Programme Specification

MSc Data Science (UoR-NUIST Academy) (full-time)	PFTZDATAURHM
MSc Data Science (NUIST-based, 2+0) (full-time)	BFTZDATANUDM

For students entering in 2024/25

This document sets out key information about your Programme and forms part of your Terms and Conditions with the University of Reading.

Awarding Institution	University of Reading
Teaching Institution	University of Reading
Length of Programme	MSc Data Science (UoR-NUIST Academy) (full-time) - 2 years MSc Data Science (NUIST-based, 2+0) (full-time) - 2 years
Accreditation	N/A
Programme Start Dates	September
QAA Subject Benchmarking Group	Computing

Programme information and content
This programme aims to provide students with industry-relevant knowledge and skills in data science, as well as hands-on experience of solving data science problems with real-world, real-time and large-scale data streams, also including real-world challenges such as big data, data security and ethical issues. In addition, students will get an in-depth understanding of advanced and modern computing paradigms such as artificial intelligence, machine learning, and cloud computing. Students will also develop transferable skills for workplace or further research/degree and be able to utilise knowledge and skills to continue learning and adapting to new data science technologies. On completion of the course, students will be well placed to progress into a variety of roles in data-intensive industries or a related research career. The design of the programme follows the guidance provided by QAA and ACM and aligns with the Teaching and Learning Strategy of University of Reading. This programme is carefully designed to provide a comprehensive coverage from fundamental knowledge and essential skills in data science to advanced computing paradigms and real-world challenges. This programme is jointly run by UoR and NUIST. **Before starting the programme:** Students may need to attend the pre-sessional English courses to meet the minimum English language requirements if their IELTS results do not reach the entry requirements. **The first academic year:**

Students who are enrolled onto the programme can choose between the following two options for the first academic year.

- **Option 1:** Students will study at Reading for the first academic year from September to June. Students will also complete relevant assessments such as coursework and exams at Reading.
- **Option 2:** Students will study at Nanjing and be taught by NUIST staff members. Students will also complete relevant assessments such as coursework and exams at NUIST.

The second academic year:

During the entire second academic year, all students will complete dissertation in stages under the supervision of a NUIST supervisor and a UoR supervisor.

The programme will be supported by the expertise and resources in data science, machine learning and cloud computing at the University of Reading and NUIST.

Programme Learning Outcomes - MSc Data Science (UoR-NUIST Academy) (full-time)

During the course of the Programme, you will have the opportunity to develop a range of skills, knowledge and attributes (known as learning outcomes) For this programme, these are:

	Learning outcomes
1	Describe and explain general data science concepts, principles and algorithms.
2	Acquire and be able to apply mathematical and statistical, programming, artificial intelligence and machine learning techniques for data science tasks; as well as cloud computing skills for data management and distributed and parallel data processing.
3	Evaluate, select and use state-of-the-art tools and platforms for solving data science problems.
4	Design, implement, and execute solutions for data science problems from small-scale to large-scale and real-world data.
5	Evaluate data science solutions, including their outcomes, efficacy, constraints, and technical uncertainty.
6	Critically evaluate ethical, legal, security and social issues in data science context.
7	Undertake research, manage project and communicate technical concepts and research/project output precisely and effectively.
8	Utilise knowledge and skills to continue learning and adapting to new data science technologies.

You will be expected to engage in learning activities to achieve these Programme learning outcomes. Assessment of your modules will reflect these learning outcomes and test how far you have met the requirements for your degree.

To pass the Programme, you will be required to meet the progression or accreditation and award criteria set out below.

Module information

The programme comprises 180 credits, allocated across a range of compulsory modules as shown below. Compulsory modules are listed.

Compulsory modules

The following modules will be taken by students who will be studying Year 1 in the UK:

Module	Name	Credits	Level
CSMAD	Applied Data Science with Python	20	M
CSMAI	Artificial Intelligence and Machine Learning	20	M
CSMBD	Big Data and Cloud Computing	20	M
CSMDE	Data Security and Ethics	20	M
CSMDS	Data Science Algorithms and Tools	20	M
CSMMS	Mathematics and Statistics for Data Science	20	M

The following modules will be taken by students who will be studying both years in Nanjing:

Module	Name	Credits	Level
CSMADNU	Applied Data Science with Python	20	M
CSMAINU	Artificial Intelligence and Machine Learning	20	M
CSMBDNU	Big Data and Cloud Computing	20	M
CSMDENU	Data Security and Ethics	20	M
CSMDSNU	Data Science Algorithms and Tools	20	M
CSMMSNU	Mathematics and Statistics for Data Science	20	M

Year 2 modules

Module	Name	Credits	Level
CSMPRNU	MSc Project	60	M

In addition to the UoR modules listed above, in line with Chinese MoE regulations, all students will be expected to study two Chinese Philosophy modules, delivered by NUIST in Year 2 of the programme.

