

**BSc Consumer Behaviour and Marketing with Industrial Training UCAS code: NC58
For students entering Part 1 in 2010/1**

Awarding Institution:	University of Reading
Teaching Institution:	University of Reading
Relevant QAA subject Benchmarking group(s):	Agriculture, Food and Forestry Economics, Business Management
Faculty:	Life Sciences Faculty
Programme length:	4 years
Date of specification:	15/May/2013
Programme Director:	Dr Elena Millan
Programme Advisor:	Dr Francisco Areal
Board of Studies:	Agriculture, Policy and Development
Accreditation:	Accreditation by The Association to Advance Collegiate Schools of Business (AACSB)

Summary of programme aims

Students are introduced to a range of degree-level multidisciplinary subjects in consumer behaviour and marketing with applied psychology to develop an understanding of the psychology of a consumer and how the consumer influences, and is influenced by, the socio-economic environment.

Students have the opportunity to apply their knowledge to chosen areas of interest as well as developing core skills in the areas of consumer behaviour, marketing, applied psychology, economics and research methods. A wide variety of options from across the University are available to students making it possible for them to focus throughout their degree on, for example, Food, Nutrition and Health, although this is only one of the pathways provided.

Training in the application of these disciplines is key to the development of knowledge and transferable skills for the student as well as the challenges faced and issues addressed in the wider consumer sector, for example an understanding of, and contributing to the design and development of, more efficient and effective marketing and policy strategies.

Students will undertake 12 months work experience with a relevant organisation. This will develop the practical skills and in-depth industrial knowledge that employers demand of graduates.

Transferable skills

During the course of their studies at Reading, all students will be expected to enhance their academic and personal transferable skills. In following this programme, students will have had the opportunity to develop such skills, in particular relating to career management, communication (both written and oral), information handling, numeracy, problem-solving, team-working, and use of information technology and will have been encouraged to further develop and enhance the full set of skills through a variety of opportunities available outside their curriculum.

Programme content

Part 1 (three terms)

Compulsory modules

<i>Code</i>	<i>Module title</i>	<i>Credits</i>	<i>Level</i>
AP1EE3	Economics 1	10	4
AP1EE1	Economics 2	10	4
AP1EM1	Introduction to Marketing	10	4
AP1EQ3	Qualitative Research Methods	10	4
AP1EQ4	Quantitative Methods 1	10	4
AP1EX1	Applied Project	10	4
AP1SCMS	Career Management Skills	0	4
PY1DS	Developmental and Social Psychology	10	4
AP1SB1	Introduction to Management	10	4
PY1CA2	Cognition and Applied Psychology for Consumer Behaviour and	10	4

Marketing

Optional modules (30 credits):

Students must select options totalling 30 credits from the recommended modules below or from across the University subject to timetabling constraints providing entry requirements are fulfilled:

APIEF1	The UK Food Chain	10	4
GG1HGE	Geography and the Global Economy	10	4
GG1SC	Social and Cultural Geography	10	4
MM1F10	Student Enterprise	10	4
PO1BRI	British Society	20	4
PO1IRS	Politics: International Relations and Strategic Studies	20	4
PP1VV	Philosophy Values and Virtues	20	4
PY1IN~	Introduction to Neuroscience	10	4
PY1PL	Perception & Learning	10	4
RP1STU**	Student Tutoring	10	4
LA1XXX	University-Wide Language Programme	20	4

~ compulsory to continue to PY2N1X in part 2

** this is an additional voluntary module which does not count towards your 120 credits

Part 2 (three terms)

Compulsory modules

<i>Code</i>	<i>Module title</i>	<i>Credits</i>	<i>Level</i>
AP2EC1	Consumer Behaviour	10	5
AP2EE4	Economics 3	10	5
AP2EM1	Marketing Management	10	5
AP2EQ4	Quantitative Methods 2	10	5
AP2EQ3	Consumer Research Methods	10	5
AP2EX3	Consumer Research Group Project (including Career Management Skills)	10	5
PY2SPX	Social Psychology for Combined Honours	10	5

And a choice of at least 20 credits from the following:

PY2APX	Applied Psychology for Combined Honours	10	5
PY2C1X	Cognition 1 for Combined Honours	10	5
PY2C3X	Cognition 3 for Combined Honours	10	5
PY2DPX	Developmental Psychology for Combined Honours	10	5
PY2N1X*	Neuroscience 1 for Combined Honours	10	5

*(must have completed PY1IN in Part 1)

Optional modules (30 credits):

Students must choose options so that 120 credits are taken in Part 2. These can be from the recommended list below or from across the University subject to timetabling constraints (a maximum of 20 credit points can be taken at level 4). Certain prerequisite requirements must be fulfilled.

