

## Programme Specification

### BSc Nutrition

For students entering Part 1 in September 2021

UCAS Code: B5D7

UFNUTRIT

UFNUTRITWY

**This document sets out key information about your Programme and forms part of your Terms and Conditions with the University of Reading.**

Awarding Institution	University of Reading
Teaching Institution	University of Reading
Length of Programme	3 years
Length of Programme with placement/year abroad	BSc Nutrition with Professional Training - 4 years (UCAS Code: B5D8)
Accreditation	Association for Nutrition IFST

### Programme information and content

This programme provides a modern, integrated and innovative education in Nutrition. In this programme, students will learn about the links between nutrition and health, both on an individual and societal level. The BSc Nutrition programme is accredited by the Association for Nutrition and the Institute of Food Science and Technology (IFST) and will allow the student to become an Associate Nutritionist (ANutr) after graduation and a Registered Nutritionist (RNutr) with approximately three years of professional experience. The BSc Nutrition aims to:

- Integrate the scientific disciplines relevant to nutrition and health
- Allow individuals to develop their capacity to undertake research into the science of diet and health.
- Provide undergraduates with opportunities to develop their inter-personal and communication skills.
- Allow individuals to develop their capacity to critically evaluate research into the science of food and health

Communicate and apply scientific knowledge in nutrition, diet and health to meet the needs of consumers, industry and food regulatory bodies

Part 1:	Introduces the foundations of the degree, with a strong focus on fundamental science modules such as physiology, chemistry and microbiology, but also quantitative skills, an introduction to food science and awareness of the food chain and food industry. The modules in Part 1 ensure that students have sufficient knowledge to underpin their later studies.
---------	---

Part 2:	Provides you with the fundamental understanding of nutritional sciences and key methodologies, as well as fundamental concepts of food science relevant for nutrition. This includes a wide range of topics, such as fundamental nutrition, issues in food choice, as well as links between nutrition and health on an individual and societal level. In practicals, students learn to acquire key skills and apply their knowledge.
Placement/Study abroad year:	The placement year normally takes place between Parts 2 and 3 of this degree programme. It is an opportunity for students to apply their skills in a 'real-world' environment and gain invaluable experiences.
Part 3:	Gives you the opportunity to further your knowledge on the links between nutrition and health. It also gives the opportunity to work in multi-disciplinary teams, for example the development of a new food product and healthy living assessments. It also includes your research project (dissertation).

### Module information

Each part comprises 120 credits, allocated across a range of compulsory and optional modules as shown below. Compulsory modules are listed.

#### Part 1 Modules:

Module	Name	Credits	Level
BI1S1	Introductory Microbiology	10	4
CH1FC3	Molecular Studies for the Life Sciences	10	4
FB1AG2	Farm to Fork	20	4
FB1BFN	Fundamental Biochemistry in Food and Nutrition	20	4
FB1EP2	Introduction to Food Processing and Engineering	20	4
FB1MB1	Introduction to Food Microbiology	10	4
FB1PN	Introduction to Human Physiology and Nutrition	20	4

CH1FC1: Fundamental Concepts in Chemistry module is compulsory for students who have not obtained a minimum of a C grade in A-level Chemistry

#### Part 2 Modules:

Module	Name	Credits	Level
FB2FQS	Food Quality and Sensory Science	10	5
FB2IFC	Issues in Food Choice	10	5
FB2MF1	Microbiology of Food Spoilage and Preservation	10	5
FB2MF2	Microbiological Hazards in Foods	10	5
FB2NED	Nutritional Epidemiology and Dietary Assessment	10	5
FB2NS	Nutritional Science	20	5

FB2PUB2	Public Health Nutrition	10	5
FB2PYA	Industrial Training Preparation	0	5
FB2SEN	Sports and Exercise Nutrition	10	5

Optional module EITHER FB2C30 (Composition, Properties and Analysis of Foods, 30 credits) OR FB2C20 (Composition and Properties of Foods, 20 credits) and a further 10 credit option

**Modules during a placement year or study year (if applicable):**

Module	Name	Credits	Level
FB2PYB	Industrial Training Year	120	5

If you take a year-long placement or study abroad, Part 3 as described below may be subject to variation.

**Part 3 Modules:**

Module	Name	Credits	Level
AP3A105	Global Issues in Nutrition and Health	10	6
FB3COM	Nutrition Communication	10	6
FB3FPD	Food Product Development	20	6
FB3LNP	Lifestyle, Nutrigenetics and Personalised Nutrition	20	6
FB3NHD	Nutrition, Health and Disease (Part taught with FBMNH1)	20	6
FB3PFB	Research Project	40	6

**Optional modules:**

The optional modules available can vary from year to year. An indicative list of the range of optional modules for your Programme is set out in the Further Programme Information. Details of optional modules for each part, including any Additional Costs associated with the optional modules, will be made available to you prior to the beginning of the Part in which they are to be taken and you will be given an opportunity to express interest in the optional modules that you would like to take. Entry to optional modules will be at the discretion of the University and subject to availability and may be subject to pre-requisites, such as completion of another module. Although the University tries to ensure you are able to take the optional modules in which you have expressed interest this cannot be guaranteed.

