an average mark of 50 or more. In addition the total credit value of all modules marked below 40 must not exceed 30 credits and for all modules marked below 50 must not exceed 55 credits.

Students who gain an average mark of 70 or more and have no mark below 40 will be eligible for the award of a Distinction. Those gaining an average mark of 60 or more and have no mark below 40 will be awarded eligible for a Merit.

For PG Certificate (60 credits)

To pass the Postgraduate Certificate students must gain an average mark of 50 or more. In addition the total credit value of all modules marked below 40 must not exceed 10 credits.

Admission requirements

Entrants to this programme are required to have obtained a first degree the equivalent of a British upper second class honours degree or equivalent from an overseas institution. Degrees can be in any discipline but applicants must demonstrate a satisfactory level of numeracy and have basic knowledge of Mathematics, Statistics, Economics and Accounting.

For applicants whose first language is not English, proof of proficiency is required.

GMAT

Applicants are strongly recommended to submit a GMAT score with their application, particularly if they have been out of education for more than a few years. The ICMA Centre may ask an applicant to submit a GMAT if it is deemed appropriate.

Admissions Tutor: Dr Simone Varotto

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based

teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme.

Student guidance and welfare support is provided by Programme Directors, School Senior Tutors, the Students' Union, the Medical Practice and the Student Services Directorate. The Student Services Directorate is housed in the Carrington Building and includes the Careers Advisory Service, the Disability Advisory Service, Accommodation Advisory Team, Student Financial Support, Counselling and Study Advisors. Student Services has a Helpdesk available for enquiries made in person or online (www.risisweb.reading.ac.uk), or by calling the central enquiry number on (0118) 378 5555. Students can get key information and guidance from the team of Helpdesk Advisers, or make an appointment with a specialist adviser; Student Services also offer drop-in sessions on everything from accommodation to finance. The Carrington Building is open between 8:30 and 17:30 Monday to Thursday (17:00 Friday and during vacation periods). Further information can be found in the Student website (reading.ac.uk/student).

In addition, the ICMA Centre provides three purpose-built dealing rooms that include Reuters, Bridge and Bloomberg terminals and high-specification PCs that students routinely use for *INVEST* trading simulations and course work. The ICMA Centre's Continuing Professional Development Unit provides specialised careers advice targeted at the investment banking industry.

Learning support also includes a student handbook containing full details of the programme structure and administration. Blackboard is used to manage teaching and learning and to monitor student progress for full-time, flexible learning and distance learning students.

Distance learners will be able to meet with other students in their cohort and teaching and support teams during the non-compulsory week at the ICMA Centre in the June of the year of distance learning.

Career prospects

Graduates of the ICMA Centre have an enviable record of attainment when it comes to gaining employment in the financial services industry. The global investment banking and securities markets attract the very best applicants and competition for entry-level positions remains intense. Despite the volatile nature of the financial markets, demand for well-qualified recruits remains high. We expect many of our graduates to enter the industry at either the 'Analyst' level, i.e. as graduate trainees, or as 'Associates', who tend to have several years of relevant professional experience.

Our graduates leave us equipped with knowledge and transferable skills that are also prized by employers outside of the traditional banking and finance sectors. Many of our graduates are currently enjoying successful careers with government agencies and regulatory organisations throughout the world. Others are working with specialist IT firms, multinational companies and global consulting organisations.

Increasingly, students join us to obtain specific technical and financial skills to enable them to join small financial boutiques, including venture capitalists, proprietary trading firms and hedge funds. Others are working in the area of e-commerce, especially small, entrepreneurial firms that seek to exploit the opportunities for internet-based securities sales and trading.

Opportunities for study abroad or for placements

Students will be expected to spend eight weeks, from June to August studying at INCEIF, Kuala Lumpur, Malaysia.

Educational aims of the programme

Each module sets explicit objectives and learning outcomes in a limited and well-defined area of the course syllabus. Some of these learning outcomes relate to key theoretical concepts, and are achieved through directed study supported by lectures, seminars and trading simulations in which students uncover theoretical concepts (e.g. price convergence in efficient markets) through their own actions. Achievement of these outcomes is assessed through written examinations and graded trading sessions.

Other objectives require students to demonstrate that they can apply specific techniques introduced in the module to new problems. These learning outcomes are achieved in part through seminar work based on

exercises and problems set by lecturers and led by course tutors. They are also achieved through group and individual project work. Achievement of these outcomes is assessed through written examinations, and in some modules, graded project work.

On completion of the Masters degree students should be able to demonstrate extensive knowledge of strategies for the valuation, trading and risk management of financial securities and should understand how the markets for different types of securities interact. They should be able to apply these strategies to practical problems at a level of sophistication approaching that encountered in actual financial markets. They should also have acquired transferable core skills in computing and quantitative analysis. They should be able to apply this knowledge in Investment banks involved in Islamic Finance.