AP2EE5	Economics 4	10	5
AP2EM2	Food Retailing	10	5
AP2EM3	Internet Marketing	10	5
AP2EP1	Policy Analysis	10	5
AP2SB1	Business Management	10	5
AP2SB2	Financial Management	10	5
FB2FCI	Food Choice and Regulation	10	5

MM270	Practice of Entrepreneurship	20	5
PY2APX	Applied Psychology for Combined Honours	10	5
PY2C1X	Cognition 1 for Combined Honours	10	5
PY2C3X	Cognition 3 for Combined Honours	10	5
PY2N1X*	Neuroscience 1 for Combined Honours	10	5
PY2DPX	Developmental Psychology for Combined Honours	10	5
PY1IN	Introduction to Neuroscience	10	4
LA1XX1	Institution Wide Language Programme	20	4

* must have completed PY1IN in Part 1

Year abroad/Year away/Additional year (three terms)

Compulsory modules

<i>Mod Code</i>	<i>Module Title</i>	<i>Credits</i>	<i>Level</i>
AP2ST1	Industrial Training	120	5

Part 3 (three terms)

Compulsory modules

<i>Code</i>	<i>Module title</i>	<i>Credits</i>	<i>Level</i>
AP3EC1	Contemporary Issues in Consumer Behaviour	10	6
AP3EM1	Marketing Strategy	10	6
AP3EM3	Advertising and Branding	10	6
AP3EP4	Consumer Policy	10	6
AP3EX2	Individual Project	30	6
AP3EX3	Consumer Research Group Project 2	10	6

Optional modules (40 credits):

Students must choose options so that overall 120 credits are taken in Part 3. Optional modules can be from the recommended list below, **or from across the University subject to timetabling constraints, fulfilment of prerequisite requirements, and approval by the Programme Director**. The idea is that Part 3 students have the flexibility to pick and mix within a multidisciplinary framework to develop their specialisation further (based on completing specific prerequisites from Parts 1 and 2) or to either change focus and concentrate on areas where the student has a specific interest. Up to 20 credits in total in Part 3 can be taken from level 5 modules.

PY3BE**	Behavioural Economics	10	6
PY3ELD**	Early Lexical Development	10	6
PY3SC**	Social Cognition	10	6
PY3CA**	Cognitive Neuropsychology	10	6
PY3IGR**	Improving Intergroup Relations	10	6
PY3LPA**	Lexical Processing and Aphasia	10	6
PY3NUT**	Nutritional Psychology	10	6
AP3EB1*	Business Strategy	10	6
AP3EC2	Consumer Attitudes	10	6
AP3A64	Human Resource Management	10	6
AP3EB3	Supply Chain Management	10	6
FB3GPD	Food Product Development	10	6

*AP3EB1 Business Strategy has a pre-requisite (AP2SB1 Business Management)

** Selection of PY modules is subject to availability and the approval of the Department of Psychology. The **maximum** number of credits from Psychology modules is 30.

Progression requirements

Part 1 Examination and Progression from Part 1 to Part 2

To gain a threshold performance at Part 1 a student shall normally be required to achieve an overall average of 40% over 120 credits taken in Part 1 and a mark of at least 30% in individual modules amounting to not less than 100 credits. In order to progress from Part 1 to Part 2 of this programme a student shall normally be required to achieve a threshold performance at Part 1 and achieve a credit weighted average mark of not less than 40% over each of the following two sets of compulsory modules and a minimum mark of not less than 30% in each compulsory module.

Set 1

AP1EE1 Economics 2
AP1EE3 Economics 1
AP1EM1 Introduction to Marketing
AP1EQ3 Qualitative Research Methods
AP1EQ4 Quantitative Methods 1
AP1EX1 Applied Project (on Consumer Trends)
AP1SB1 Introduction to Management

AND

Set 2

PY1CA Cognition & Applied Psychology
PY1DS Developmental & Social Psychology 1

If you gain a threshold performance at Part 1 and do not proceed to achieve a higher award, you are eligible to receive the award of Certificate of Higher Education. The Part 1 Examination does not contribute to the classification of your degree.

Part 2 Examination and Progression from Part 2 to Part 3

The Part 2 Examination is used to assess a student's suitability to proceed to Part 3 of their programme. It also determines eligibility for the Diploma of Higher Education.