Teaching and learning delivery
You will be taught primarily through a mixture of lectures, lab practical, tutorials and seminars, depending on the individual modules. Some modules may include group work. Reading-based modules are delivered at Reading by academic staff from the University of Reading while NUIST-based modules are delivered at NUIST by academic staff from NUIST. Students must undertake a dissertation project in the second year of this programme. Each dissertation project will be supervised by two supervisors: a supervisor from the University of Reading and a supervisor from NUIST. Detailed information about the teaching and learning delivery can be found in each specific module description. Elements of your programme will be delivered via digital technology. The scheduled teaching and learning activity hours and amount of technology enhanced learning activity for your programme will depend upon your module combination. In addition, you will undertake some self-scheduled teaching and learning activities, designed by and/or involving staff, which give some flexibility for you to choose when to complete them. You will also be expected to undertake guided independent study. Information about module study hours including contact hours and the amount of independent study which a student is normally expected to undertake for a module is indicated in the relevant module description.

Accreditation details
N/A

Assessment
The programme will be assessed through a range of assessment types, such as written examination, written coursework assignment, set exercise, dissertation, presentation and demonstration. Further information is contained in the individual module descriptions.

Progression
N/A

Classification

The University's taught postgraduate marks classification is as follows:

Mark Interpretation

70 - 100% Distinction
60 - 69% Merit
50 - 59% Good standard (Pass)

Failing categories:
40 - 49% Work below threshold standard
0 - 39% Unsatisfactory Work

For Masters Degree

The following conditions must be satisfied for the award of a Master's degree:

Award of a Master's degree

(i) an overall weighted average of 50% or more over 180 credits
(ii) a mark of 50% or more in at least 120 credits
(iii) not more than 20 credits with a mark below 40%
(iv) a mark of 50% or more for the Dissertation

In addition to the threshold conditions for the award of a Master's degree, the following **further** conditions must be satisfied for a classification of Distinction or Merit:

Distinction
An overall weighted average of 70% or more over 180 credits
OR
an overall weighted average of 68% or more over 180 credits and marks of 70% in at least 90 credits
AND
A mark of at least 60% in the dissertation
AND
No marks below 40%.

Merit
An overall weighted average of 60% or more over 180 credits
OR
an overall average of 58% or more over 180 credits and marks of 60% in at least 90 credits
AND
No marks below 40.

For Postgraduate Diploma

The following conditions must be satisfied for the award of a Postgraduate Diploma:

Award of a Postgraduate Diploma

(i) an overall weighted average of 50% or more over 120 credits
(ii) a mark of 50% or more in at least 80 credits
(iii) not more than 20 credits with a mark below 40%

In addition to the threshold conditions for the award of a Postgraduate Diploma, the following further conditions must be satisfied for a classification of Distinction or Merit:

Distinction
An overall weighted average of 70% or more over 120 credits
OR
an overall weighted average of 68% or more over 120 credits and marks of 70% in at least 60 credits
AND
No marks below 40.

Merit
An overall weighted average of 60% or more over 120 credits
OR
an overall average of 58% or more over 120 credits and marks of 60% in at least 60 credits
AND
No marks below 40.

For Postgraduate Certificate

The following conditions must be satisfied for the award of a Postgraduate Certificate:

Award of a Postgraduate Certificate
(i) an overall weighted average of 50% or more over 60 credits

Additional costs of the programme

Students will need to fund their travel costs to and from China and the UK.

For textbooks and other learning resources, we shall recommend the students to budget up to £100, if the students prefer to have their own books rather than borrowing them from the library. Some resources to support the study, including textbooks and electronic material, are available through the library and the content management systems of the University and NUIST.

Costs are indicative and may vary according to optional modules chosen and are subject to inflation and other price fluctuations. The estimates were calculated in 2023.

For further information about your Programme please refer to the Programme Handbook and the relevant module descriptions, which are available at http://www.reading.ac.uk/module/. The Programme Handbook and the relevant module descriptions do not form part of your Terms and Conditions with the University of Reading.
