

BSc Psychology with Neuroscience
For students entering Part 1 in 2015/6

UCAS code: C8B1

Awarding Institution:	University of Reading
Teaching Institution:	University of Reading
Relevant QAA subject Benchmarking group(s):	Psychology
Faculty:	Life Sciences Faculty
Programme length:	3 years
Date of specification:	12/Jul/2016
Programme Director:	
Programme Advisor:	
Board of Studies:	Psychology
Accreditation:	British Psychological Society Graduate Basis for Chartered Membership

Summary of programme aims

This is a Psychology programme with an emphasis on Biological Psychology and Neuroscience, provision of Neuroscience available within the Department of Psychology being supplemented by relevant optional modules from other Schools. Students would be introduced to the wide range of approaches that constitute modern Psychology as a social AND biological science, and to concepts and evidence within the domains of the subject required for British Psychological Society accreditation, which are covered in the Part 2 core modules. A substantial proportion of work at Part 3 will be devoted to Biological Psychology and Neuroscience, focusing upon recent findings made possible by the advancement of neuroimaging (fMRI, PET) and other techniques of Cognitive Neuroscience (EEG, TMS) which are routinely used within the School and within CINN. Students may also choose to take optional modules in computational neuroscience, leading to a broader understanding of brain function as computation.

Transferable skills

During the course of their studies at Reading, all students will be expected to enhance their academic and personal transferable skills. In following this programme, students will have had the opportunity to develop such skills, in particular relating to written and oral communication, interpersonal skills, learning skills, numeracy, self-management, use of IT, problem-solving, project management and reporting, and will have been encouraged to further develop and enhance the full set of skills through a variety of opportunities available outside their curriculum.

Programme content

This is primarily focused on biological psychology, neuropsychology and cognitive and affective neuroscience, all of which can be provided from within the School. The psychology content will also necessarily be broad enough to meet BPS accreditation requirements (notably at Part 2). Relevant optional modules from other Schools are also identified below. For the most part, these are stand-alone modules with no necessary pre- or co-requisites but, with the agreement of the School of Systems Engineering, there is a possible route for interested students to follow a course of modules in computational neuroscience and artificial neural networks, which would provide students with a broader appreciation of the neural foundations of cognitive science and intelligent function, analytical techniques in neuroscience, and neurodynamics.

Part 1 (three terms)

Compulsory modules

Compulsory modules (100 credits)

<i>Code</i>	<i>Title</i>	<i>Credits</i>	<i>Level</i>
PY1PR	Psychological Research	20	4
PY1PC	Perception	10	4
PY1IN	Introduction to Neuroscience	10	4
PY1CG	Cognition and Learning	10	4
PY1DV	Developmental Psychology	10	4
SE1FA15*	Fundamentals and Applications of Computing	20	4
And either			
PY1SK	Skills for Psychology	20	4
Or			
PY1SKE	Skills for Psychology with Academic Language	20	4

Optional modules

Students may choose from the range available across the University, but it is strongly recommended that up to 20 credits be chosen from the following:

<i>Code</i>	<i>Title</i>	<i>Credits</i>	<i>Level</i>
PY1CL	Clinical Psychology	10	4
PY1PAW	Psychology at Work	10	4
PY1DIP	Debates in Psychology	10	4
PY1AP	Applied Psychology	10	4
SE1PR11*	Programming	20	4

*These modules are pre-requisites for choosing the Part 2 modules SE2MI11 Machine Intelligence and SE2NN11 Neural Networks

Part 2 (three terms)

Compulsory modules

Compulsory modules (40 credits)

<i>Code</i>	<i>Title</i>	<i>Credits</i>	<i>Level</i>
PY2RM	Research Methods and Data Analysis	20	5
PY2CP*	Careers in Psychology	20	5
PY2CN	Cognition	20	5
PY2NS	Neuroscience	20	5

Optional modules (80 credits)

