Summary of programme aims

The purpose of the programme is to provide a route to study and to a first qualification in language-based area studies for candidates who are unable for reasons which the Department of Modern Languages and European Studies judged to be appropriate and adequate to undertake (or, having embarked on, to complete) one of the four-year programmes including a year abroad which are offered by the Department of Modern Languages and European Studies.

The programme aims to provide a thorough degree-level education in European Studies which focuses on the evolution, structure, institutions and impact of the European Union, and a sound knowledge of the most important contemporary issues facing the on-going process of European integration. It also enables students to achieve a strong working knowledge of at least one major European language. This programme is distinctive in its emphasis on the application of both multi- as well as interdisciplinary skills and techniques. Students will expand the range, depth and sophistication of their knowledge of European Studies through the structured progression of the programme through Parts 1 to 3.

Transferable skills

During the course of their studies at Reading, all students will be expected to enhance their academic and personal transferable skills. In following this programme, students will have had the opportunity to develop such skills, in particular relating to career management, communication (both written and oral), information handling, numeracy, problem-solving, team working, use of IT and will have been encouraged to further develop and enhance the full set of skills through a variety of opportunities available outside their curriculum.

The core modules in Part 1 give students a solid grounding in European history since the late eighteenth century, with major themes including the development of the nation state; the two world wars; fascism; Europe's position in the Cold War; the development of European integration; and the reunification of Europe in the post-1989 era. Part 2 offers a more detailed focus on European integration and on the complex issues of nationalism and identity that surround it. In Part 3, a case study approach, plus the dissertation, allow students to research contemporary European issues in greater depth. In parallel to the core modules, students will normally take at least 40 credits in a major European language throughout their time in Reading.

Around the core modules, students choose additional options within one or more of the following areas: (a) Politics, (b) Economics, (c) History, (d) History of Art, (e) Classics and (f) Language and Culture (either additional modules in a single major European language, or modules in a second European language, which may be a major or minor). The pre-requisites for modules within these areas, which contribute to the coherence of the programme of study, should be given particular attention by each student in planning his or her syllabus. Not all options will necessarily be available every year. Admission to options will be at the discretion of the Programme Directors of the departments concerned.

Support for students and their learning

University support for students and their learning falls into two categories. Learning support is provided by a wide array of services across the University, including: the University Library, the Careers, Placement and Experience Centre (CPEC), In-sessional English Support Programme, the Study Advice and Mathematics Support Centre teams, IT Services and the Student Access to Independent Learning (S@il) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, School Senior Tutors, the Students' Union, the Medical Practice and advisers in the Student Services Centre. The Student Services Centre is housed in the Carrington Building and offers advice on accommodation, careers, disability, finance, and wellbeing, academic issues (eg problems with module selection) and exam related queries. Students can get key information and guidance from the team of Helpdesk Advisers, or make an appointment with a specialist adviser; Student Services also offer drop-in sessions and runs workshops and seminars on a range of topics. For more information see www.reading.ac.uk/student

Programme and Year Handbooks give guidance on essay writing and other practical matters. The Programme Director also acts as a course advisor to offer advice on the choice of modules within the programme, and there is specialist guidance from the language departments on placements abroad.
