Programme information and content

The programme aims to provide you with a broad introduction to the wide range of approaches that constitute modern Psychology as a social and biological science, and to concepts and evidence within the domains of the subject required for British Psychological Society accreditation. Students have the opportunity to apply their knowledge to chosen areas of interest, increasing their degree of choice and independence as they move through the programme. They are made aware of current research - its methods, applications and unresolved issues - and learn how to evaluate research and carry it out themselves, with staff research expertise providing stimulation, guidance and high-quality laboratory facilities. Throughout the programme students will build their knowledge of current and historical issues and approaches in psychology and develop a critical understanding of ethical issues in research and in professional practice.

In Philosophy, the programme aims to provide you with a comprehensive degree-level education, to encourage you to confront your deepest beliefs and assumptions in a characteristically philosophical way, to enhance your global engagement and multi-cultural awareness, to teach you the basic rudiments of philosophical argument, to inform you about current debates in philosophy, to develop a sense of the significance of philosophical thinking in dealing with modern problems, to help you appreciate multiple perspectives and the values of diversity, to cultivate your skills in oral and written argument, and to encourage you to compare and contrast very different ways of doing philosophy.

During the course of their studies at University of Reading, all students will be expected to enhance their academic, personal and professional skills. In following this programme, students will have had the opportunity to develop such skills, in particular relating to written and oral communication, interpersonal skills, learning skills, numeracy, self-management, self-awareness, personal effectiveness, use of IT, critical thinking and problem-solving, project management and reporting and will have been encouraged to further develop and enhance the full set of skills through a variety of opportunities available outside their curriculum.

For textbooks and similar learning resources, we recommend that you budget between £100 to £200 a year. Some books may be available second-hand, which will reduce costs. A range of resources to support your curriculum, including textbooks and electronic resources, are available through the library. Reading lists and module specific costs are listed on the individual module descriptions. Printing and photocopying facilities are available on campus at a cost of £0.05 per page.

Costs are indicative and may vary according to optional modules chosen and are subject to inflation and other price fluctuations.

The estimates were calculated in 2019.

Placement opportunities

There are opportunities to gain non-credit bearing placement and work experience throughout the programme.

Teaching and learning delivery:

You will be taught using a range of approaches to teaching which are tailored to the learning outcomes of the different subjects you will study and the overall objective of the programme. In Part 1 and Part 2 modules are taught in a variety of ways, including lectures, seminars, tutorials, workshops and lab classes. There are also a range of resources available online via our virtual learning environment, Blackboard, including online discussion boards. At part 3 there continue to be lectures, but the majority of Psychology part 3 options are taught via seminars. Research Methods teaching is supported by interactive workshops and specialist drop-in sessions. Throughout the programme you will complete practical work, either in large groups (Part 1) or in small groups or individually (Part 2 and Part 3 project). Modules are typically assessed by a mixture of coursework and formal examination. Coursework includes essays, project reports, reflective writing, oral and poster presentations, portfolios and weekly continuous assessment questions.

Over an academic year, you will spend approximately 300 hours in lectures, seminars, online discussions or practical classes. The remaining time is for your independent study, completing coursework and preparing for assessments. Most direct teaching occurs in the Autumn and Spring terms and so you will find that you spend more time than average in class in these terms. Contact hours vary in each year of the degree. In Part 1 and 2 contact hours are between 300-350 hours per year; in Part 3 contact hours are between 250-300 hours per year. Hours depend upon your module combination; information about module contact hours can be located in the relevant module description.