Either

<i>Code</i>	<i>Title</i>	<i>Credits</i>	<i>Level</i>
PY2PS	Personality and Social Psychology	20	5
PY2TA	Typical and Atypical Development	20	5

Or

To allow students to take 20 credits from outside Psychology and Clinical Language Sciences e.g. a foreign language, Computer Science or Biological Science module, you may substitute PY2PS and PY2TA for the combined Subject module PY2DSP

<i>Code</i>	<i>Title</i>	<i>Credits</i>	<i>Level</i>
PY2DSP	Developmental and Social Psychology	20	5

British Psychological Society Graduate Basis for Chartered Membership (GBC)

Students must gain Lower Second Class Honours or higher to qualify for BPS GBC. Part 2 modules PY2RM + PY2TA + PY2PS + PY2NS + PY2CN (or PY2RM + PY2CN + PY2NS + PY2DSP) are the minimum required for BPS accreditation. All the modules from this list that are taken must be passed with at least 40%. Subject to these constraints, students may choose up to 20 credits from those available across the University, for example a foreign language, or a Computer Science or Biological Science module.

See also PY3P Project.

*Please note - PY2CP is not required for students wishing to transfer to BSc Psychology with Neuroscience at the end of Part 2 providing all other criteria are met.

Part 3 (three terms)

Compulsory modules

Compulsory modules

<i>Code</i>	<i>Title</i>	<i>Credits</i>	<i>Level</i>
PY3P	Project	40	6
PY3CHI	Contemporary and Historical Issues	20	6

BSc Psychology with Neuroscience student projects must be conducted in the general area of biological psychology or neuroscience. Those not following this will be transferred to BSc Psychology.

British Psychological Society Graduate Basis for Chartered Membership (GBC)

To qualify for BPS accreditation, the Project must be passed with at least 40%

By agreement of the Programme Director, students may substitute up to 20 credits worth of Level 6 or 5 modules outside those listed below and Psychology and Clinical Language Science. Normal substitution is of PY3PE and an optional 10 credit module.

Recommended modules

<i>Code</i>	<i>Title</i>	<i>Credits</i>	<i>Level</i>
PY3PE	Public Engagement	10	6

Optional modules

A minimum of 30 credits from neuroscience related modules such as the following:

<i>Code</i>	<i>Title</i>	<i>Credits</i>	<i>Level</i>
PY3AV	Active Vision	10	6
PY3CAN	Cognitive & Affective Neuroscience	10	6
PY3CA	Cognitive neuropsychology of Ageing	10	6
PY3DN	Developmental Neuroscience	10	6
CS3SL16*	Social, Legal and Ethical Aspects in Engineering	10	6

*Where pre-requisites have been met

Students Studying Abroad during the Autumn term will normally take:

Compulsory modules

<i>Code</i>	<i>Title</i>	<i>Credits</i>	<i>Level</i>
PY3P	Project	40	6
PY3SA5	Study Abroad	50	6
PY3C	Contemporary Issues	10	6

Optional modules

Modules to the value of 20 credits chosen from the list of Psychology and Clinical Language Sciences options available.

Progression requirements

To gain a threshold performance at Part 1 a student shall normally be required to achieve an overall average of 40% over 120 credits taken in Part 1, and a mark of at least 30% in individual modules amounting to not less than 100 credits. In order to progress from Part 1 to Part 2, a student shall normally be required to achieve a threshold performance at Part 1 and to have obtained at least 40% in the Psychology modules PY1PR, and PY1SK or PY1SKE.

In order to progress from Part 2 to Part 3 in BSc Psychology with Neuroscience, a student should normally be required to achieve a threshold performance at Part 2. In addition, all modules that are taken from the list above under British Psychological Society Graduate Basis for Chartered Membership (GBC) must be passed with at least 40%.

To be eligible for Honours students must pass the Project module.