**Additional costs of the programme**

During your programme of study you will incur some additional costs. For textbooks and similar learning resources, we recommend that you budget between £50 to £150 a year. Some books may be available second-hand, which will reduce costs. A range of resources to support your curriculum, including textbooks and electronic resources, are available through the library. Reading lists and module specific costs are listed on the individual module descriptions. The estimates were calculated in 2020.

## **Placement opportunities**

### **Placements:**

You may be provided with the opportunity to undertake a credit-bearing placement as part of your Programme. This will form all or part of an optional module. You will be required to find and secure a placement opportunity, with the support of the University

### **Study Abroad:**

You may be provided with the opportunity to undertake a Study Abroad placement during your Programme. This is subject to you meeting academic conditions detailed in the Programme Handbook, including obtaining the relevant permissions from your School, and the availability of a suitable Study Abroad placement. If you undertake a Study Abroad placement, further arrangements will be discussed and agreed with you.

## **Teaching and learning delivery:**

You will be taught through seminars, lectures, workshops and practicals

Total study hours for each Part of your programme will be 1200 hours. The contact hours for your programme will depend upon your module combination; an average for a typical set of modules on this programme is Part 1 – 504 hours, Part 2 - 384 hours, Part 3 - 300 hours. In addition to your scheduled contact hours, you will be expected to undertake guided independent study. Information about module contact hours and the amount of independent study which a student is normally expected to undertake for a module is indicated in the relevant module description.

## **Accreditation details**

Your programme will be accredited by the Association for Nutrition. Upon graduation, you can become an Associate Nutritionist and Registered Nutritionist after approximately 3 years of experience.

## **Assessment**

The programme will be assessed through a combination of written examinations, coursework, oral examinations and practical examinations.

### **Progression**

The University-wide rules relating to ‘threshold performance’ as follows:

#### *Part 1*

- i. obtain an overall average of 40% over 120 credits taken in Part 1; and

- ii. obtain a mark of at least 30% in individual modules amounting to at least 100 credits taken in Part 1.

In order to progress from Part 1 to Part 2, a student must achieve a threshold performance; and

- i. obtain at least 40% in all assessments in (CH1FC3 and CH1FC1 where applicable).
- ii. obtain at least 40% in all assessments in EACH module of Theme 6 (FB1PN, FB1BFN).

The achievement of a threshold performance at Part 1 qualifies a student for a Certificate of Higher Education if they leave the University before completing the subsequent Part.

Part 2 To gain a threshold performance at Part 2, a student shall normally be required to:

- i. obtain a weighted average of 40% over 120 credits taken at Part 2; and
- ii. obtain marks of at least 40% in individual modules amounting to at least 80 credits; and
- iii. obtain marks of at least 30% in individual modules amounting to at least 120 credits, except that a mark below 30% may be condoned in no more than 20 credits of modules owned by the Department of Mathematics and Statistics.

In order to progress from Part 2 to Part 3 in the **3 year programme**, a student must achieve a threshold performance and

- i. obtain at least 40% in all assessments in EACH module of Theme 6 (FB2PUB2, FB2NED, FB2NS) taken at Part 2.

In order to progress from Part 2 to Part 3 in the **4 year programme**, a student must achieve a threshold performance and obtain a pass in the professional/workplacement or study abroad year. Students who fail the professional/placement year transfer to the nonplacement year version of the programme.

The achievement of a threshold performance at Part 2 qualifies a student for a Diploma of Higher Education if they leave the University before completing the subsequent Part.

In order to achieve a BSc Honours degree in Nutrition students are required to achieve a mark of at least 30% in the final year project module FB3PFB and 40% in all assessments in FB3FPD, FB3COM, FB3NDH taken in Part 3. Students who do not meet the requirements to pass all assessments within the modules outlined above (but who meet the university threshold requirements) may be eligible to achieve an alternative BSc Honours degree in Nutrition and Food.

### **Classification**

Bachelors' degrees The University's honours classification scheme is based on the following: Mark Interpretation

70% - 100%	First class
60% - 69%	Upper Second class
50% - 59%	Lower Second class
40% - 49%	Third class
35% - 39%	Below Honours Standard
0% - 34%	Fail

The weighting of the Parts/Years in the calculation of the degree classification is:

Three year programmes:

Part 2: one-third

Part 3: two-thirds

Four year programmes, including professional/workplacement or study abroad:

Part 2: one-third (Placement/Study Abroad Year abroad not included in the classification)

Part 3: two-thirds

**For further information about your Programme please refer to the Programme Handbook and the relevant module descriptions, which are available at <http://www.reading.ac.uk/module/>. The Programme Handbook and the relevant module descriptions do not form part of your Terms and Conditions with the University of Reading.**
