Programme information and content

Our BA French and International Development enables you to develop your understanding of complex global-issues relating to international development while gaining a high level of proficiency in French as well as deepening your knowledge of related cultures and societies.

In **French** this programme will allow you to progress in your language competence and achieve level C1 (or above) of the Common European Framework of Reference (CEFR), whilst also studying French and Francophone culture modules. You may also be able to cover aspects of European and world culture through optional cross-cultural modules offered in the Department of Languages and Cultures. The culture modules are informed by staff research specialisms and will allow you to analyse and interpret a range of cultural material; understand and critically apply key concepts; and develop and demonstrate independence of thought and sensitivity to cultural difference. Our teaching places an emphasis on interactive, student-centred learning.

In **International Development** this part of the programme aims to provide you with a degree-level understanding of the complex global dynamics affecting the planet's resources, climate, food systems, and the politics of development and inequality. Through the course of the degree, students are exposed to critical thinking in international development, capturing key ideas in international development policy and practice, illustrated with rich use of case studies from around the world.

Part 1:	In French Part 1 introduces you to the practical language skills in your French language module in all four areas (speaking, writing, reading, and listening). You will also have the opportunity to understand and apply key terms in the structural analysis of language. The culture studies modules provide you with a sound understanding of key issues and developments in the history and culture of France and the French-speaking world.
---------	--

	<p>In International Development Part 1 ID modules introduce you to a broad range of themes within international development across global and local levels; you will learn about the politics of aid and the SDGs, climate and sustainability and introductory economics.</p>

The cultural studies modules provide you with an opportunity to encounter and critically engage with a range of material in the target language, such as films, literature, essays and historical documents, enhancing your ability to apply a variety of analytical concepts as well as approaches to the critical analysis of this material.</p> <p>In International Development you will have the opportunity to apply and expand on knowledge gained in Part 1 through consolidating understanding of core development theories, introducing research methods for international development that can later be applied to a research project, and permitting students to further specialise in subject areas dependent on their interests and career aspirations through an optional ID module.</p>
Placement/Study abroad year:	<p>The Year Abroad will give you the opportunity to apply and enhance your practical language skills in either a work or study environment, or a combination of both. You will further develop your adaptability and self-reliance as well as your sensitivity to cultural difference.</p>
Part 3:	<p>In French Part 3 gives you the opportunity to build up on your existing language skills, refining your use of more complicated structures as well as variation in register and style. The cultural studies modules will give you an opportunity to engage deeply and critically with topics based on staff research specialisms and to apply concepts and approaches for critical analysis to an increased amount of material in the target language.</p> <p>In International Development you can choose from a range of optional modules, including those exploring role of power in development, the history of development and sustainability and climate or international politics. Alternatively, you could choose to undertake an individual research project on a chosen development topic through a dissertation plus an additional optional module.</p>
