

MSc in Nutrition and Food Science (full-time)
For students entering in 2017/8

Awarding Institution:	University of Reading
Teaching Institution:	University of Reading
Relevant QAA subject Benchmarking group(s):	
Programme length:	1 year
Date of specification:	15/Aug/2017
Programme Director:	Dr David Jukes
Board of Studies:	MSc Programmes in Food Science Food
Technology Quality Assurance and Nutrition and Food Science	

Summary of programme aims

This MSc programme is for those wishing to develop a career in food-related research or the food industry and focuses on the interface between human nutrition and food science. The expected outcomes are that students should acquire and be able to demonstrate:

- an understanding of the subjects at the interface between human nutrition and food science.
- an understanding of the chemical behaviour and physical properties of food constituents in the context of their manufacture and storage, particularly from the standpoints of safety and nutrition.
- a capacity to undertake research in nutrition.
- a critical approach to understanding of diet and health issues, the implications for public health and impact on the food chain and associated industries.
- a broad range of transferable employment and interpersonal skills.

Educational aims of the programme

- **Nutrition:** Identify the current issues in nutrition, including consumer concerns impinging on product development in the food industry and influencing nutrition policy.
- **Science Base of Nutrition:** Through a knowledge of metabolism in humans and the relationships between diet and disease, to critically appraise epidemiological and experimental data used in deriving dietary recommendations aimed at reducing risk of chronic disease.
- **Food Chemistry:** Apply knowledge of the physical and chemical behaviour of food constituents in the context of the manufacture and storage, and in relation to safety and nutritional attributes.
- **Food Microbiology:** Identify and establish control procedures for all important food pathogens and food spoilage microorganisms. Be informed on microorganisms involved in food fermentation.
- **Sensory Attributes:** Acquire and apply knowledge of sensory tests for the assessment of food quality and consumer preference.
- **Food Choice and Regulation:** Be able to (a) describe the main factors that influence food choice and outline the degree and impact of factors that influence food behaviour; (b) outline the effect of government and community campaigns and commercial advertising strategies on individual food choice; (c) describe the main elements of UK, EU and international food regulation and, with particular reference to health and nutrition, identify and explain current and future legal requirements.

Transferable skills

As part of this programme students are expected to gain or enhance their experience and competences in the following skills: IT (word-processing, use of spreadsheets and databases, use of Web resources), scientific writing, oral presentations, team working, problem solving, use of library resources and time management.

Programme content

MSc students will follow the modules given below making 180 credits; PG Diploma students will take 120 credits (normally excluding the Project).

Compulsory modules (180 credits for MSc; 120 credits for PG Diploma (normally excluding the Project)):

<i>Code</i>	<i>Module title</i>	<i>Credits</i>	<i>Level</i>
STMSE	Statistics and Epidemiology	10	7
FBMFC2	Composition, Properties and Microstructure of Foods	20	7
FBMFSEN	Sensory Evaluation of Food	10	7
FBMNME	Metabolism	10	7
FBMFPR	Project	60	7
FBMNH2	Genes, Lifestyle and Nutrition in Health and Disease	20	7
FBMNS2	Scientific Basis for Nutritional Requirements and Policy	20	7
FBMRS	Postgraduate Research Skills	10	7

Optional modules (20 credits):

(Note: All students are required to take either FBMM1 or FBMM2A)

FBMM1	Food Microbiology	10	7
FBMM2A	Food Microbiology and Safety A	20	7
FBMNCR	Food Choice and Regulation	10	7

Part-time or modular arrangements

The modules may be taken on a part-time basis over a maximum of two years. The taught modules may be taken in an order agreed with the Head of School.

Progression requirements

Diploma / MSc Students meeting the requirements to pass the Diploma may proceed to the MSc at the discretion of the Head of School.

See appended progression requirements for students following a post-experience certificate.

Summary of Teaching and Assessment

The teaching is organised in modules (totalling 180 credits) that involve a combination of lectures, tutorials, workshops, seminars, and practical sessions. Modules taken during the Autumn and Spring Terms (120 credits) will be assessed by a mixture of coursework and formal examinations. The assessment of the remaining 60 credits, which will be based on a practical project or dissertation, will be based on a written report of the work undertaken.

The University's taught postgraduate marks classification is as follows:

Mark Interpretation

70 - 100% Distinction

60 - 69% Merit

50 - 59% Good standard (Pass)

Failing categories:

40 - 49% Work below threshold standard

0 - 39% Unsatisfactory Work

For Masters Degrees

To pass, the MSc students must gain an average mark of 50 or more overall (in 180 credits) including a mark of 50 or more for the dissertation and have a mark of at least 40 in module FBMNS2. In addition the total credit value of all modules marked below 40 must not exceed 30 credits and for all modules marked below 50 must not exceed 55 credits.*

Students who gain an average mark of 70 or more overall including a mark of 60 or more for the dissertation and have no mark below 40 will be eligible for a **Distinction**. Those gaining an average mark of 60 or more overall including a mark of 50 or more for the dissertation and have no mark below 40 will be eligible for a **Merit**.

