Summary of programme aims

The central aim of the programme is to develop students' critical understanding of film and modern theatre as cultural forms in their own right and in terms of their historical relationships. Students will become familiar with the varied achievements of film and theatre practitioners, developing critical skills through close study of films, plays and theatre performances, underpinned by debates and theories which have influenced analysis of theatre and cinema. Students also undertake practical work, closely informed by critical issues ('critical practice'), which is designed both to extend understanding of how film and theatre create meaning, and to develop appropriate practical expertise. The course also incorporates the study of television in similar terms, and by similar methods, which students can make a larger or smaller part of their studies according to the options pursued.

Transferable skills

During the course of their studies at Reading, all students will be expected to enhance their academic and personal transferable skills. In following this programme, students will have had the opportunity to develop such skills, in particular relating to communication, interpersonal skills, learning skills, self-management, use of IT and problem-solving, and will have been encouraged to further develop and enhance the full set of skills through a variety of opportunities available outside their curriculum.

In addition, on completion of this programme, students are expected to have developed a range of specific transferable skills including: critical analysis and coherent argument; the ability to formulate and evaluate their own arguments and those of others; researching and evaluating evidence; effective communication using the methods of theatre and/or video; undertaking self-directed, independent work; developing projects through co-operation and dialogue; taking leadership and management roles; effective time management.

Teaching styles are varied to encourage active engagement by students, to encourage independence and foster initiative and effective time management. Interaction in seminars is central to the programme and weekly seminars are common to all critical modules, with lectures designed to provide informing perspectives for the module and for individual seminars. Theatre visits are integral to the programme. Practical modules are taught through group and individual projects, based on workshops, group work and tutorials. The Dissertation and Independent Project modules in Part 3 are supported by individual supervision. Assessment of critical modules is by coursework, which includes formal essays as well as other written assignments such as take-away exam questions. In practical modules assessment is by a combination of practical work and critical documentation. The weighting between Part 2 and Part 3 for classification purposes is 33% and 67%. Assessment criteria for each of the Levels are given in the appropriate Departmental Handbook.

Admission requirements

ABB/AAC from three A level subjects. We welcome applications from students with a wide range of A Level subjects but applications need to demonstrate interest and enthusiasm for our subject areas.

Support for students and their learning

University support for students and their learning falls into two categories. Learning support is provided by a wide array of services across the University, including: the University Library, the Careers, Placement and Experience Centre (CPEC), In-session English Support Programme, the Study Advice and Mathematics Support Centre teams, IT Services and the Student Access to Independent Learning (S@il) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, School Senior Tutors, the Students' Union, the Medical Practice and advisers in the Student Services Centre. The Student Services Centre is housed in the Carrington Building and offers advice on accommodation, careers, disability, finance, and wellbeing, academic issues (eg problems with module selection) and exam related queries. Students can get key information and guidance from the team of Helpdesk Advisers, or make an appointment with a specialist adviser; Student Services also offer drop-in sessions and runs workshops and seminars on a range of topics. For more information see www.reading.ac.uk/student

Students in the Department of Film, Theatre & Television receive a Handbook, which gives details of the Programme, guidance on study skills such as note-taking and essay writing, and information about staff, facilities, and sources of specialised help within the University, such as the Study Skills Advisor and the Counselling Service. Academic feedback and guidance is given through detailed written comments. Academic and personal support for students in their studies is also provided through the University's personal tutor system, in which students meet their personal tutors regularly to review their progress. This is supported by the University's Personal Development Planning (PDP) scheme. From a highly structured introduction in Part 1, in Parts 2 and 3 students take increasing responsibility for their learning and module choice. In practical work the move to individual projects is supported by detailed supervision and advice. The Department has a range of specialist studio and theatre spaces, together with extensive technical facilities for small scale production in theatre and digital video. It also houses an extensive collection of films and television programmes. The Library has an extensive collection of printed materials as well as electronic databases, holding one of the country's

leading academic collections of film and modern theatre material. Specialist subject librarians are available to give students advice and guidance to library resources.

Career learning

Careers planning and professional skills development is an integral part of the Department's degree programmes, and there are regular visits from alumni and industry professionals.

At Part 2 careers management skills training is embedded into the Practical Option and Part 2 Independent Project, and includes seminars, presentations from alumni and industry professionals, and projects designed to develop students' competencies in key areas, such as professional self-presentation, digital identity, effective CV-writing, and pitching for funding.

Career prospects

Career possibilities for Reading graduates in Film & Theatre are very wide ranging. The combination of scholarly rigour and practical expertise, of group work and individual practice, gives students the opportunity to develop a highly competitive range of transferable skills sought by employers, including: leadership, initiative, collaboration and negotiation, research, analysis, management, articulacy and expression in a range of different media.

Graduates find that the specific and transferable skills developed by the programme enable them to enter many fields of work, including television, film, radio, theatre, arts management, visual effects, journalism, corporate video, advertising, marketing, public relations, the public sector, business and commerce. Many graduates also go onto to postgraduate study at MA and PhD levels, both at Reading and elsewhere.

Opportunities for study abroad

As part of the degree programme students have the opportunity to study abroad at an institution with which the University has a valid agreement, either within Europe via the ERASMUS programme or at one of the University's non-European partner institutions. The period in which students can study abroad is Autumn Term of Part 2. They will require the consent of the department study abroad coordinator and the department Director of Teaching and Learning in order to participate. Key partner institutions for students in the Department of Film, Theatre & Television currently include Rhode Island, Georgia and Mississippi (USA), and Monash (Australia). Full details of potential destinations can be found on the Erasmus & Study Abroad website. Whilst every effort is made to place students at the institution of their choice, the University cannot guarantee students the possibility to study at a particular institution.

Placement opportunities

Students have the opportunity to undertake a work placement in their second and third years, in the 10-credit Work-Based Learning module. After the work placement has been completed, the module requires the student to critically reflect in writing on the arts or media organisation in which they have worked, and on their own career development and transferable skills. Students must notify the department placements officer well in advance of taking up a placement or work experience opportunity if they wish it to form the basis of their participation in the Work-Based Learning module. Students are supported in identifying and applying for placements by the Placements and Development support team in The Careers Centre.