The University's honours classification scheme is:

<i>Mark</i>	<i>Interpretation</i>
70% - 100%	First class
60% - 69%	Upper Second class
50% - 59%	Lower Second class
40% - 49%	Third class
35% - 39%	Below Honours Standard
0% - 34%	Fail

The weighting of the Parts/Years in the calculation of the degree classification is Part 2 one-third Part 3 two-thirds.

Summary of Teaching and Assessment

Part 1 and Part 2 modules are principally taught by lectures. Part 2 lectures and Part 3 options are supported by seminars. Some modules include practical work, either in large groups (Part 1) or in small groups or individually (Part 2 and Part 3 project). Modules are typically assessed by a mixture of coursework and formal examination; some modules are assessed 100% by coursework and some are assessed 100% by examination. At Part 1 the coursework principally constitutes essays and summaries, presentations and practical reports; at Part 2, essays and project reports; at Part 3, essays, presentations (e.g. oral presentations, poster) and the Project report. The proportion of credit for coursework relative to examinations increases from Part 1 to Part 3 as students become more independent.

The assessment is carried out within the University's degree classification scheme, details of which are in the programme handbooks. The pass mark in each module is 40%.

Admission requirements

Entrants to this programme are normally required to have obtained: Grade B in Mathematics, Sciences, English in GCSE; and to have achieved: A Levels: AAA / AAB; or

International Baccalaureat Diploma: 6,6,6/6,6,7 at higher level plus at least 5 in Ordinary Mathematics; or

Irish Leaving Certificate: AAAAB; or

Access Course: Level 3 Distinctions and Merits

Admissions Tutor: Dr Rachel McCloy

Support for students and their learning

University support for students and their learning falls into two categories. Learning support is provided by a wide array of services across the University, including: the University Library, the Careers, Placement and Experience Centre (CPEC), In-session English Support Programme, the Study Advice and Mathematics Support Centre teams, IT Services and the Student Access to Independent Learning (S@il) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, School Senior Tutors, the Students' Union, the Medical Practice and advisers in the Student Services Centre. The Student Services Centre is housed in the Carrington Building and offers advice on accommodation, careers, disability, finance, and wellbeing, academic issues (eg problems with module selection) and exam related queries. Students can get key information and guidance from the team of Helpdesk Advisers, or make an appointment with a specialist adviser; Student Services also offer drop-in sessions and runs workshops and seminars on a range of topics. For more information see www.reading.ac.uk/student

Career learning

Career prospects

Because the degree is accredited by the British Psychological Society, graduates are qualified to enter professional training as, for example, clinical or educational psychologists. Graduates of this programme will have studied the psychology of human development both broadly and in depth, and will be particularly well prepared for employment or further training in fields such as education, the care and treatment of children, or work with families. Psychology graduates generally move into an extremely wide range of careers with some bias towards health and education, but extending to many other professional roles. As numerate scientists they also enter a wide variety of other commercial and business occupations. Many go on to postgraduate training.

Opportunities for study abroad

At Part 1, there is a work placement component in PY1PAW and at Part 2, there is a work placement component in PY2CP. Throughout the course there are opportunities to engage in volunteer work. Towards the end of Part 2 students can apply for a summer vacation placement which involves working with a member of academic staff on a research project in the Department.

Students who will wish to study abroad during Autumn Term of their Final Year, should consult the School's Study Abroad Advisor early in Part 2 to discuss current opportunities. Students can take part in the Erasmus Exchange Scheme or spend a term in Canada, the USA or Australia.

Placement opportunities

At Part 1, there is a work placement component in PY1PAW and at Part 2, there is a work placement component in PY2CP. Throughout the course there are opportunities to engage in volunteer work. Towards the end of Part 2 students can apply for a summer vacation placement which involves working with a member of academic staff on a research project in the Department.

Students who will wish to study abroad during Autumn Term of their Final Year, should consult the School's Study Abroad Advisor early in Part 2 to discuss current opportunities. Students can take part in the Erasmus Exchange Scheme or spend a term in Canada, the USA or Australia.