In addition, the marks achieved in the Part 2 Examination contribute to the classification of your degree. To gain a threshold performance at Part 2 a student shall normally be required to achieve:

an overall average of 40% over 120 credits taken in Part 2 (of which not less than 100 credits should normally be at level 5 or above), and a mark of at least 30% in individual modules amounting to not less than 100 credits.

In order to progress from Part 2 to Part 3, a student shall normally be required to achieve a threshold performance at Part 2. If you gain a threshold performance at Part 2 and do not proceed to achieve a higher award, you are eligible to receive the award of Diploma of Higher Education.

Progression from Part 2 to the placement year is dependent on successfully completing the application process set by the placement providers. You are ultimately responsible for finding a suitable placement, although the School will help to identify potential employers. The placement year module is assessed by coursework: including a presentation, reflective report and employer report; and does not contribute to your final degree mark, although recognition of the completion of an industrial placement will appear on your degree transcript. If you are unable to find a suitable placement, or if you progress from Part 2 to the placement year but fail to successfully complete the placement year module, you will be permitted to transfer to Part 3 of the BSc Consumer Behaviour and Marketing.

Part 3 Examination

The classification of the degree will normally be based on the marks for Part 2 and Part 3 modules, weighted in a ratio of 1:2. Full details of classification conventions (that is, the rules for determining your final degree award) can be found in your Programme Handbook.

Summary of Teaching and Assessment

Teaching is organised in modules that typically involve a combination of lectures and seminars. During Part 1 some lecture-based modules are supported by workshops or computer lab sessions or visits to businesses in market research sectors. The individual and group project modules include skills workshops and progress meetings with the project supervisor. Modules are assessed by a combination of course work and formal examination; some, like the project modules, are wholly course work assessed. Course work assignments include essays, problem solving exercises, short project reports, and presentations. The Placement year assessment is designed to encourage critical reflection of the experience.

Admission requirements

Entrants to this programme are normally required to have obtained: Grade C or better in Mathematics at GCSE level or equivalent; and A minimum UCAS Tariff of 300 points overall, including two full A-levels but excluding General Studies; or a good pass in an Access Course; or International Baccalaureate (30 points). To complete any optional modules from Food, Nutrition & Health students are required to have passed either chemistry or biology at A-level. Key skills attainment may also be taken into account in deciding whether to make an offer.

Admissions Tutor: Dr E Millan

Support for students and their learning

University support for students and their learning falls into two categories. Learning support is provided by a wide array of services across the University, including: the University Library, the Careers, Placement and Experience Centre (CPEC), In-session English Support Programme, the Study Advice and Mathematics Support Centre teams, IT Services and the Student Access to Independent Learning (S@il) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, School Senior Tutors, the Students' Union, the Medical Practice and advisers in the Student Services Centre. The Student Services Centre is housed in the Carrington Building and offers advice on accommodation, careers, disability, finance, and wellbeing, academic issues (eg problems with module selection) and exam related queries. Students can get key information and guidance from the team of Helpdesk Advisers, or make an appointment with a specialist adviser; Student Services also offer drop-in sessions and runs workshops and seminars on a range of topics. For more information see www.reading.ac.uk/student

All students are issued with a comprehensive 'Programme Handbook' at the beginning of the degree which includes a detailed outline of the programme, its constituent modules and assessment guidelines. Day-to-day queries regarding academic matters (e.g. timetabling) should be addressed in the first instance to the School Undergraduate Student Office or, where necessary, the Programme Director.

Career prospects

Graduates from this degree will be well equipped with a portfolio of marketable skills which have a multidisciplinary focus. It will enable them to develop careers in institutions, companies or organisations (public, private and voluntary) that work with or for the consumer. Areas where consumer behaviouralists are desired include the consumer marketing, communications, customer services, public relations and market research sectors as well as other professions with a range of commercial functions from small family businesses to multinational corporations. A number of our graduates may begin their careers in retail management. Equally the wide skills base of the degree enables graduates to go on to work in a wide range of other sectors of industry, in professions such as the health and social services, consumables such as clothing and textiles, and trade associations.

Graduates could secure positions in government or market research, human resources, as supervisors/managers and customer services personnel as well as positions in advertising and marketing companies, media, banks, financial services, education and training, health or social services. Further, graduates who have taken options in food, health and nutrition may seek potential employment in the public or private sectors such as food and retail companies within the areas of market research, product development, quality assurance/control, sales, advertising and marketing and human resources, as well as more generally seeking employment in banks, financial services, education and training, health or social services. The placement year enables students to experience an aspect of a potential career. Many placement students are offered a position on the host company's Graduate Recruitment Scheme.

