### **Summary of programme aims**

The MA in English Language Teaching (MAELT) programme is designed especially for those currently working or intending to work in the field of English as a second / foreign language, and has courses in language description, and in pedagogy-and administration-related fields with this audience in mind. Students are given an up-to-date knowledge of principles and issues in areas of importance to language learning and assessment, and investigate their practical implications. They receive a thorough grounding that will help them to develop their career as a teacher, trainer, researcher or manager.

### **Transferable skills**

In addition to those skills which all students are expected to have developed by the end of their degree programme, it is envisaged that MAELT students will have developed or enhanced the following more specific transferable skills:

- analysing and categorising, and hence evaluating, language at different levels;
- designing curricula and syllabi on the basis of data provided;
- synthesising, analysing and evaluating information and theoretical claims in specialist literature;
- giving well-organised, clear oral presentations to a specialist or semi-specialist audience;
- producing well-structured and clearly-written academic and professional papers;
- collaborating with others in research, problem-solving and/or the development of plans and recommendations;
- using time efficiently while carrying out reading, research and related writing activities.
- (for dissertation-track students) designing and conducting a research project, including a clear statement of research aims, identifying and searching relevant bibliographical sources, conducting an empirical or library-based investigation, and analysing and interpreting results in relation to established theory and professional concerns;
- (for portfolio-track students) observing critically and analysing classroom events, designing lesson plans and materials for language learners, delivering and evaluating micro-teaching practice sessions.
- 

### **Programme content**

The following profile states which modules must be taken (the compulsory part), together with lists of modules from which students must make a selection (the option modules).

The MAELT programme allows students some freedom to suit their own needs, but with a shared foundation of compulsory core modules. The latter combine with option modules which may be selected from a range of available subjects within the School. A special feature of the programme is that it has three tracks, with dissertation (referred to as the 'dissertation track'), with modules in place of the dissertation (the 'taught track'), and by way of language teaching portfolio (the 'portfolio track'). In addition, there is a distance study version of the taught track and dissertation tracks permitting study entirely away from Reading, or a combination of distance and campus-based study. [A separate programme specification is available for the distance study programme.]

The compulsory modules are divided into three areas: English language description, language teaching/learning, and (for dissertation track) research, or (for portfolio track) teaching observation and practice. The English language description modules run in the Autumn term, and language learning and teaching modules in the Autumn and Spring terms. The research area comprises a research design and basic statistical methods (taught in the Spring Term) and the dissertation, of 15,000 words, on a topic in the field of English Language Teaching, broadly defined. Research for, and the writing of, the dissertation take place in the Summer term and the

Summer vacation. The teaching portfolio comprises a number of assessments related to the observation of classroom practice, design and development of language teaching material, and reflective accounts of experiences delivering materials in classroom contexts.

The option modules cover a wide range of pure and applied areas (with an emphasis on the latter) and, together with the dissertation, provide flexibility and the opportunity for specialisation in the greater part of the programme.

The following profile states which modules must be taken (the compulsory modules), together with lists of modules from which students must make a selection (the option modules). In consultation with their programme adviser, students must choose 3 option modules (each of 20 credits) if following the dissertation or portfolio tracks, and 6 option modules (each of 20 credits) if following the taught track, to make a total of 180 credits when combined with the other programme modules and the dissertation or teaching portfolio (where relevant). The number of credits for each module is shown after its title.