Programme Outcomes

Knowledge and Understanding

A. Knowledge and understanding of:

1. Concepts, theories and evidence in six core domains: research methods, individual differences, biological, cognitive, developmental and social psychology
2. A broad variety of methods and approaches used in psychological research
3. Practical applications of psychological theory and research
4. A selection of optional specialist topics, studied in depth using up-to-date research evidence
5. Ethical issues in research and appropriate conduct by researchers

Teaching/learning methods and strategies

1-3 are covered in lectures and seminars. 2 is further supported by practical classes and exercises, miniprojects and Part 3 projects. Part 3 options cover 4 and extend 1-3 to a more advanced level. Students learn about 5 from participating in research studies in which the principles are made explicit, from lectures, and while planning the Part 3 project.

Assessment

1-4 are assessed by unseen or open-book examinations, coursework essays and other exercises, and reports on empirical work. The Part 3 project assesses both 5 in the plan and final report, and 2 through the rationale for the choice of methods.

Skills and other attributes

B. Intellectual skills - *able to*:

1. Use evidence-based reasoning to argue or evaluate a claim
2. Apply multiple perspectives and levels of explanation to understand behaviour
3. Critically evaluate the design and conduct of psychological research
4. Write well-structured and well-argued essays
5. Integrate material from different fields of psychology and cognate areas

Teaching/learning methods and strategies

1-3 are explicated in lectures and option seminars. Part 3 option seminars focus strongly on 1 and 3. The Contemporary Issues module is not formally taught but gives scope for all of 1-5, especially 4. Essays, increasing in length through the programme, provide practice in 1-5 with formative feedback.

Assessment

1-4 are assessed in examinations and coursework. 5 is a marker of high-quality work throughout, and is emphasised in the Contemporary & Historical Issues module (assessed by a pre-seen and planned examination paper).

C. Practical skills - *able to*:

1. Search for information, using suitable sources, about a specific topic

Teaching/learning methods and strategies

Dedicated modules using lectures, practical classes and exercises cover 1, 2 and the principles

2. Choose and apply appropriate data-analytic techniques
3. Plan and carry out empirical studies with guidance or supervision
4. Write reports on empirical studies

underlying 3. Further learning of 3 and 4 takes place through practical classes, Part 2 miniprojects and the Part 3 project.

Assessment

2-4 are assessed in reports on practical classes. Miniproject reports, the Part 3 project plan and report assess all 4 skills. 1 is also assessed in extended essays and in the Contemporary & Historical Issues module.

D. Transferable skills - able to:

1. Communicate information concisely or at length in writing
2. Give oral presentations
3. Work with a group
4. Plan and implement a project
5. Solve practical problems
6. Use IT to write, to present information visually, to manage and analyse numeric data, to communicate and to find information
7. Manage time
8. Start planning a career

Teaching/learning methods and strategies

Transferable skills are integrated in subject-based teaching. 1 is learned, with formative feedback, through essays and other exercises while 2 is included in seminars especially at Part 3. 3 is required in small-group miniprojects; these, and the Part 3 project, entail 4 and 5. Special classes cover 6, and IT resources are applied throughout the programme. Staged deadlines for coursework encourage 7. 8 forms part of a Part 2 module.

Assessment

1 is assessed in coursework and examinations, 2 within Part 3 seminars. 3 (team participation) forms part of miniproject assessment while 4 and 5 are necessary for miniprojects and the Part 3 project. 6 and 7 are required for most coursework. 8 is the subject of assignments in the relevant module.

Please note - This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in the module description and in the programme handbook. The University reserves the right to modify this specification in unforeseen circumstances, or where the process of academic development and feedback from students, quality assurance process or external sources, such as professional bodies, requires a change to be made. In such circumstances, a revised specification will be issued.