Opportunities for study abroad or for placements

Programme Outcomes

Knowledge and Understanding

A. Knowledge and understanding of:

Key principles and problem solving techniques of marketing (Introduction to Marketing, Marketing Management and Marketing Strategy), consumer behaviour (Applied Project on Consumer Trends, Consumer Behaviour, Advertising & Branding and Consumer Policy), and three core domains in psychology (Perception & Learning, Cognition & Applied Psychology and Developmental & Social Psychology).

Concepts, theory and evidence in consumer behaviour (Consumer Behaviour, Advertising & Branding and Consumer Policy).

A broad variety of research methods and data analysis (Qualitative and Quantitative Methods 1 & 2, and Consumer Research Methods).

The key economic, marketing and policy challenges related to consumers and facing decision makers and how to address them (Marketing Management and Marketing Strategy, Economics 1, Economics 2A, Consumer Policy).

A selection of further optional topics within psychology, food, nutrition and health as well as other subject areas such as the food industry, business or management and politics, dependent on option choices.

The range of careers open to graduates in consumer behaviour, marketing, applied economics and applied psychology.

Specific industrial careers via the placement scheme.

Teaching/learning methods and strategies

The modules in the programme address both the professional 'tool kit' of the consumer behaviouralist, the marketer, the applied economist and the applied psychologist. As the programme develops the focus centres more on 'applications' in consumer behaviour, although extensions to theory continue to be developed.

Knowledge and understanding is gained through a framework of lectures, seminars, industry visits, and practical classes, reinforced and extended by guided reading. A variety of course work gives further opportunities for building knowledge and the application of techniques. Individual and group projects enable exploration of selected consumer topics in greater depth. The group project is a consumer-based market research project for a commercial or public sector client whereby students gain hands-on experience of how their degree studies apply to the real world. Industry visits provide insights into potential career paths. The placement year will develop practical skills specific to the host organisation/industry.

Assessment

Combinations of coursework and formal examinations are used to assess basic knowledge. Project reports, oral presentations, and problem-solving exercises contribute to final assessment

Skills and other attributes

B. Intellectual skills - able to:

Assimilate, evaluate and synthesise knowledge from a variety of academic and other sources

To discriminate between relevant and irrelevant information

Think logically

Develop and present coherent, structured and well balanced arguments

Analyse problems and to apply appropriate problem solving techniques

Plan, conduct and report on a research project both individually and as part of a team

Teaching/learning methods and strategies

Critical evaluation of the literature and the application of marketing/economic and psychological methods are developed through a variety of modules. Skills 5 and 6 are addressed explicitly by the second year module 'Consumer Research Methods' and the individual and group projects

Assessment

Most parts of the programme assess these skills through a combination of coursework and formal examination. Essay writing skills are developed initially through applied projects and tutorials in Part 1.

C. Practical skills - able to:

Teaching/learning methods and strategies

Collect, analyse and interpret market and economic and other socio-psychological data
Construct marketing plans
Appraise investment projects
Plan and execute a research project
Draft written reports
Perform in an industrial setting

Development of these skills feature in a number of the compulsory modules in Parts 1 and 2, in preparation for using these skills in the Consumer Research Group Project in Part 3. For example: skill 1 is addressed by Qualitative Research Methods and Quantitative Methods 1 in Part 1; Quantitative Methods 2 and Consumer Research Methods in Part 2. Significant use of case studies - both real and hypothetical - are used to demonstrate these skills.

Assessment

These skills are assessed by a combination of course work, including computing skills, and examination.

D. Transferable skills - able to:

Use IT (word processing, spreadsheets, statistical packages and databases).
Communicate ideas in a variety of written styles and lengths
Give oral presentations to small and large groups
Make effective contributions to group discussions and ask well-considered questions
Effectively use library and WWW resources to search and retrieve information
Manage time effectively
Work as part of a team
Plan personal development and career

Teaching/learning methods and strategies

Many of the transferable skills are embedded within a wide variety of modules within the degree. Use of IT for information searching, and data management and analysis occurs within individual modules, for example Consumer Research Methods. Development of career management skills largely takes place within the group project module in Part 2. This makes extensive use of a computer-based learning package. Personal development planning is encouraged through tutorials and 'ilearn'. Team working is a major component of the group project module but also features in a number of other modules.

Assessment

Transferable skills are largely assessed through course work assignments.

Please note - This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in the module description and in the programme handbook. The University reserves the right to modify this specification in unforeseen circumstances, or where the process of academic development and feedback from students, quality assurance process or external sources, such as professional bodies, requires a change to be made. In such circumstances, a revised specification will be issued.