Programme Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills, qualities and other attributes in the following areas:

Knowledge and Understanding

A Knowledge and understanding of: <ol style="list-style-type: none">1. fundamental techniques for portfolio selection, valuation of risky assets and financial decision-making2. practical techniques for developing strategies for the analysis of debt, equity and derivative securities3. analytical techniques used routinely in the finance research literature4. techniques in econometrics comprising model estimation and interpretation, hypothesis testing, and analysis of non-stationary data5. structures and functions within the global financial securities industry6. principles and theories unpinning Islamic finance7. approaches utilised by Investment banks working within the field of Islamic finance	Teaching/learning methods and strategies <p>Formal lectures, practical (including dealing-room) sessions and conventional classes, supervisions supported by directed and assessed self-study. Feedback and guidance are an important part of the process.</p> <p>This body of knowledge is communicated by detailed, paper-based lecture notes. These are supported by lectures or e-lectures and a Learning Management System (LMS). The LMS provides the students with the ability to participate in online discussion.</p> Assessment <p>Knowledge is tested via multiple-choice tests, tutor-marked assignments, and unseen written examinations.</p> <p>Courses are assessed through a combination of coursework and unseen examinations. Practical project work is also assessed and provides a source of feedback on performance to students</p>
---	--

Skills and other attributes

<p>B. Intellectual skills – able to:</p> <ol style="list-style-type: none"> 1. gather, analyse and interpret data 2. read, understand and discuss the relevant literature in refereed academic journals 3. think logically and apply analytical principles to a range of problems in finance 4. interpret news events and assess their potential effects upon the global financial markets 	⇒	<p>Teaching/learning methods and strategies</p> <p>Substantive problems are illustrated in lectures and smaller group seminars. Essays, project work and problem sets provide related opportunities for problem solving. Lectures supported by essays and seminar discussions provide the basis of ensuring the growing knowledge base becomes comprehensible.</p> <p>These skills are developed by each of the core modules, which are supported by key milestones and submission of tutor-marked assignments. Students will be presented with financial datasets and required to analyse them and to draw appropriate inferences.</p> <p>Assessment</p> <p>Through tutor-marked assignments, project work, problem sets and unseen written examinations.</p>
<p>C. Practical skills – able to:</p> <ol style="list-style-type: none"> 5. use Information Technology effectively 6. utilise econometrics software to critically analyse financial data 7. communicate ideas online 8. utilise Reuters and Bloomberg business information and analytical tools 9. use spreadsheet software to analyse complex practical problems in finance 10. operate effectively in a simulated dealing-room environment, including the ability to manage bid/ask spreads 11. Appreciate the principles to be able to structure Islamic finance products 	⇒	<p>Teaching/learning methods and strategies</p> <p>Practical skills are introduced in lectures, developed in supporting tutorials, computer-based sessions and dealing-room sessions, and reinforced by problem sets and supervised project work.</p> <p>Teaching is supported by a Learning Management System that requires students to participate in asynchronous online discussions.</p> <p>Spreadsheet tasks and software modelling are included in the teaching of modules such as Securities Futures and Options.</p> <p>Assessment</p> <p>These are assessed through INVEST dealing-room sessions, computer-based sessions and tutorials.</p>

D. Transferable skills – able to:

1. contribute to online group discussions
2. gather and interpret data, and present results
3. work in teams
4. demonstrate familiarity with the workings of the international financial markets
5. use IT, including word processing, data exchange, graphics, spreadsheet and econometrics software and directed website searches
6. communicate orally and in writing
7. use library and web-based resources
8. manage time to achieve goals

⇒

Teaching/learning methods and strategies

The use of IT is an integral part of the practical side of the course. It is encouraged through applications that require economic and financial analysis. These involve spreadsheet-modelling exercises, Monte-Carlo simulations, website searches, use of library resources, the presentation of word-processed documents including graphics displays. Communication skills are assessed at several points throughout the programme. Communication, presentation and team-working skills are specifically emphasised in CPD. Good time management is essential for organising a timetable to complete project work.

Seminar sessions (1) and (3). Assignments. Interviews with prominent guest speakers from the City of London (4).

Assessment

Assessment of transferable skills is incorporated at several points in the programme. (1) and (3) contribute towards assessed work in projects, problem sets and dealing-room sessions. These are also assessed by means of unseen written examinations and tutor-marked assignments.

Please note - This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in the module description and in the programme handbook. The University reserves the right to modify this specification in unforeseen circumstances, or where the process of academic development and feedback from students, quality assurance processes or external sources, such as professional bodies, requires a change to be made. In such circumstances, a revised specification will be issued.