For PG Diplomas

To pass, the Postgraduate Diploma students must gain an average mark of 50 or more overall (in 120 credits). In addition the total credit value of all modules marked below 40 must not exceed 30 credits and for all modules marked below 50 must not exceed 55 credits.*

Students who gain an average mark of 70 or more and have no mark below 40 will be eligible for the award of a **Distinction**. Those gaining an average mark of 60 or more and have no mark below 40 will be eligible for a **Merit**.

*The provision to permit a candidate to be passed overall with a profile containing marks below 40 is made subject to the condition that there is evidence that the candidate applied his or herself to the work of those modules with reasonable diligence and has not been absent from the examination without reasonable cause.

For PG Certificates

To qualify for a Postgraduate Certificate, students must gain an overall average of 50 or more over 60 credits. In addition, the total credit value of all modules marked below 40 must not exceed 10 credits.

Admission requirements

Entrants to this programme are normally required to have obtained an honours degree in a Pure or Applied Biological Science or an equivalent qualification.

Admissions Tutor: Dr Maria Jose Oruna-Concha

Support for students and their learning

University support for students and their learning falls into two categories. Learning support is provided by a wide array of services across the University, including: the University Library, In-sessional English Support Programme, the Study Advice and Mathematics Support teams and IT Services. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, School Senior Tutors, the Students' Union, the Medical Practice and the Support Centres. If a student has a general enquiry and is unsure where to seek help, they should visit their Support Centre. There are five Support Centres across the University, including one based at the London Road Campus. The Support Centre will be able to advise on matters such as extenuating circumstances, module selection, suspensions, withdrawals, timetable queries and transferring programme. The Support Centre will also be able to signpost students to Carrington building where other University services related to disability, financial support, counselling and wellbeing, accommodation and careers can be found. More information on what student services are available can be found here: <http://student.reading.ac.uk/essentials>.

Career prospects

An MSc degree in Nutrition and Food Science provides a strong platform from which to undertake a wide range of careers, particularly relating to diet and health, in industry, government and education. Our MSc graduates are highly valued for their problem-solving skills and their ability to apply their scientific training to formulate nutrition policy in governmental and commercial arenas, as well as in food-product development. Some students choose to apply their research skills by pursuing a higher degree through research or through research and development in industry.

Opportunities for study abroad or for placements

Students will be able to undertake the 60 credit project module at an approved institution or an appropriate industrial concern, but this will depend on having the necessary linguistic skills, finding a suitable placement, and appropriate supervisory arrangements being in place.

Programme Outcomes

Knowledge and Understanding

A. Knowledge and understanding of:

1. The concepts and methodologies of nutrition to allow critical awareness of their application in devising appropriate diets or food products for target populations.
2. The concepts and techniques of the application of food science to allow the application of nutritional principles to complex food systems in food manufacture.

Teaching/learning methods and strategies

- The knowledge required is provided in formal lectures supported by practical work, seminars and presentations.
- Feedback on student work is provided by the discussion and return of work in tutorials and seminars. All practical work is marked and returned to the student.

Assessment

Most knowledge is tested through a combination of coursework, including oral presentations, and formal examinations, plus a written report of a practical based project.

Skills and other attributes

B. Intellectual skills - able to:

Teaching/learning methods and strategies

1. Think logically and evaluate critically, research and advance scholarship in the discipline.
2. Plan and implement tasks at a professional level to solve problems related to the discipline.
3. Evaluate methodologies and where appropriate propose new hypotheses.
4. Plan, conduct and write a report on an independent practical project.

C. Practical skills - *able to*:

1. Apply, or adapt, practical instructions safely and accurately.
2. Carry out a variety of experimental procedures in the laboratory or human investigation unit.
3. Interpret quantitatively the results of experiments undertaken by themselves or with others.
4. Devise experimental methods appropriate for tackling a particular problem.

D. Transferable skills - *able to*:

1. Make use of IT (word processing, spreadsheets, web sources)
2. Communicate scientific ideas
3. Give oral presentations
4. Work as part of a team
5. Use library resources
6. Manage time

- Logical application of science and the critical appraisal of methodology are essential parts of the role of a Nutritionist/Food Scientist in the commercial, governmental and research domains. These skills will underpin the lectures, practical and project work.

Assessment

1-3 are assessed directly and indirectly in most parts of the course.

1-4 are assessed in the final project report.

Teaching/learning methods and strategies

- A range of detailed or outline practical instructions are used to allow students to develop a range of practical skills.
- Staff and postgraduate demonstrators are present during practical sessions. to guide and help, to mark their reports and give feedback on their work.
- Students will work on their project under the guidance of one or more members of staff.

Assessment

1-4 are assessed to different extents by the practical work associated with the various modules undertaken.

Teaching/learning methods and strategies

- The use of IT is embedded throughout the programme, but is particularly addressed in a non-modular Introductory Course and in modules: FBMM1, FBMRSN, and FBMNH2.
- Team work is essential in the practical and role play sessions associated with modules: FBMFC2, FBMNME, FBMNS2.
- Library resources are addressed in the first term modules and during the project and dissertation work.
- Time management is essential for the timely and effective completion of the programme.

Assessment

1-5 contribute to assessed coursework during the first two terms.

Please note - This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in the module description and in the programme handbook. The University reserves the right to modify this specification in unforeseen circumstances, or where the process of academic development and feedback from students, quality assurance process or external sources, such as professional bodies, requires a change to be made. In such circumstances, a revised specification will be issued.
